WEATHER MAX BIAS BINDING

3/4 Double-fold

Price = \$.82 / yard roll
\$.88 / yard cut

- Colors that match Weather Max fabrics
- Excellent color retention and weather ability
- Double fold edge gives a finished and attractive look
- Approximately 100 yard spools

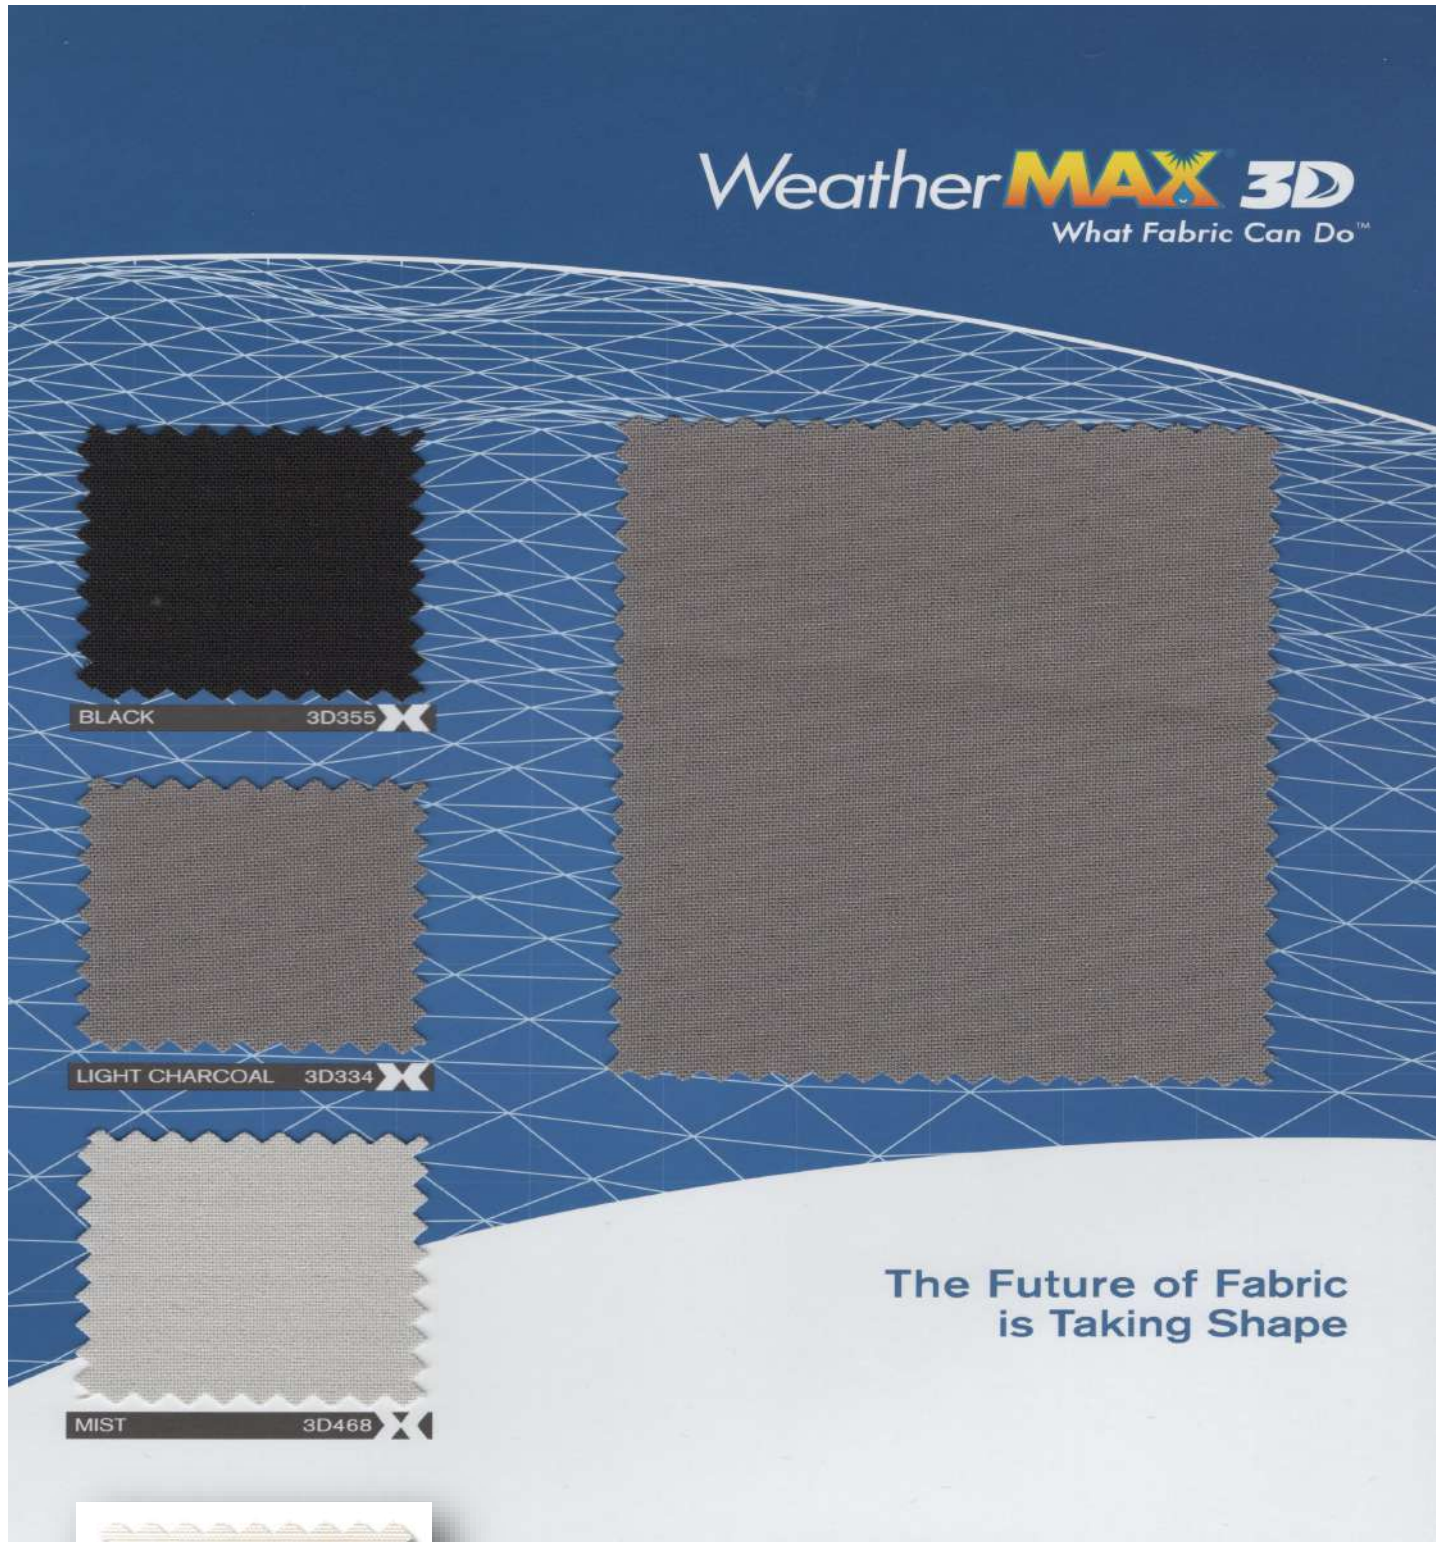

WEATHER MAX 3D

WeatherMAX 3D is the newest addition to Safety Components' outdoor fabric line. WeatherMAX 3D utilizes the same fiber that has enabled other WeatherMAX fabrics to be durable and long-term UV and fade resistant. However, the unique construction of WeatherMAX 3D produces high levels of elasticity. Marine fabrics in general are inherently dimensionally stable and only move on two axes, which can cause significant problems in fitting difficult patterns or forms. WeatherMAX 3D offers flexibility in three dimensions to fit anything and to take its form. Under tension WeatherMAX 3D stretches 30% to 100% and when tension is released it goes back to its original size.

WeatherMAX 3D offers UV protection, water resistance, breathability and will form to fit any outdoor canvas desire. It is soft and pliable, yet it is nearly impossible to tear. Ideal for yacht sun shades, protective engine or seat covers or any application requiring outdoor durability and elasticity.

PURE WHITE

ADVANCED TOP AND ENCLOSURE FABRIC
US MADE / 10-YEAR WARRANTY

IDEAL FOR RIGID OR SOFT ENCLOSURES, T-TOPS, OR OTHER PERMANENT OR SEMI-PERMANENT INSTALLATIONS

- INCREDIBLY STRONG AND DURABLE
- EXCELLENT WELDABILITY
- RESISTANT TO MILDEW AND MOLD
- REMAINS SOFT AND PLIABLE – NO CRACKING OR FLAKING
- HIGHLY RESISTANT TO PROLONGED EXPOSURE TO SALTWATER, UV, AND HEAT

SAFETY COMPONENTS

800-896-6926 ext 16 | www.breakwaterx.com

BreakWater X™ is a trademark of Safety Components Fabric Technologies, Inc.

BreakWater X™ is covered by a 10 year limited warranty.

Proudly distributed by

Performance Textiles

BreakWater X™ is an advanced alloy-coated fabric built to withstand the harshest environments. Traditional PVC fabrics rely on plasticizers to make the PVC soft and flexible. Over time, these plasticizers migrate to the surface and are lost through evaporation or extraction resulting in ever-stiffer PVC that is prone to cracking and flaking. BreakWater X's™ advanced alloy does not rely on plasticizers and therefore maintains a soft hand regardless of age or exposure.

WEATHER MAX SG

WEATHER MAX SG

WeatherMAX SG (Surface Guard) is the latest addition to Safety Components' outdoor fabric line. WeatherMAX SG starts with the worldwide proven performance and durability of solution-dyed WeatherMAX 80 with an added soft backing to provide an extra level of scratch and scuff resistance for highend surfaces.

Most soft-backed outdoor fabrics use an inexpensive needle-punch polyester, which creates a felt-like soft backing but also collects and holds dirt and contaminants that can cause scratching. These low-cost backings also absorb and hold water, creating a multitude of issues. WeatherMAX SG uses a flannel-like backing. While it is more expensive, it is less bulky and does not entangle contaminants like a needle-punched polyester.

VELCRYLIC

VELCRYLIC Velvet

- The only velvet made with 100% ACRYLIC fiber with a 6 year non fade warranty.
- Great for boat FENDERS and OUTDOOR UPHOLSTRY.
- As opposed to towelling, Velvet has open polar fibres where sand and salt cannot settle. Similar to animal coats the velvet like surface is highly dirt-resistance
- (self-cleaning-effect). This advantage is enhanced by our special water- and dirt-repellent treatment. Because of the velvet surface the underside is protected and makes this fabric the most resistant to wear and tear.
- At the quality Velvet the loops are sheared. Similar to animal skin dirt can not grip and gives it a Self-cleaning effect!

SPACERFLEX

SPACERFLEX® INNOVATIVE BEDDING SYSTEM FOR BOAT AND RECREATIONAL VEHICLES.

Most often , cabins inside boats offer poor comfort over extended use. The reason for this is that the sleeping area is defined by random-shaped free space left by furniture and that cushions and mattresses rest directly on plywood, over boat storage. Therefore cabin beds consist most of the time in a foam cushion designed for sitting rather than sleeping. Placed under the mattress, already shaped to your available space, SPACERFLEX allows you to find a comfort comparable to bedding systems at home at a 10th of the cost.

STRATAGLASS™
STRATAGLASS

The Future in Clear Vinyl Boat Curtains

54 X 111 sheets

Introduced in 1994, Strataglass™ is a premium, flexible (it rolls up!) coated vinyl sheet engineered to resist the damaging effects from the sun's rays, environmental fallout, and scratching from handling. It also blocks out 100% of the spectrum of UV light. Today, **Strataglass** is the stable of virtually every quality canvas manufacturer.

GLASS CLEANING KIT

NOW AVAILABLE: CLEAR VINYL CLEANING KITS

Use the **Easy 1-2-3** steps to keep your Continental press polished vinyl in tip-top shape. The new cleaning kits offer simple solutions to **Clean**, **Protect** and **Preserve** flexible clear windows throughout the year - whether the weather is good or bad in your neck of the woods!

CLEAN

Caring for your Automotive, Marine or Commercial clear flexible windows and enclosures begins with **CLEAN**. It is formulated as a non-detergent, non-abrasive true soap. It will not remove previously applied polish or wax. It's non-streaking, non-spotting formulation rinses clear with reduced drying time.

PROTECT

Cleans, shines, and protects Automotive, Marine or Commercial clear flexible windows safely and effectively. With UV protection to enhance flexibility and an anti-static formulation to help repel dirt from the surface, this product can be used daily, removing fingerprints and other contamination to keep clear flexible windows shining like new.

PRESERVE

Formulated to safely clean, polish and protect your Automotive, Marine or Commercial clear flexible windows. This polymer product molecularly bonds to the surface creating a nearly invincible protective barrier against the damaging effects of marine environment pollutants.

COMBO KIT with 4oz CLEAN, PROTECT & PRESERVE

Great to give to a customer at the completion of a big enclosure job.

WeatherMAX[®]

WEATHER AND UV RESISTANT SEWING THREAD

We are proud to introduce A&E WeatherMAX[®] sewing thread, a durable, professional grade sewing thread that provides ultimate outdoor weather and Ultra-Violet resistance. A&E WeatherMAX[®] sewing thread combines WeatherMAX's patented outdoor performance yarn technology with A&E's expertise in producing highly-engineered premium sewing thread.

Featuring ColorTite[®] technology, A&E WeatherMAX[®] sewing thread yields long-lasting color fastness that does not fade or transfer. This developmental culmination delivers a superior sewing thread ideal for the most demanding outdoor applications.

Bobbins are available to complete your sewing package.

BLACK & WHITE

BENEFITS

UV AND WEATHER RESISTANT TECHNOLOGY — Features ultraviolet light resistance technology that reduces strength degradation over traditional filament polyesters, while delivering additional water and weather repellency.

HIGH PERFORMANCE SEAMS — Delivers outstanding sewing efficiency with fewer sewing interruptions and excellent ply security for high performance seams against other product types.

BEAUTIFUL COLOR, LONGER — Offered in official fabric colors, WeatherMAX[®] thread features ColorTite[®] technology. 100% pigment, solution dyed, this product's color resists loss through fading, is bleach cleanable, and does not transfer.

HIGHLIGHTED USES

- Outdoor Applications
- Marine
- Awnings
- Shade Sails
- Patio Furnishings
- Pool Coverings
- Tents
- Umbrellas

SUN FLY™ SHADE FABRIC

WEATHER MAX 3D

69" Wide 86% Shade Factor

Price = \$ 11.25 / yard roll

Price = \$ 11.75 / yard cut

WeatherMAX 3D is the newest addition to Safety Components' outdoor fabric line. WeatherMAX 3D utilizes the same fiber that has enabled other WeatherMAX fabrics to be durable and long-term UV and fade resistant. However, the unique construction of WeatherMAX 3D produces high levels of elasticity. Marine fabrics in general are inherently dimensionally stable and only move on two axes, which can cause significant problems in fitting difficult patterns or forms. WeatherMAX 3D offers flexibility in three dimensions to fit anything and to take its form. Under tension WeatherMAX 3D stretches 30% to 100% and when tension is released it goes back to its original size.

durability and elasticity.

CAF COMP STUD

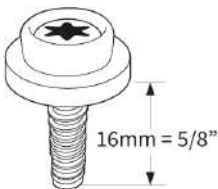

Imagine: a screw stud on deck of your beautiful boat used to fix a cover being 100% corrosion free and that blends away in the deck color.

A final farewell to those annoying eye-catching points that stand out of the smooth design lines, even if they are not corroded. Designers love to have the beautiful lines and shapes of their product not being disrupted by those inevitable points to hold cushions, blinds, carpets or covers down on deck. While it entails the exact same and quick installation as a normal screw stud. A unique formula of smart design and high quality materials make it possible to have a composite self-tapping screw stud for use in fiber glass, wood and other composites.

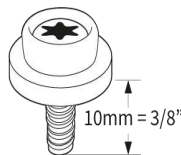

Matching any snap

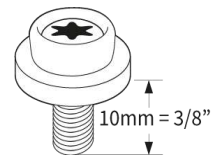

The stud is the lower part of a snap or ring-spring press fastener system. CAF-COMPO screw-stud will fit any regular (24-line) ring spring socket, no matter the supplier (meeting Mil Spec 10884 (MS27980 Style 2). Even the plastic sockets fit. It comes in a few white variants, light grey and black, or any color you like to be made custom. A version with a metric thread makes it possible to solve the corrosion issue on any aluminum surface, like window-frames, since it is not suitable for self-tapping in aluminum or steel.

BIMINI ENCLOSURE FABRICATION

By Mark Hood

Mark and Deb Hood have been fabricating marine canvas for over 40 years and teaching marine canvas for the last 10 years. This book will be a valuable asset to those that want to get into the marine canvas trade or make their own boat canvas with step-by-step instructions on fabricating a bimini with an enclosure. With inside professional knowledge of quality fabrication techniques in photographic step-by-step instruction, this book is hard to come by. Over 170 photos and 8 illustrations clarify essential details. This book is spiral bound to lay flat with water resistant front and back covers and includes a bonus section on fabricating smile windows.
