Join us as at the 2025 International Clinical & Scientific Congress for Restorative Reproductive Medicine

Dear Friends and Partners,

It is my great honour and privilege to invite you to the 21st International Clinical & Scientific Congress for Restorative Reproductive Medicine, held this year in the vibrant and historic city of Zagreb, 26-27 September 2025.

Our annual congress brings together a dedicated global community of physicians, researchers, and allied healthcare professionals committed to advancing innovation in restorative reproductive medicine (RRM) and comprehensive reproductive healthcare. With a focus on identifying and addressing the root causes of reproductive dysfunction, RRM takes a person-centered approach to both male and female reproductive health. This includes addressing infertility in both men and women, as well as diagnosing and treating conditions that affect women's reproductive health, including endometriosis, PMS, and PCOS.

With 20 hours over two days, and seven unopposed hours, you'll have the opportunity to connect with hundreds of clinicians and healthcare professionals as they gather over these days of learning, discussion, and collaboration. We value evidence-based medicine and integrative solutions—including advancements being seen in femtech, investigative and at home testing, pharmaceuticals, and integrative medicine—that prioritize reproductive health and overall well-being. As a sponsor, you're able to present your brand to medical professionals, and raise awareness of your business or organization. I also encourage each of you to engage fully, share your insights, and embrace the opportunities to innovate and connect during the Congress or social events.

We offer several sponsorship and exhibitor packages to help you connect with our audience before, during and after the event —both in person to Congress delegates and through our extended digital marketing platform, which reaches thousands more clinicians and allied health professionals.

This package outlines the sponsorship and exhibition opportunities available at this year's 21st Annual RRM Congress and provides some background about our organization and mission. If aligning your brand or organisation with a forward-thinking community of medical professionals dedicated to reproductive and women's health aligns with your goals, we would be delighted to explore the ideal fit for you.

Best Regards,

Tracey Parnell, M.D., MRM.

Our Audience & Membership

The IIRRM Congress brings together physicians, healthcare practitioners, and researchers from around the world. The largest proportion of in-person attendees are physicians, including family physicians, OB/GYNs, and specialists in related reproductive health related fields.

2024 Congress: Vancouver, Canada

2023 Congress - Lisbon, Portugal

- Clinicians
- Allied Healthcare
- Students/Residents
- Other (researchers, stakeholders, etc.)

Although physicians make up our largest proportion of attendees, RRM care benefits from a multidisciplinary model also attracting a diverse range of allied healthcare providers such as nurse practitioners, physician assistants, nurses, and fertility practitioners/teachers.

What is Restorative Reproductive Medicine (RRM)?

RRM is a medical discipline dedicated to identifying and treating the root causes of reproductive health issues, with the goal of restoring and optimizing patient health. Rather than suppressing or bypassing problems, RRM clinicians collaborate with patients, utilizing fertility or cycle charting to enable precisely timed testing and treatment.

The field of RRM is gaining increasing recognition for its contributions to healthcare and research—not only as a proven and effective approach to fertility treatment but also for its role in improving both women's and men's overall health, and lower cost of care when compared to IVF.

IIRRM

What is the International Institute for Restorative Reproductive Medicine (IIRRM)?

IIRRM is the only international institute uniting RRM healthcare providers and researchers who share a commitment to providing scientifically based, well-researched reproductive healthcare that cooperates with and restores reproductive function.

In addition to offering regular continuing education and courses, IIRRM recently launched the *Journal of Restorative Reproductive Medicine* (RRMJournal.org), a peer-reviewed, open-access scientific journal. The institute also hosts the *STORRM project*, an international registry tracking RRM treatments and outcomes.

Founded in 2000, IIRRM is a registered international Charitable Incorporated Organization (CIO) and institute based in London, UK

What is the International Clinical & Scientific Congress for Restorative Reproductive Medicine (RRM Congress)?

The RRM Congress is a two-day conference preceded by two days of pre-conference courses and meetings, bringing together medical professionals, researchers, and students to stay current with the latest published findings and clinical advancements in restorative reproductive medicine.

These four days of education and networking offer both foundational learning and advanced updates for those already practicing in the field. The meetings also provide valuable opportunities for professional connections, growth and collaboration.

Exhibit & Connect at the RRM Congress!

Exhibiting at the RRM Congress is a unique opportunity to showcase your latest technology, products, programs, and services to a highly targeted audience. The RRM Congress connects reproductive health-focused companies, as well as for-profit and nonprofit organizations, with medical professionals dedicated to advancing restorative reproductive medicine.

As an exhibitor, you will have direct access to a concentrated group of RRM clinicians who are actively seeking innovative solutions and services. This is your chance to engage with them all in one place—at the most cost-effective rate possible. Your sponsorship not only supports our mission but also helps drive progress in reproductive medicine and women's healthcare.

IMPORTANT: Exhibiting is available on a first-come, first-served basis.
