DIGITAL CALIPERS

FEATURES:

- Resolution: 0.01mm/0.0005"
- Accuracy: ±0.03mm
- Buttons: on/off, zero, mm/inch
- Automatic power off, move the digital unit to turn on power
- USB data output
- Meets DIN862
- Made of stainless steel

The Roscamat Tiger is our best-selling model due to:

- A large working envelope that suits the majority of customer requirements.
- A well-specified machine with multiple optional features available to tailor the solution to your application.
- An extensive tapping range from M2 to M27, covering most workshop needs.

*Smaller and larger Roscamat models are available to ensure the perfect fit.
Reach out to your Account Manager to find the solution tailored to you.*

CERAMIC EDGE FINDER NON-MAGNETIC

Mechanical - Hardened ground and lapped to close tolerances, the edge finder is placed in a chuck and the work table is then traversed to make contact between the rotating edge finder and the work. Contact will shift to a concentric position relative to the body and with very slight additional movement this will move off centre with a decided wobble. At this point the centre of the finder is exactly one-half the diameter of the contact from the work edge. Accuracy 0.01mm.

Haff & Schneider
1956

3D TASTER TOUCH PROBE

Alignment and positioning in all three axis.
