# ABOUT US

Maharani Global is a fast-growing agro-based company established in 2025, dedicated to delivering premium quality cow dung powder and natural cow-based products to domestic and international markets. Built on the foundation of sustainability, purity, and traditional agricultural wisdom, the company focuses on providing eco-friendly solutions that support organic farming and green living worldwide. We strongly believe in preserving India's rich agricultural heritage while meeting the growing global demand for natural and sustainable products. Our cow dung powder and cow-based offerings are carefully prepared using traditional methods combined with modern quality standards, ensuring maximum purity, effectiveness, and consistency. Each product goes through strict quality checks to maintain natural nutrients and eco-friendly properties.

We work closely with local farmers and gaushalas, empowering rural communities and promoting ethical sourcing practices. By supporting traditional farming ecosystems, we help create a positive impact on livelihoods while encouraging chemical-free agriculture. Our products are widely used in organic farming, natural pest control, composting, religious rituals, and eco-conscious lifestyles.
