Why Waves Qatar

Waves Trading & Contracting W.L.L is a highly regarded Qatar company which has divisions specialized in Sports & Coating, Swimming pool & Leisure, Landscapes and Infrastructure development. It is known in the market for its excellence in handling all stages of water-related projects. From designing outdoor landscapes of all shapes and sizes, building the world's largest aquarium (Commercial), to providing support and expertise to some of Qatari's largest construction projects (Infrastructure), Waves' experience and commitment to expansion knows no bounds.

Waves Trading and Contracting continues to expand in regional and world markets, with substantial market shares in its chosen product and service lines.

Since the big development taking place in the state of Qatar, Waves Trading and Contracting has developed its division to provide our clients with exacting attention to details, the best selection of the highest quality products, uncompromising business ethics, and a commitment to remarkable design that enhances their lives.

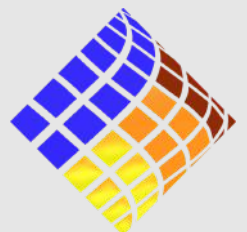

Partners

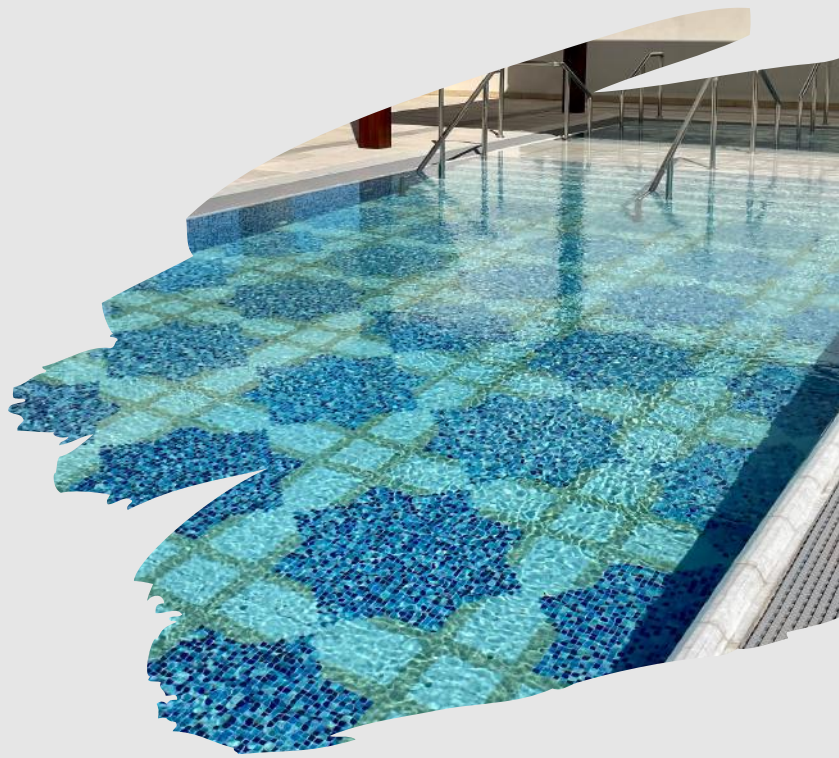

Park Games

passion for sports grounds

Waves Trading and Contracting

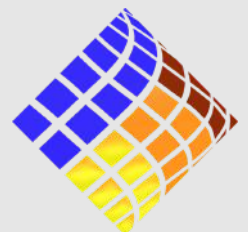

is one of the leading contractor in providing factory produced, fully tiled, glass reinforced plastic (GRP) pools as the materials are corrosion free and chemically resistant.

Our unique pre-formed, composite pool shell, manufactured, tiled and pre-fitted in the factory, is fast becoming the industry standard for contemporary pools.

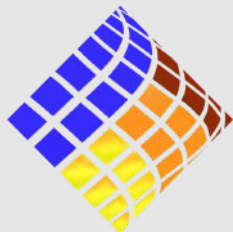

We are committed to providing products made of high quality materials with components that work perfectly promising easy handling and maximum durability until the full satisfaction to the client.

[Waves Trading and Contracting](#) is many things to many people what remains constant is our commitment to providing the right solution for the right requirements. For over 16 years, we have been committed to changing the face of the region, and pride our success as a small contribution to the phenomenon of the transformation of the State of Qatar.

Our projects are as diverse as our client's demands; from designing outdoor landscapes of all shapes and sizes, building the world's largest aquarium (Commercial), to providing support and expertise to some of Qatari's largest construction projects (Infrastructure) our experience and commitment to expansion knows no bounds. With a family of over 400 members, we are committed to understanding your requirements, providing the best solutions, and most importantly getting the job done right.

Product Profile

GENERAL

Waves-pools provide, as standard, a number of features including:

- Easy access walk-in steps
- Seating and ledges
- Options for temperature control
- In-pool lighting
- A beautiful hand tiled mosaic finish, with accent lines at the edge of all steps and seats for safety purposes.
- Safe, smooth, easy to clean surfaces
- A well engineered and proven sanitation system
- A wide range of optional extras and upgrades

The pool is provided with a GRP Pump House containing pre-engineered filtration and water treatment equipment.

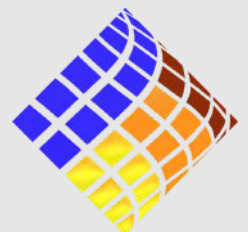

Waves-pools take full responsibility for the complete process, giving you the peace of mind of a quality product, professionally installed and ready-to-use.

We aim for the pool user to have years of trouble-free enjoyment from a range of elegant yet functional pools, which reflect technical innovation and make an unmistakable statement of quality and style.

SAFETY

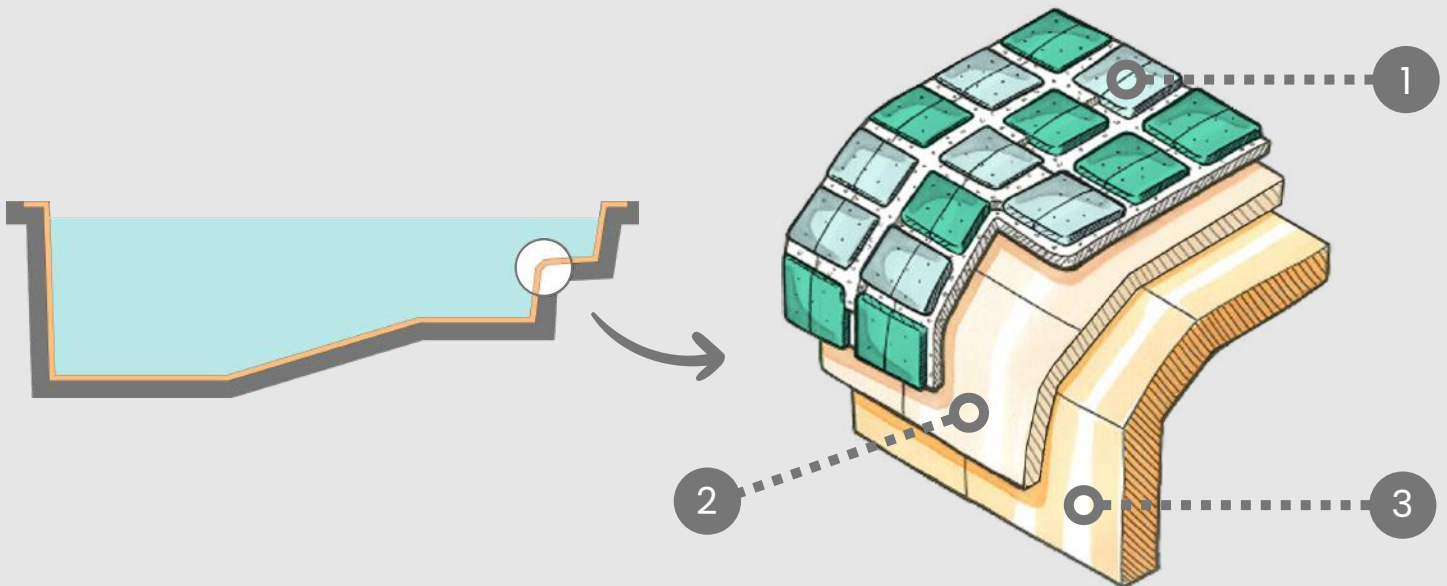

All swimming pools are a potential hazard especially for young children and non-swimmers. There is no substitute for proper supervision of non-swimmers and children.

Waves-pools do everything they can to make the pool as safe as possible. The pool is well lit, with smooth, non-slip surfaces and no sharp edges. The pool has easy access, walk-in steps and a darker tile line at the edges of steps and seats. Special attention is given to electrical issues and to suction control.

FIBERGLASS COMPOSITE POOLS

PRE-FORMED COMPOSITE POOL SHELL STRUCTURE

1. PORCELAIN CERAMIC MOSAIC TILE

The internal finish is a hand applied mosaic tile finish, using epoxy grout to maximize inuse service life as well as providing the choice of a wide range of colours and styles.

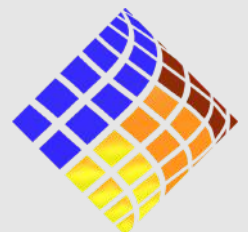

2. EPOXY LAMINATE

The inner layer is a 2 part, reactive epoxy system. This proprietary system cures to form an Epoxy laminate which completely prevents exposure of the GRP to pool water and associated chemicals.

3. GRP (Glass Reinforced Plastic)

The GRP outer body consists of spray applied, high performance resins reinforced with woven glass fibres.

It is the composite structure of the 3 materials working together which provides the unique properties of the Waves-Pools Pre-formed pool shell.

POOL COMPARISON

GRP/Plastic LOW COST

PROS

- Smooth, non porous surface.
- Installed faster than gunite pool.

CONS

- Heat Distortion - a Pool surface gets hot, it can blister, crack, and fade at certain temperatures, depending on the type of fiberglass resin used.
- Limited in size / Design

LIFE SPAN

- 4 Years

Concrete/Gunite TRADITIONAL

PROS

- Long History of industry use.
- Suits bespoke pool design.

CONS

- Takes min 3 months to build due to curing. Limited in size / Design
- Steel Reinforcement creates durability risk especially in corrosive environments.
- Needs acid washing & re-grouting - approx every 3yrs. Maintenance intensive.
- Subject to the vagaries of on-site construction.
- Messy & noisy construction process.

LIFE SPAN

- 25+ Years

Pre-Formed Composite CONTEMPORARY

PROS

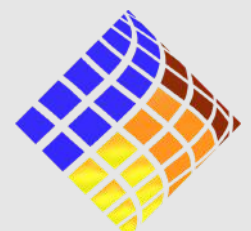

- Composite Structure of Pool ensures its longevity.
- Outstanding finished appearance.
- Gives a completely water tight pool shell.
- Proven product with factory controlled quality.
- Quick & simple to install two weeks on-site.
- Available in all pool types, including overflow & vanishing edge.

CONS

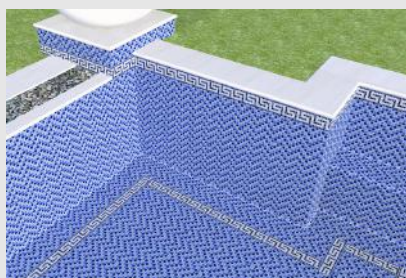

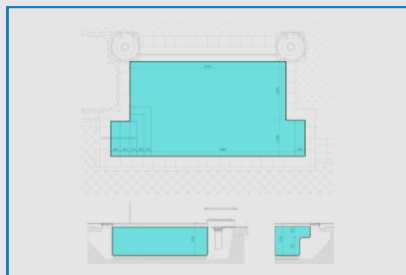

- More costly for some bespoke/adhoc designs.

LIFE SPAN

- 25+ Years
