# Personalisation Power

The following guides have been designed to explain the processes involved in the personalisation techniques available for our products throughout the catalogue. For further information please call our sales office.

## Video Guides

To see our personalisation techniques in more detail, why not view our handy video guides on YouTube. Simply scan the code to visit the site.

## PRINTING

Printing is the most popular and cost effective technique and can take the format of pad printing (also known as tampo) or screen printing. Pad or tampo printing involves the use of a pad to apply the ink to the product. Screen printing applies the ink via the use of a stencil placed on a porous material screen.

## ROTARY PRINTING

A type of screen printing in which the product is rolled along the screen so that the print covers the circumference of the product, creating a 'wrap around' print.

## TRANSFER PRINTING

A printed image is applied to thermal paper which is then transferred to the item via a heat process. This technique is ideal for reproducing four colour process logos onto material based product.

## LITHO PRINTING

Litho printing is a method used to print text or artwork onto paper. The required image is etched onto a metal plate and then transferred to a rubber roller. The image is then taken from the roller and applied to the item.

## DIGITAL PRINTING

Produced using ink jet print machinery. The 4 colours, cyan, magenta, yellow and black, are used in different quantities to produce millions of different colours and shades. It is great for printing photos, four colour process images and more detailed logos

## DYE SUBLIMATION

A unique process where solid dyes are turned into gas and then bond with the polymer molecules in a product. Dye-based inks are printed on special sublimation paper, which is then heat-pressed onto a polyester fabric or polymer-coated product. The heat causes the dye to turn into gas and bond with the surface, transferring the image onto the product.

## LABEL/DOMING

Self-adhesive printed label. For doming add an epoxy dome cover made of polyurethane resin; it's durable, tough and long lasting. The label and doming process is often used to achieve four colour process logos and can be more cost effective than other printing methods, as it is the same cost regardless of the number of print colours.

## EMBROIDERY

Stitches one or multi-coloured logos onto material products using a needle and strands of thread or yarn.

## ENGRAVING

A very intricate process which involves carving the logo into the item, producing a permanent form of branding. In most cases engraving is performed by specialist computer guided laser engraving machinery.

## ROTARY ENGRAVING

The principle is much the same as standard engraving but specialist machinery enables the item to be rolled as is it marked, allowing the branding to cover the circumference of the item.

## IRON STAMPING

A heated metal dye is pressed into the surface of the item which leaves behind an impression. The impression is then filled with colour.

## DEBOSSING

Debossing is a technique that leaves an impression of the logo on an item. A heated, metal plate is applied to the surface of the item and when removed it leaves behind a recessed imprint.

## FOIL BLOCKING

Similar to debossing (and using the same machinery), foil blocking leaves an imprint in the item, but the difference is that it can add colour to the impression. The colour is added by putting a colour foil between the dye and the product. The most popular colours to use are silver and gold.

## PVC

PVC (polyvinyl chloride) is a type of plastic which is easy to mould and can be produced in many colours. A bespoke mould is created incorporating a logo in various shapes and designs and is then filled with the liquid PVC and left to set and harden. Set up costs are low, allowing small order runs.

# HELPING UGANDA SCHOOLS

Scan For More Info  
Registered Charity 1098176

Promoting environmental and humanitarian change for the better, the Bilby and Sambourne Sports Bottles (page 149), the Refresh Recycled Ball Pen (page 22), and the A5 Nevus Notebook (page 53) are branded as the “promos that give back.” These items contribute a percentage of every sale directly to HUGS (reg. 1098176) to support impactful projects.

The Bilby and Sambourne Bottles help provide safe water sources for thousands of impoverished children and families in Uganda, reducing the risk of waterborne illnesses. For every bottle sold, 20p is donated to fund sanitation, latrines, and water catchment facilities, ensuring children no longer have to walk long distances for clean water.

The Refresh Recycled Ball Pen helps supply essential stationery to schools in Uganda, with 5p from every pen sold donated to ensure children have the tools they need for a better education and a brighter future.

The A5 Nevus Notebook also makes a difference, with 10p from each sale supporting HUGS projects that focus on education and community development initiatives for those in need.

# Seashell

SEASHELLTRUST.ORG.UK

For every Seashell Pen sold, 5p goes to the Seashell Trust, a charity supporting children and young adults with complex needs through education, care, and therapy. Made from recycled ABS plastic and repurposed shell waste, this pen reuses materials whilst supporting a meaningful cause.

# Logo Key

You will find products throughout this catalogue that refer to recycled, organic or ocean destined materials, Check out the information below to learn more about each of them.

## Recycled Materials

Using recycled materials for promotional merchandise is a smart and efficient way to create high-quality products whilst reducing waste. By repurposing materials like plastic, paper, and textiles, these products give new life to existing resources.

## Organic Materials

Incorporating organic materials into promotional merchandise is a great way to create high-quality products. Materials like organic cotton, bamboo, and jute are grown without synthetic chemicals or pesticides, making them better for both people and the environment.

## Ocean Destined Plastic

Ocean Destined Plastic is recycled plastic from a certified Ocean-bound plastic source. Abandoned plastic waste is collected from coastal shores or waterways before they can enter the ocean, helping to reduce plastic waste. Using these materials for promotional products not only supports cleaner oceans but also creates reusable, high quality items.

# The Magic of Dye-Sub Mugs

Transform ordinary mugs into eye-catching, personalised keepsakes with dye-sublimation branding! This advanced printing technique uses heat and pressure to transfer vibrant, full colour designs directly into the surface of the mug. Unlike traditional printing methods, dye-sublimation produces a smooth, durable finish that won't fade, peel, or crack over time.

Our range of dye-sub mugs features a patented ORCA® coating, the highest level of sublimation coating available! This innovative technology will protect your full colour design for up to 3,500 dishwasher cycles, ensuring long-lasting vibrancy and durability.

Perfect for showcasing logos, artwork, or custom messages, these mugs are an excellent choice for corporate gifts or promotional giveaways. With unlimited colour options and photo-quality detail, your designs will truly stand out, leaving a lasting impression with every sip.

5.1 Orders are accepted subject to our right to adjust prices quoted to take account of any changes in the law or government regulations requiring us to increase prices by way of direct taxation, import duties, custom and excise duties or otherwise. The prices are based on today's current costs of production and in the event of increase in wages or costs of materials to us occurring after the confirmation or accepted contract, we shall be entitled to charge such increases to you.

5.2 To ensure accuracy all orders must be confirmed by fax or post or email. Telephone orders cannot be processed until written confirmation has been received.
