TAKE A WALK Collection

"We should move cities to the countryside," a writer from the Belle Époque said humorously. What if, instead, we moved the forest into our offices?

Located in the heart of the Berry countryside, surrounded by forests whose colours change with the seasons, Balsan's designers were inspired by their bucolic environment. Through the new **Take a Walk office carpet** collection, they share with you the emotions that this welcoming, soothing and invigorating nature provides. An invitation to take a walk in the forest... And a great feeling of oxygen in your offices.

The texture of the Take a Walk textile floors seems to have been formed day after day, like forest paths under the feet of walkers. We see clouds of moss, residues of leaves and plants, shadow plays of undergrowth that give **the floor its organic and irregular effect** . The colors, naturally, evoke **plant nuances** : browns of earth and bark, multiple greens, autumn colors, frosted blue grays... All that is missing are the scents of humus and the song of birds.

The Take a Walk designer carpet collection is available **in tiles and comes in 20 colours** , to be laid in monochrome or multi-coloured to broaden the spectrum of shades. In bright tertiary spaces, create a feeling of continuity between the exterior and the interior and create serene atmospheres for relaxation and coworking spaces.

This collection is also available in **a 4-meter wide roll version: Take a Walk Roll, which comes in 12 colors.**
