BENCHTOPS

Value Management Option

The Beauty and Realism

of solid surfaces without any of the weaknesses

Engineered stone has become a popular choice for kitchens and bathrooms. However, the dangers associated with the manufacturing of engineered stone benchtops continues to be a hot media topic in our Industry.

Dust from the material can be deadly, and prolonged exposure to the dust produced by engineered stone when it's cut, sanded, ground or polished has been linked to the incurable and lung disease silicosis.

At Bench Top City, we take Safety and our responsibility very seriously especially towards all of our employees, the society in which we operate, and the environment that forms the basis of our existence.

A safe and cost-effective alternative to Engineered Stone.

Duropal High Pressure Laminate Prefinished Benchtops provide the following benefits :

- Silica Free
