Founder & Chairman of BSF Smart Farm Tran Minh Nhat (MBA) | Mr. Nicks Tran

“ Dear Customers, Partners & Friends!!!

“It’s no use preaching to a hungry man” has been considered as the ultimate “truth” because without food, our body will not have enough nutrients and energy to work, create & conquer. Achieve great goals in life.

In addition, if monetary security, economic security, politics ... play an important role, then “food security” is especially important when it determines the prosperity of countries around the world in general & Vietnam in particular.

On the other hand, with the rapid development of human civilization, people pay much attention to health & improving the quality of life. Eating not only achieves the purpose of satiety, but also towards higher culinary needs: delicious, clean, nutritious & absolutely safe for health.

In order to meet the increasing demand for “cuisine” of the majority of people, the source of “input”, “the root”, ie food from livestock, plants or vegetables, etc. must be carefully selected from seeds to high-tech farming, completely organic, pollution-free & contain no harmful substances; must ensure high quality & nutritional value.

...

However, how to contribute to the realization of the above long-term goals & vision? I have been searching for a solution to this problem non-stop. It is really fortunate that I know an insect species, which is considered a “treasure” from Mother Nature to mankind, named Black Soldier Fly (BSF) or Worm Calcium.

Since discovering the “treasure” of Black Soldier Fly (BSF), my team and I including experts in the livestock industry, cultivation & biotechnology have carried out experimental farming, breeding & production “super ingredient” from Black Soldier Fly (BSF) to create many high-quality product lines rich in fat, protein, vitamins & minerals used as feed in livestock, poultry, aquaculture, and cultivation.

Since then, BSF Smart Farm Joint Stock Company was born, with the goal & vision of applying biotechnology (biotech); equipping with high-tech machinery & equipment to research & produce many lines of outstanding quality products dedicated to cultivation & breeding, indirectly improving resistance, improving physical fitness, health & well-being life expectancy of people in Vietnam, people in the world.

Join us to discover the “panacea” of the Black Soldier Fly (BSF) that Mother Nature offers, as well as our journey to the top of glory.

Best regards!!! ””

Founder & Chairman of BSF Smart Farm
Tran Minh Nhat (MBA) | Mr. Nicks Tran

Mission

1. Bringing modern science & technology into producing to create high quality product lines serving in agriculture, cultivation & animal husbandry.
2. Helping millions of families proactively source clean food to protect the health of the whole family & community.
3. Contributing to improving the green & clean environment through the process of treating organic waste from non-harmful insects: Black Soldier Fly (BSF).

Vision

Become a leading corporation in Vietnam & Southeast Asia in terms of:

1. Researching & Developing (R&D) Biotechnology (biotech) applied in Agriculture (cultivation, animal husbandry & aquaculture).
2. Chain of high-tech factories to create organic fertilizers, micro-organic fertilizers, aquaculture, animal feeds & food for pets.

THE 5 IMPORTANT GOALS OF BSF SMART FARM

1

Research & Development (R&D)

Turning science into practice. All of our products are researched & tested (R&D) before being put into producing.

2

Manufacturing

"Practice makes perfect".

The team always ensures the quality of manufacturing to bring trust to customers.

3

Technical

Since its establishment in 2019, BSF Smart Farm has always been aware of the process, equipment, producing techniques & product quality management. So far, the system is stable & scales confidently.

4

Business Development

With a vision of "covering" the whole country & developing to countries in the region. The sales team is ready to "set sail" & collaborate.

5

International Cooperation

Learning, exchanging experiences, international cooperation for mutual development & added value is the "ultimate goal" of BSF Smart Farm.

With a clear mission, vision, and a professional & skilled team. BSF Smart Farm is capable of researching & producing many lines of high quality biotechnology products to serve the people's health around the world. BSF Smart Farm is ready for international expansion.

FACILITIES & EQUIPMENTS

Headquarters: Eximland Building, 3rd floor, No. 179E-F, CMT8, Ward 5, District 3, Ho Chi Minh City, Viet Nam.

Branch 1: Tran Cong Tuong Street, Ward 5, Go Cong Town, Tien Giang Province, Vietnam.

Branch 2 & Factory: DH26 Street, Long Hoa Hamlet, Quon Long Commune, Cho Gao District, Tien Giang Province, Vietnam.

Facilities & Equipments

Science & technology are likened to "silent warriors", making great contributions to the economy in general & businesses in particular.

BSF Smart Farm is no exception, in addition to raising & producing hydrolysates, nitrogen solutions, fertilizers, etc. extracted from Black Soldier Fly (BSF), we also focus on research & development of biotechnology to create high quality biological & microbiological products used in farming, livestock & aquaculture. That's why the BSF Biotech R&D Center was born (See more: <https://bsfbiotechcenter.org>).

BSF Biotech Center belongs to BSF Smart Farm Joint Stock Company & is sponsored by BIO NANO MQA Research Institute in Ho Chi Minh Cit, by Dr. Moc Que - World Record holds the position of President and Advisor (See more: <http://bionanomqa.org>).

BSF Biotech Center has an office located at Eximland Building, 3rd floor, No. 179EF, CMT8, Ward 5, District 3, Ho Chi Minh city, Viet Nam.

Besides, BSF Biotech Center also invested in a laboratory, located at *Ward 5, Go Cong Town, Tien Giang Province, Viet Nam*. A spacious location, with many modern equipments for researching & making many exclusive formulas & probiotics not only for BSF Smart Farm but also for other businesses & organizations have needs, as well as cooperate for mutual development.

Stay connected & update our regular research activities through communication channels, social networks.

Welcoming partners from Korea - VANDALSOFT

Vandalsoft is an IT Startup enterprise specializing in developing a Smart Farm system for insect farming combining IoT technology. Through the meeting, Vandalsoft & BSF Smart Farm shared a lot of experience in the field of raising Black Soldier Fly, promoting long-term business cooperation in the future.

Welcoming partners from Japan - JICA

JICA - Japan International Cooperation Agency, is the only agency implementing ODA aid from the Japanese Government for socio-economic development in developing countries. JICA highly appreciates the smart farm model of BSF Smart Farm, thereby building a process for long-term cooperation in the future.

Welcoming the wives of the Lao Delegation to Vietnam.

BSF Smart Farm is honored to welcome the wives of the Lao Delegation to Vietnam, and sign a Trade Agreement between Indochina Holdings (Strategic Partner of BSF Smart Farm) and the Lao Crop Department.

EPILOGUE

"Every journey of a thousand miles must begin with the first step." Over 3 years of experience, BSF Smart Farm has proven its position in the field of producing high quality product lines (extracted from "super" ingredients of Black Soldier Flies - BSF), serving in the Agriculture (crop, livestock & aquaculture) industry, as well as towards the Biotechnology (Biotech) industry to create many "super products" for human consumption.

We always welcome (1) Domestic & Foreign Investment & Development Fund to invest capital into our high-tech factories (2) Investors who are interested in the Biotechnology Industry for cooperation & development (3) Business developers to spread high-tech products to users (4) Farmers who want to learn, improve knowledge, increase income (5) Students of Agriculture industry, biotechnology, etc. to visit, practice & experience.

Best regards!!!
