2026 CHRISTMAS MYSTERY BOX

A top-down view of a wooden table with various items. In the top left is a white ceramic mug filled with coffee. To its right is a bouquet of white and blue flowers. In the bottom left is a corner of a quilt with a blue and white pattern. In the bottom right is a pair of scissors and a spool of thread. The text is on a piece of white paper with deckled edges in the center.

Happy June!

Finally, my favorite time of year – convertible weather! If you wonder why my hair is always a mess and in a ponytail, it's just the sacrifice for enjoying the beautiful weather!

Hopefully, you were able to get to the AQS Hartford Quilt Show in April. Boy, were those quilts show stoppers! The show was a buzz with excitement! We met a group that traveled all the way from Sweden to attend! That's dedication to their craft.

Earlier in May, Denise, Brian, and I went to a trade show in Chicago. This is where we meet pattern designers, fabric companies, and see all things new! It was so big, we are certain we did not see half of it! But we did find some great things! Our heads were spinning from all the new things we found!

We are looking forward to starting to rifle through our bags so we can build some great classes around all our new finds!

Happy Stitching

Cheryl

FREE MOTION?!

Have you ever wanted to try free motion?

Of course you have.

Is it intimidating? Absolutely!

So, you've finally decided to give free motion a try. You have your test fabric and batting sandwich, your machine is set for free motion; you've dropped your feed dogs, attached the proper foot, and (if need be) tell your machine what foot you've put on. Now what?

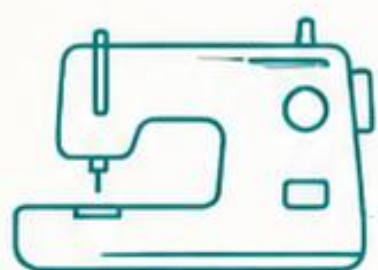

Now, I know that you're nervous.

You don't want to break anything. You don't want it to get out of control. So, you start. Slowly. Cautiously. Your needle goes up, then down slowly. You move your fabric. The machine sounds very clunky or chunky. It feels like you're pulling in what feels like a wrong way. The result looks more like a stop sign than a gentle curve. What's wrong?

The greatest suggestion I have if you are just starting out with free motion is this:

"Speed is your friend!"

For beginners, I tell folks to set their machine to its highest speed. Don't be afraid to stomp on the pedal right away. Yes, the machine is going to take off, but that's what you want. Why are we doing this?

By running the machine at a high speed, your needle is going to make more stitches per inch – the stitches will be much closer together. This is better for 2 immediate reasons:

- 1 Closer stitches will allow you to make graceful, smooth curves.**
- 2 More stitches per inch puts way less stress on the needle.**

Think of it this way – if there is a large gap between stitches, you're pulling harder on the needle. This can cause the needle to flex and possibly flex it away from the hook. This can cause poor stitch quality which may look like a tension issue, and it may make you skip stitches.

If the needle is moving faster and making more stitches in the same amount of time, then you're not stressing the needle as much, allowing the machine to make a nicer stitch.

There is no such thing as the "Quilt Police"

and you won't be pulled over for going too fast –

so FLOOR IT!

THIS COMFY QUILT IS THE PERFECT STASH-BUSTING PROJECT!

Piece these folk art-inspired flower medallions using fat eighths, precut 10" x 10" squares, or your favorite scraps.

Each Casserole Flower Medallion block measures 26" x 26".

The blocks are sewn together with sashing and Plus Units to make a Small or Large Quilt.

LARGE QUILT

86" x 86"
includes nine blocks

SMALL QUILT

58" x 58"
includes four blocks
