Emerald

Decorating the world with ambiance

A morning shimmering in mist. Palm fronds still covered by dewdrops glistening like precious gems. As nature awakens, spicy scents mingle with the sounds of the day. In the sweltering sun, hand-painted fabrics lie drying. East and West meet in the Emerald collection.

Choose the mood that suits you with Emerald. From delicate and dreamy to unpolished and rugged. Imagine yourself in another world with serene silhouettes of tropical branches and exotic blossoms, bathed in a veil of filtered light. Or discover the natural structure of fine, woven bamboo. A bold floral motif on rough canvas, the rustic pattern of textured blocks with a hint of sheen or the distinctive ikat motif will transform your walls into a feast for the eye. The murals also appeal to your imagination. A mountain landscape partially obscured by mist, a flock of cranes rising to greet the sunrise.

All rendered in a refined, delicate palette. From soft powder tints, warm earth tones to elegant emerald green and bewitching night blue. Emerald's luxurious and layered designs will add style to your interior.
