## MERCEDES-BENZ **AMG GT**

### MERCEDES BENZ AMG GT COUPE

The Mercedes-AMG GT is a series of 2-door grand tourers produced by German automobile manufacturer Mercedes-AMG. The car was introduced on 9 September 2014 and was officially unveiled to the public in October 2014 at the Paris Motor Show. While not directly replacing the SLS AMG (competing in a different segment), it is the second sports car developed entirely in-house by Mercedes-AMG. The Mercedes-AMG GT went on sale in two variants (GT and GT S) in March 2015, while a GT3 racing variant of the car was introduced in 2015. A high performance variant called the GT R was introduced in 2016.

SKYLINE GT-R

It was originally launched on the market as a four-door sedan that would be for family use due to its large compartment in the rear and its resistant body, but over the years it acquired a more sporty shape, with the arrival on the market of its coupe version, which only had two doors (not counting the rear trunk door), until reaching its final version, and the one that, to this day, continues to be sold, the Nissan Skyline GT-R.

In 1995, it was called the Nissan Skyline GT-R R32, whose version was shorter and its shape was more square, until, in 1996, the GT-R R33 was introduced, which had visual improvements, including the lengthening of the bodywork and the change in the rear lights, which became completely circular. Even so, with these improvements, the Skyline could not find a place in the range of competitive cars, so they introduced their latest version to the market, the GT-R R34.

It was widely sold in Japan between 1999 and 2002, the year in which its production was completely stopped, and, despite being the last version of said model, the GT-R R34 used the engine of its two previous versions, a RB26DETT.

5659944527

LUMOREGDL

LUMORE.GDL

LUMORE GDL

**ONE OF THE MOST ICONIC JAPANESE SPORT CARS OF ALL TIME**

Ten years before Nissan introduced the R34, its predecessor, the R32 GT-R, had already gotten the nickname of Godzilla, and rightly so. It was the beginning of a golden age for Japanese sports cars, and GT-Rs could take on and even outpace most European and American rivals. Compared to the R32 and R33 GT-Rs, the R34 had a shorter production window. That also means there are fewer of them around. Nissan sold over 64,000 Skylines between 1998 to 2001, but only a small fraction of those were worthy of the Godzilla nickname.

**GT  
R**

The last "Godzilla" of the 20th century featured upgraded ball-bearing turbos, providing phenomenal throttle response in an age where most boosted cars struggled with turbo-lag. The GT-R had a maximum theoretical output of 276 horsepower with the Japanese Gentlemen Agreement. But several independent tests have often claimed that the figure was somewhere north of 320 horsepower instead. With forged pistons and a cast iron block the tuning potential for the RB26DETT is phenomenal.

# R34 / MK4

El Nissan Skyline R34 y el Toyota Supra MK4 son dos icónicos automóviles japoneses que han ganado renombre en la escena automovilística por su rendimiento y estilo. El R34 fue producido por Nissan desde 1998 hasta 2002. El modelo más famoso es el GT-R, que contaba con el motor RB26DETT, un twin-turbo de 2.6 litros y seis cilindros en línea que desarrollaba alrededor de 280 hp, aunque se especula que la cifra real podría ser más alta. El modelo más destacado es el Supra Turbo, que estaba equipado con un motor 2JZ-GTE twin-turbo de 3.0 litros y seis cilindros en línea. Este motor es conocido por su robustez y capacidad de potencia, siendo capaz de producir alrededor de 320 hp de fábrica. A diferencia del Skyline R34, el Supra MK4 tenía tracción trasera, lo que lo convertía en un automóvil deportivo clásico en términos de diseño de propulsión trasera.

911 GT3 RS

**PORSCHE**

**PORSCHE 911 GT3 RS**

**'There's no a substitute'**

The first models of the 911 had a rear-mounted 130 hp (97 kW) Type 901/01 flat-6 engine, in the "boxer" configuration like the 356, the engine is air-cooled and displaces 1,991 cc (2.0 L) as compared to the 356's four-cylinder, 1,582 cc (1.6 L) unit. The car had four seats although the rear seats were small, thus it is usually called a 2+2 rather than a four-seater (the 356 was also a 2+2). A four or five-speed 'Type 901' manual transmission was available.

*Powerfull*

Porsche introduced the Porsche 911 GT3 RS, an even more track-focused version of the 996 GT3. RS is short for the German RennSport, literally "racing sport" in English. The "RS" moniker, and the characteristic lightweight blue or red wheels and "GT3 RS" side stickers link the 996 GT3 RS to historically important Porsches such as the Carrera 2.7 RS of the early 1970s

## 911 TURBO

GEAR CLUB UNLIMITED

The new 911 Turbo's engine was based on the 3.6-litre unit fitted to its predecessor. For the first time the engine was fitted with a pair of KKK turbochargers and air-to-air intercoolers. Further modifications included redesigned cylinder heads and reinforced internals. As a result, the engine's output was raised to 300 kW or 408 hp. The very potent engine was mated to the same six-speed gearbox that was fitted on the naturally aspirated models.

At the 1989 Geneva Motor Show, Porsche unveiled the new 911 Turbo. It was the first time the 911 Turbo had a rear spoiler. Its naturally aspirated predecessor, it was a car that had been in production for over 20 years. The new 911 Turbo was a significant step forward for the 911 Turbo, as it was the first 911 Turbo to have a rear spoiler.

PORSCHE

The 911 has been raced extensively by private and factory teams, in a variety of classes. It is among the most successful competition cars. In the mid-1970s, the naturally aspirated 911 Carrera RSR won world championship races including the Targa Florio and the 24 Hours of Daytona.

The first models of the 911 had a rear-mounted 130 hp (97 kW) Type 901/01 flat-6 engine, in the "boxer" configuration like the 356, the engine is air-cooled and displaces 1,991 cc (1.6 L).

## Porsche 911 GT3 RS

THE PORSCHE 911 WAS DEVELOPED AS A MORE POWERFUL, LARGER AND A MORE COMFORTABLE REPLACEMENT FOR THE 356, THE COMPANY'S FIRST MODEL. THE NEW CAR MADE ITS PUBLIC DEBUT AT THE 1963 FRANKFURT MOTOR SHOW (GERMAN: INTERNATIONALE AUTOMOBIL-AUSSTELLUNG). THE CAR WAS DEVELOPED WITH THE PROOF-OF-CONCEPT TWIN-FAN TYPE 745 FLAT-SIX ENGINE, BUT THE CAR PRESENTED AT THE AUTO SHOW HAD A NON-OPERATIONAL MOCKUP OF THE SINGLE-FAN 901 ENGINE, RECEIVING A WORKING UNIT IN FEBRUARY 1964.

## AUDI R8 SPYDER V10

### AUDI R8 SPYDER V10

The Audi R8, based on the Audi Le Mans quattro concept car (designed by Frank Lambert and Julian Hoenig) first appeared at the 2003 International Geneva Motor Show and the 2003 Frankfurt International Motor Show. The R8 road car was officially launched at the Paris Auto Show on 30 September 2006. There was some confusion with the name, which the car shares with the 24 Hours of Le Mans winning R8 Le Mans Prototype (LMP). Initial models included the R8 4.2 FSI coupé (with a V8 engine) and R8 5.2 FSI coupé (with a V10 engine). Convertible models, called the Spyder by the manufacturer, were introduced in 2008.

## NISSAN SKYLINE

### NISSAN SKYLINE R34

INNOVATION THAT EXITES

The GT-R reappeared in 1999, with a revised chassis and other updates. The R34 turbos received a ball bearing core. The R34 NT turbos had a metal exhaust wheel, and ball bearing center section. The turbo outlet pipes were changed from cast to formed metal outlets. The intercooler outlet side and rear turbo dump pipe had temperature probes fitted in the V-spec models. As part of the Type R34 GT-R final campaign, all Skyline GT-R customers received an official GT-R photo album before 24 January 2002.

# TOYOTA SUPRA

## TOYOTA SUPRA A90

The Toyota Supra is a sports car produced by Toyota since 1919. The fifth-generation Supra, the GR Supra, was sold under and developed by Toyota Gazoo Racing (TGR) brand in collaboration with BMW. It is the successor of the A80 Supra, which ceased production in 2002. The fifth generation Supra uses BMW model code conventions, designated as a 329 series with D8 model codes. However, Toyota used the "A90" and "A91" code for promotional and marketing materials for the fifth generation Supra to maintain continuity from previous Supra generations.

## TOYOTA SUPRA MK4

-MASTERPIECE ON WHEELS-

The first generation of Supra stopped production in 1983, the year in which it already had a 2,759 cm<sup>3</sup> (2.8 liter) and 116 HP (114 HP; 85 kW) inline 6-cylinder engine, with options such as a suspension firmer and diffusers at both ends.<sup>3</sup> Always naturally aspirated and with a power of 125 HP (123 HP; 92 kW) or up to 175 HP (173 HP; 129 kW) in Japan, an engine much more suitable for competing with the Nissan Zs. It was not a pure sports car, because due to its characteristics it better fits the definition of Gran Turismo.

Supra

5659944527

LUMOREGDL

LUMORE.GDL

LUMORE GDL

# BULLET

The Supra traces much of its roots back to the 2000GT owing to an inline-6 layout. The first three generations were offered with a direct descendant to the Crown's and 2000GT's M engine. Interior aspects were also similar, as chassis code "A". Along with this name, it included its own logo for the Supra.

- Engine: 3.0L Sequential Turbo
- Straight Six
- Transmission: 6-Speed Manual
- Horsepower: 321 hp
- Torque: 315 lb-ft
- Top Speed: 177 mph

## THE TOYOTA SUPRA MK4 BRIAN O'CONNER

The initial four generations of the Supra were produced from 1978 to 2002. The fifth generation has been produced since March 2019 and went on sale in May 2019. The styling of the original Supra was derived from the Toyota Celica, but it was longer. Starting in mid-1986, the A70 Supra became a separate model from the Celica. In turn, Toyota also stopped using the prefix Celica and named the car Supra.
