## WELCOME TO THE VIEW REFINED \

Since 2011, The Shower Lab has led the way in elegant, customisable and stylish frameless shower spaces that fit within any home. The View Collection has remained our signature range, featuring options for wet rooms, compact homes and the wildest imaginations.

In 2021, we celebrated 10 years and wanted to say Thank You. Thank you to all of our partner showrooms, clients and customers for helping us get to where we are today.

Introducing The View Collection Refined. The same versatile, timeless and expertly crafted shower spaces but with the backing of over 18 months of research and development. We've re-crafted the wall channels, honed corner brackets and focused on achieving a seamless installation, every time. For you, that translates as a sleek, well-honed addition to your bathroom that will stand true for many years to come.

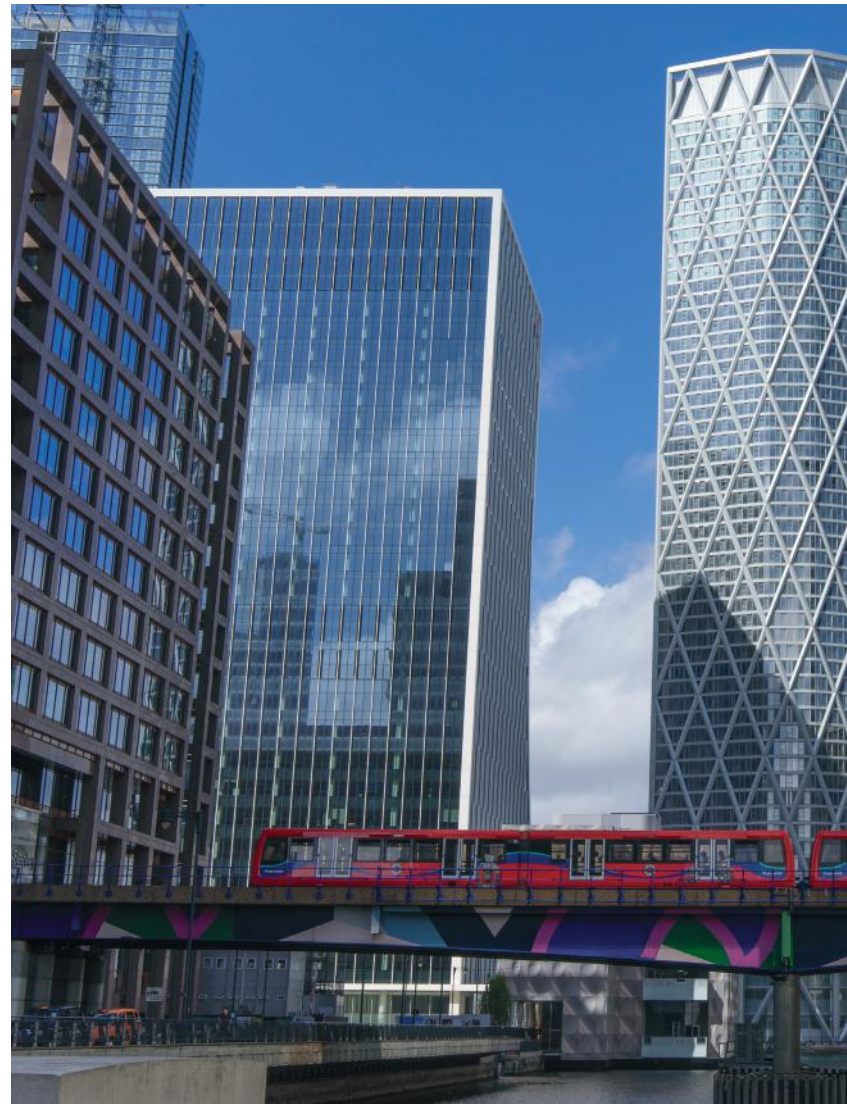

Step into the world of The View Collection Refined and find a shower space that works around you and your family here today.

## Newfoundland - Luxury Apartments

With its innovative architecture, sleek design and full views of Canary Wharf, Newfoundland is a new landmark within the London skyline. Reaching 729ft, it comprises high-quality, private apartments with over 58 floors, retail space and residential amenities.

Working with commercial supplier, Neville Lumb, The Shower Lab were proud to provide 900 bespoke View 01 Fixed Panel Shower Spaces and View 14 Two-Panel Hinged Bath Screens for the project.

**Please note:** Our glass colour options are available with all of The Shower Lab View Collection shower spaces found in this brochure. For more information or to place an order, speak to your local The Shower Lab Partner Showroom.

# GLASS COLOURS \

Choose a glass colour that accentuates your bathroom design. From classic Clear and Ultra-Clear through to Satin-Etched or Bronze, opt for something unique in your shower space.

# IMPORTANT INFORMATION \

## SHOWER SCREENS

All of our products are manufactured in accordance with EN 14428. Our shower spaces feature 10mm thick, toughened safety glass to EN 1250 and have been treated with the Easy Clean protective finish at no additional charge.

Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464.

All of The Shower Lab spaces are approved for use with power showers, where installed correctly. Water retention is maintained under normal showering conditions. We recommend that you shower using either a fixed or adjustable shower head that is appropriately positioned. The water flow should not face directly towards the shower screen as this could result in leaks. Please note, our walk-in spaces may allow water spray to pass beyond the length of the screen. Again, this depends on the position of the shower head and the volume of water it delivers. For more information on the correct positioning for shower heads, please contact your local The Shower Lab partner showroom.

Your new shower space should be installed in a well-ventilated area to minimise the build-up of steam. Mineral deposits found in normal shower water can cause watermarks and limescale when left to build up. Over time, this will cause your shower space to look dull and can cause damage if ignored. To prevent limescale build-up, wipe down your screens with a soft cloth or chamois leather after each use. Please see our Care & Maintenance section (page 98) for more information.

We recommend that you install a suitable waterproof flooring outside of your showering area. This will prevent spray or mist from escaping beneath your shower space and causing moisture damage.

Please note, our product descriptions do not imply the use of precious or valuable materials. All finishes are described by colour and shown within our catalogue as accurately as possible within the limits of the printing process. Please visit your local The Shower Lab partner showroom to see our component finishes and glass colours in person.

The Shower Lab follows a policy of continuous improvement and product design. Therefore, we reserve the right to change product information and prices without notice.

## BATH SCREENS

The Shower Lab bath screens are not designed to fit baths with steeped fronts, integral soap dishes, headrests, roll top designs or those with handles sitting above the top of the bath. If you choose to install them in this setting, they may affect the performance of your screen.

All of our inward opening bath screens need appropriate space to move. Care must be given when positioning the taps in your bath to ensure that sufficient space is left to fold the screen flat against the wall.

The Shower Lab bath screens are suitable for use with standard pressure showers. We do not recommend that they are used with power showers. During installation, we recommend that the shower head is positioned parallel to the bath screen. It should not be aimed directly at the screen.

Please note, all rakes, notches and cut angles are included in the prices provided.

## INSTALLATION

All of our The Shower Lab spaces are provided with full installation instructions. If required, please show the following information to your installation team before they commence any work.

Care should be taken when preparing the area where the screen is to be installed. The following points should be observed.

For easy installation, the base (shower tray, tiled floor etc) should be level over the whole length. If the base is not level, our standard shower spaces cannot be used.

For easy installation, all walls should be level and plumb. If the walls are not level or not plumb, our standard shower spaces cannot be used.

Please note, if your shower space is being installed directly on to a tiled floor, you must consider that items beneath these tiles (including under-floor heating or pipework) could be damaged when underframes and channels are being fitted.

The Shower Lab spaces are manufactured using 10mm thick, toughened safety glass. This heavy material needs appropriate support to be installed safely. Please ensure that all walls and ceilings are suitably prepared so that hinges, channels and stay bars can be safely installed.

When installing on to stud walls, timber supports should be located behind the fixing points. This should be a minimum 100mm x 50mm x required length where the glazing channels are fitted to the wall. The exact placement will be governed by the overall height of your shower screen. For more information, please speak to your local The Shower Lab partner showroom.

All dimensions supplied to The Shower Lab should be taken to finished works. Ensure shower trays, tiled floors and tiled walls are all completed before taking these measurements.

If you require any channels to be installed before tiling takes place in order to conceal them, all sub surfaces should be fully prepared before measurements are taken.

We recommend you carefully consider the position of bathroom items intended for installation after your shower screen, if they could impact the future operation. These include wall-mounted towel radiators, WC's and basins. An experienced bathroom designer will be able to advise on this.

Care should be taken when choosing wall finishes, including tiles. Where one of our shower space doors closes directly on to the wall, it will close with a translucent seal. While this has a soft bubble which will compress against the wall, gaps between tiles for grout may act as a channel through which water can escape. We also recommend avoiding smaller mosaic tiles or tiles with irregular levels when closing a door on to an inline fixed panel for the same reason. Alternatively, select a different shower space design.

The Shower Lab will not be held responsible for leakages as described where this advice has been ignored.

If you have any further questions, contact The Shower Lab team for full details about our surveying and installation service.

# MEASURING GUIDE \

**IMPORTANT** - *always measure to finished walls after tiling.*  
*All dimensions to be provided in millimetres.*

## FIXED PANELS

Measure the width at the base.  
 Base Dimension X = mm

Measure the height required. (Our standard height is 2000mm, but your screen can be manufactured to be taller or shorter as required).

Height H = mm

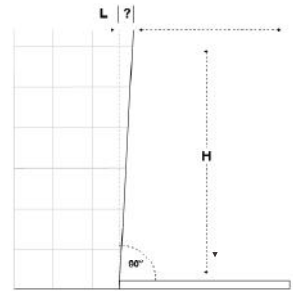

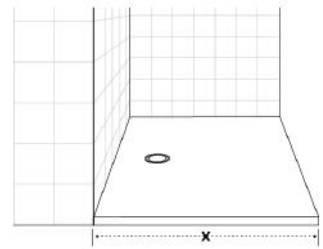

If your walls are not 100% square we need to know. Please provide the following information:

H - Height of Screen = mm

L - Left Hand Wall Leans = mm In/Out

R - Right Hand Wall Leans = mm In/Out

Wall leans In/Out - please delete as appropriate.

## ENCLOSURES

Measure the width of the opening at the base.

Base Dimension X = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

Height H = mm

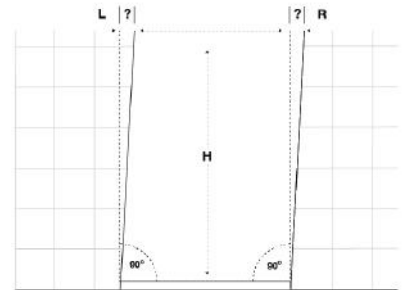

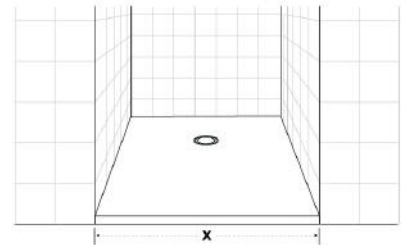

If your walls are not 100% square we need to know. Please provide the following information:

H - Height of Screen = mm

L - Left Hand Wall Leans = mm In/Out

R - Right Hand Wall Leans = mm In/Out mm In/Out

Wall leans In/Out - please delete as appropriate

## CORNER ENCLOSURES

Shower screens must be positioned a minimum of 3mm from the outside edge of the tray but this may vary, if your shower tray has radius edges.

Dimensions provided must be to the outside of the shower screen.

Measure the width at the base.

Base Dimension X = mm

Base Dimension Y = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

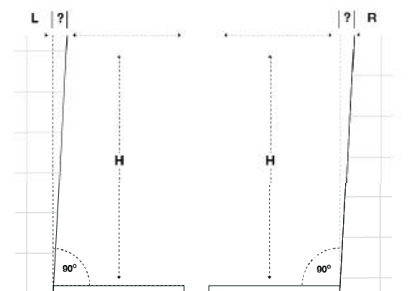

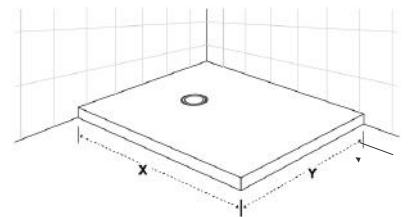

Height H = mm

If your walls are not 100% square we need to know. Please provide the following information:

H - Height of Screen = mm

L - Left Hand Wall Leans = mm In/Out

R - Right Hand Wall Leans = mm In/Out

Wall leans In/Out - please delete as appropriate.

### NEO ANGLE ENCLOSURES

Important note - We are able only able to manufacture Neo angle enclosures with an internal angle of 135° between the fixed panel and door.

Shower screens must be positioned a minimum of 3mm from the outside edge of the tray but this may vary, if your shower tray has radius edges.

Dimensions provided must be to the outside of the shower screen.

Measure the width at the base.

Base Dimensions X = mm

Base Dimensions Y = mm

Base Dimensions Z = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

Height H = mm

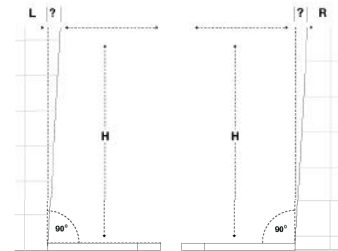

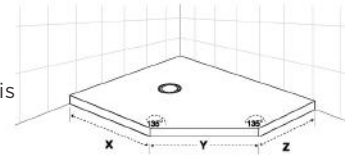

If your walls are not 100% square we need to know. Please provide the following information:

H - Height of Screen = mm

L - Left Hand Wall Leans = mm In/Out

R - Right Hand Wall Leans = mm In/Out

Wall leans In/Out - please delete as appropriate.

### THREE SIDED ENCLOSURES

Shower screens must be positioned a minimum of 3mm from the outside edge of the tray but this may vary, if your shower tray has radius edges.

Dimensions provided must be to the outside of the shower screen.

Base Dimensions X = mm

Base Dimensions Y = mm

Base Dimensions Z = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

Height H = mm

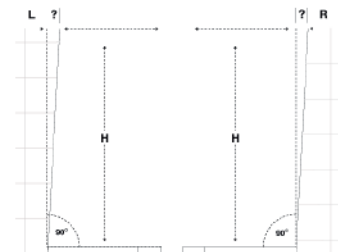

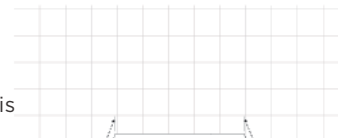

If your walls are not 100% square we need to know. Please provide the following information:

H - Height of Screen = mm In/Out

L - Left Hand Wall Leans = mm In/Out

R - Right Hand Wall Leans = mm In/Out

Wall leans In/Out - please delete as appropriate.

### BATH SCREENS

Measure the width at the base.

Base Dimension X = mm

Measure the height required. (Our standard height is 1500mm but your screen can be manufactured to be taller or shorter as required).

Height H = mm

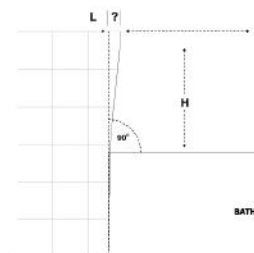

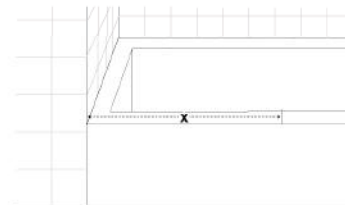

If your walls are not 100% square, we need to know. Please provide the following information:

H - Height of Screen = mm

L - Left Hand Wall Leans = mm In/Out

R - Right Hand Wall Leans = mm In/Out

Wall leans In/Out - please delete as appropriate.

# CARE AND MAINTENANCE \

## HOW TO CARE FOR YOUR SHOWER LAB SPACE

To maintain the beauty of your shower screen and its components, we recommend that both the glass and the components are cleaned after each use to remove excess water. Use a soft, damp cloth to wash down the inside of the glass, using fresh water. A squeegee should also be used after every shower to reduce the risk of streaks and water marks.

Once wiped down, dry your screen and components with a soft micro-fibre cloth. This is the best way to avoid the build-up of limescale or other moisture-related damage.

Do not use scouring pads or steel wool to clean your shower, nor abrasive or acidic products. Over time, this will cause dullness and permanent damage to your glass.

Stubborn water marks on the glass and components can be removed using undiluted washing-up liquid and a soft cloth.

## DEEP CLEANING YOUR SHOWER LAB SPACE

We recommend deep cleaning your shower screen once a month to achieve the best results. Combine a mild detergent with water and use a soft cloth to polish this into the screen. All of The Shower Lab spaces are provided with our Easy Clean Finish, allowing you to return its new shine easily.

## EASY CLEAN FINISH

Our Easy Clean Finish is an application used to make our shower screen glass water repellent. It bonds an invisible, non-stick polymer coating to the glass. This creates an impenetrable barrier against limescale and other forms of water-related build up. All of our shower screens are easy to clean and maintain as a result of this treatment.

Additional care must be taken when cleaning shower screens treated with our Easy Clean Finish. Avoid all abrasive cleaning products as they can cause damage to the polymer coating. This will reduce its effectiveness over time. To clean, simply wipe away excess water after every shower with a soft, damp cloth. Micro-fibre cloths or squeegees can then be used to dry and finish the glass surface, minimising the risk of streaks or water-related marks.

# TEN YEAR GUARANTEE \

The Shower Lab prides itself in the design and manufacture of premium shower spaces. Our 10 year guarantee is provided as standard, to give you peace of mind.

This guarantee is in addition to, and does not affect your statutory rights.

All The Shower Lab components and glass screens are guaranteed for 10 years from the date of purchase. This guarantee stands against manufacturing defects. In addition, our plastic seals are guaranteed for 2 years from the date of purchase. Our Easy Clean Protective Glass Finish is not included in this guarantee as its performance is subject to outside influencers, i.e. the maintenance and care regime of the user and is subject to a reduction in its effectiveness if abrasive cleaning products are used. Contact your local bathroom showroom for the correct care & maintenance information.

We guarantee installations of the shower screen spaces by our certified teams for 2 years from the date of completion.

This 10 year guarantee is only valid in the UK and is only available to the original purchaser (proof of purchase will be required). This guarantee cannot be transferred to a third party.

If a product is deemed to be defective, we will repair or replace any part of the item originally purchased. This shall constitute our sole obligation covered by this guarantee.

This guarantee covers normal domestic use for The Shower Lab spaces that have been installed in accordance with our installation instructions.

Under no circumstances, will we be liable for:

- Any item that has been modified without prior written approval by us.
- Any item that has been subjected to accidental damage, normal wear and tear, wilful neglect or which has failed as a direct result of incorrect maintenance.
- Any compensation payments for consequential losses or any other associated costs unless prior written consent is given by us.

Appropriate care must be taken when cleaning glass that has been treated by the Easy Clean Glass Finish. The use of abrasive cleaners may damage the specialist surface protection.

We reserve the right to change designs, product specification, finishes and materials without prior notice in line with our policy of continual review and improvements.
