

RHINO PLY & RHINO PLY PREMIUM 2025

NOVER

RHINO PLY PREMIUM

Rhino Ply Premium is a long lasting durable plywood bonded using a WBP phenolic glue. WBP phenolic glue or “Water Boil Proof” provides a type A glue bond providing high moisture resistant performance.

Rhino Ply Premium

FEATURES & BENEFITS

Phenolic glue provides very good water resistance and light-coloured glue line. Generally, A-bond plywood is best used in situations of limited weather exposure (Examples: exterior door skins, marine plywood, and concrete form-work).

Plywood bonded using WBP phenolic glue can be used in damp or wet places but will not last long under constant direct rain. We recommend edging Rhino Premium on all sides using a PUR adhesive to provide additional protection against moisture.

Rhino Premium has a much higher moisture / weather resistance to standard Rhino however we do not recommend or warrant complete exposure to the elements.

Rhino Ply is produced “Run of the Mill” and most plywood substrates show see through. We do not recommend Rhino Ply Premium to be used as face material or where the aesthetic appearance of the panel is critical. Rhino Premium is not designed for external use exposed to constant weather.

- White, Black & Charcoal
- High Pressure Laminate bonded both sides
- Plywood species: Poplar
- 2440MM X 1220MM
- Thickness +/-0.5MM
- Black & Charcoal include protective film on both sides
- Superior carcass construction
- WBP A Bond Phenolic Glue
- E0 Formaldehyde
- Textured finish
- Source: FSC Certified plywood factory based in China

DESCRIPTION	CODE
2440MM X 1220MM X 16MM WBP WHITE TEXTURE	120100
2440MM X 1220MM X 17MM WBP BLACK TEXTURE	120102
2440MM X 1220MM X 17MM WBP CHARCOAL TEXTURE	120108

RHINO PLY

Rhino Ply is a long lasting and durable plywood that is bonded with EO glue.

The bonded surface of Rhino Ply is made from sheets of high pressure laminate, which are hard wearing, moisture resistant, stain resistant and easy to clean. Cabinetry such as kitchen, laundry, wardrobe and vanity carcasses made from Rhino Ply, are incredibly durable, rigid and strong.

Rhino Ply White & Black

FEATURES & BENEFITS

Benefits: Rhino Ply is a 9 ply construction, providing superior stability and durability. Kitchens will continue to hold their shape and will look great for years to come. The high pressure laminated surface is hard wearing and easily cleaned.

Uses: Superior carcass construction. Use in areas where moisture is present such as kitchens, vanities & laundry units.

Limitations: Plywood is harder wearing on tooling compared to other substrate materials such as MDF and particleboard. The plywood is not designed for exterior use. We recommend all sides are edged to improve moisture resistance.

Rhino Ply is produced "Run of the Mill" and most plywood substrates show see through. We do not recommend Rhino Ply to be used as face material or where the aesthetic appearance of the panel is critical.
