EDITOR'S NOTE

Hi Avocadians

We hope you have had a great month, we know many of you have been busy in the Avocado community, joining tournaments and winning prizes, as well as studying for mid-term exams. Avocado wishes everyone within the community the best of luck, and hopes that those who are studying receive their desired results. We are also busy at Avocado as we continue to bring our

Avocadians exciting new scholarship programs and valuable prizes from the our partner games.

Enjoy another action-packed edition of your community newsletter!

Happy reading :)

- AG.Melzzie
Lead Editor

ON THE COVER

Lots of exciting features this month as many of our community members met up in Manila for an Avocado meet and greet. You can find out more about the transition from AVP to AXP questing and how to use the tokens in the Avo-mart. We have a fantastic new scholarship opportunity on page 7, and much more!

AVOCADO: LIVE ON TWITCH

Join AG. Cello, one of our star scholars, as he streams live on Twitch each week! Tune in to follow him as he tackles different games and offers tips and tricks in a fun and humorous way. He streams Gas Fee Game Nights, NFT games, and some fun non-NFT games with Friends. You can tune into our official channel at 7 PM PHT, every Monday, Wednesday, and Friday to catch some great fun and exciting content.

AVOCADIAN SCOOP

by: AG.Melzzie

A fun-filled meet and greet in Manila, Philippines

Wow, what an event! Firstly, Avocado would like to thank everyone who attended our meet & greet event in Manila, Philippines on the 26th of October. It was fun to meet new and existing Avocadians who participated in the event.

Many of our scholars traveled from far and wide to attend and meet and spend time with Avocado's co-founder, Brendan, and their fellow Avocadians. With a vibrant atmosphere, the evening was a huge success. We hosted a bunch of exciting activities alongside our partners DG. Pals. Attendees also had the opportunity to be the first to play DG. Pals' eagerly awaited board game which was lots of fun!

Our role is to support our scholars and we are grateful to our Avocadians in the Philippines for their ongoing support. We are really excited about continuing to navigate this space together as we continue to bring education on new technology and opportunities to further improve the lives of all community.

WHAT ELSE IS NEW?

PARTNERSHIP WITH RETA WARS!

Avocado is excited to partner with Reta Wars, a strategic multiplayer NFT game. This war-themed game is based on the clash of two nations that were once in allegiance. Whilst this is not a fast-paced action game for the quick-fingered, it requires strategic decision-making and tactical gameplay in the face of conditions of simulated warfare. Players will need to work as a team to receive rewards based on their performance. The game is currently being tested by some of our scholars.

AVOCADO DAO PARTNERS WITH GAMESWIFT

Providing one account - one set of gaming credentials, Avocado DAO has partnered with GameSwift, a project building an ecosystem set to revolutionize web3 gaming. The GameSwift Platform and ID provide a one-stop solution for gamers to consolidate their credentials, NFT assets, scores, and achievements in one place. This will be a great option for our players to keep track of their achievements across different games. It is also a useful tool for the guild to obtain data across scholarships.

WHAT'S BEEN HAPPENING IN THE COMMUNITY

During the month of October, we hosted some great AMAs and giveaways for our Avocadians

We kicked off the month with a live Twitter space with Mighty Bears who will be releasing their first web3 title, Mighty Action Heroes. There were 5 whitelist spots up for grabs and they shared tons of great info on their PFP drop and their new project, project 1337, which you can find out more about in our Mighty Bears medium post. We were also joined by Cradles for an AMA about their upcoming pre-alpha, how to participate in the October Quest, and more. They also gave away \$250 and pre-alpha access to the Avocadian community. James, our partnership lead, joined Formless, KryptoKings, and other guests in a live Twitter space to discuss blockchain gaming adoption.

We had some great giveaways for our community: Our partner game, Blocklords, gave scholars a chance to win 1 of the 15 silver chests and Derbystars offered 15 Random boxes to giveaway.

COMMUNITY PHOTOS - EXCLUSIVE!

by: AG.Skyy

A friendship built within the web3 & GameFi Environment.

When AG. Blink said he was visiting the Philippines we seized the opportunity to meet in person. After working with AG. Blink for more than a year now, we finally met each other. Me (AG.Sky) and (AG.Mins) Mins, the Avocadian Aces, have been working together under AG. Blink's lead since Avocado DAO started. From helping our fellow Avocadians and interviewing future Avocadians, I believe this is the core of our relationship as mods and leaders and since then, never in my life have I imagined that I would be able to meet one of the mods that we all look up to! The time that we have spent working with Avocado has been fun and easy as we always have each other's back. I think this is one of the things that the community should see that the mods and management teams are very approachable, appreciative, and care about their people. I would like to take this opportunity to thank AG. Blink for being our go-to person for almost everything and for giving us his 100% best to support us! He is so much appreciated and we, the Aces and Avonauts love him!

Photo taken at SM Mall Of Asia, Pasay, Philippines with AG.Blink, AG. Sky and AG. Mins (from left to right)

TEAM SPOTLIGHT

This month, AG. Sky is in the hot seat for our team spotlight! Sky is one of our dynamic and much-loved Community Managers. A great team player, we're excited to dive into Sky's journey into Avocado and how she became an Avocado Ace. Oh, and did we mention Sky loves animals? :)

Q: How did you first find out about and join Avocado?

A: I once had a friend that I used to play with in Call of Duty Mobile and she asked me if I wanted to play Axie. I answered "yes, just in time because I was actually looking for an Axie scholarship and it's kind of hard to apply now," She said that she has a cousin that is a part of a guild and is looking for scholars he can refer to. That is how I discovered Avocado Guild. I got accepted as a scholar and it's not so long since I became one of the community leaders, and after a few months again I became a guild leader which required me to be involved in the internal operations. After a successful big event that I spearheaded being seen and appreciated, Sir Sunny made sure I was seen so he promoted me to Community Manager. Later on, a new program was launched in which the Avocadian Ace. Community Managers transitioned along the new program.

Q: What is your role at Avocado, what are your daily tasks?

A: At the moment, I am a Community Manager; an Avocadian Ace (these are scholars who work full-time for Avocado). I focus on community engagement work as a community manager which is to create events online and offline to make sure the community is always active. As an Avocadian Ace, I work backends helping in the inside operations and marketing.

Q: What are the challenges and what do you love the most?

A: Sometimes there are some communication issues because of the language barrier across our regions, but it happens sometimes, and we work through it in a fun and understanding way. What I do love the most is that our management and the people we work with, AG. Sharon, Kylus, Sir Dave, and the team, are so kind, understanding, and very appreciative of everything we do. I love how everyone makes sure that we Avocadians are well taken care of.

Q: What game do you love to play and why?

A: The Game that I love to play right now is DGpals! It kind of reminded me of Pokemon which I used to play on the Gameboy. It is cute and the developers are very creative.

Q: What advice do you have for beginners looking to enter the Web 3.0 and/or Metaverse industry?

A: While the space is still emergent, be open-minded and prepared to shift focus and be agile with decision-making. Metaverses have been around for a long time. Web3 Metaverses are still new and building will take time. Just like any other start-up, it can take a while - and be prepared for sacrifices.

Q: What are your suggestions for anyone who wants to be a scholar or work in web3?

A: Patience - you need to have patience when entering web3 because not everything will go as planned. Commitment - it is recommended that you stay committed to the games that you play and the work that you do because as i said, things will not always go as planned. You might not get good results today, but you will definitely get good ones one day.

Q: Share one fun or surprising fact about you...

A: One fact about me is that I want to be a flight attendant someday or someone that works around serving people, but I am actually scared of talking to people. I easily get nervous when I'm about to talk in public. Ironic right?

PLEASE NOTE: The views and opinions expressed in the Avocadian's articles are those of the authors and do not necessarily reflect the views of Avocado DAO.

MOD UPDATE

By AG.Demdem

COLLECT. WIN. REDEEM

Introducing AVP and AXP point system

A year has already passed, and Avocado DAO has been constantly bringing us opportunities to earn rewards. This year, Avocado DAO introduces us to its newest, AVP system. The AVP system is a point system for our scholars to earn Avo points, redeemable for prizes and merch items in our Avo-Mart, our community marketplace for all Avocado merch and goodies.

"The AVP system has been a spectacular addition to our Discord community, keeping engagement fun and lively every single day! We've had hundreds of scholars sign up and we can't wait to see them redeem their AVP for their favorite prizes," said AG. Sharon.

Scholars win points for fun tasks like actively participating in the Avocadian Discord community such as attending online events, content creation, social media engagements, joining AMA sessions, game feedback and sentiments, streaming events, and meme creation. Using their AVP, scholars can choose their favorite Avocado merchandise from the Avo-Mart.

AVP System Transitions to AXP Questing

The AXP questing platform is the professional transition of the AVP system to our website, with a plethora of new quests and prizes awaiting our scholars. Scholars can earn AXP by completing quests on our platform. For each level they acquire, they will earn \$EEDS which will be the virtual currency they can spend. What's more exciting is that the AXP shop will have even more extensive prizes than the Avo-Mart!

Scholars have already started transitioning to the AXP questing platform and have started claiming their daily rewards and quests. But don't worry if you haven't started transitioning yet since scholars can still earn AVP on discord for the rest of this month as we are still in a generous transition period.

MOD UPDATE

RECRUITING FOR EV.IO SCHOLARSHIP PROGRAM

Avocado DAO introduces its newest scholarship program, for Ev.io, one of the most popular games on the Solana blockchain. This is a first-person shooter with super cool NFT characters and electrifying gameplay.

Ev.io is a fast action-based game where players can level up by obliterating opponents or strategically placing traps to finish them off.

This is a chance for new scholars to join the Avocado family, so let your friends and family know, and sign up here to apply:
<https://form.jotform.com/222538749911060>

TOP 20 AVP EARNERS

By AG.Mmx

Rewarding Avocado's Most Active Members

Avocado recognizes and rewards scholars who participate the most within the community on our social channels and show their support by joining events, contributing, and helping the Avocadian community.

Scholars gain Avo points (AVP) for their contribution and participation. They can trade these in the Avo Mart to purchase the AvoArmy role which gives them access to even more rewards and opportunities. New Avocado Army scholars are announced in Discord at the start of each month. AVP can also be used for an increased share in scholarships, guaranteed scholarship positions and merch.

CONTESTS, TOURNAMENTS & WINNER ANNOUNCEMENTS

by: AG.Mxmx

Another fun month as we come to the end of October. We hosted Gas free Game Night with a small prize pool, hosted some great AMAs with exclusive giveaways, hung out for a fun movie night, and participated in a MixMob tournament. Check out this month's winners!

Avocadians can't wait for Wednesdays to come because we get to play fun and exciting games for Gas Fee Game Nights. This October, the scholars played Fall guys, UNO, and Discord Games! What makes it more exciting is the Prize Pool of \$25 USD worth of gas fees of their choice.

COMMUNITY EVENTS

Mighty Bear AMA

We might be in a bear market, but don't let the BEAR STOP YOU! The Avocado Community joined our AMA with Mighty Bear as they discussed their new game. The scholars participated and asked relevant questions live on stage. Five Big Bear Syndicate Whitelist spots, one Project 1337 Whitelist place, and a \$50 BUSD prize pool were given to the lucky Avocadians who asked their questions.

Level up your Genopets AMA

With the new Genopets' updates, initially, the scholars were a little confused about the new system. To help them out, AG. Mins, AG. Miegoreng, AG. Sharon, and AG. Mxmx held an AMA to answer questions about leveling up. It was a very informative AMA for the scholars and there was even a quick giveaway for them! The Avocadians flexed their Genopet NFTs in the AMA chat channel, and 5 lucky winners were randomly chosen to win \$1 BUSD each.

ARTWORKS & ARTISTS

Curated by AG.Mxxmx

Artists of Avocado

October's collection of art is as diverse as always with more great pieces of art from our community. This month we feature three awesome artists: Wander the Renderer, Jarpix, and Orio. WR.

We also have a funny little poem from Melzzie, our newsletter editor, inspired by Orio's avocado painting, we hope it makes you smile too.

Thank you Avocadians for sharing your artistic talents, they are always so awesome!

- Wander The Renderer#0733

WHAT'S NEW IN CRYPTO

CRYPTO UPDATES

by: AG. Natsu & AG.Melzzie

D.G. PALS, Digimon-style NFT Game

DG. Pals are species of organisms that appear on Panterra planet that have created habitats in various parts of the DG world. This makes them look special and unique. These monsters start out as eggs, and there are eight different species, including Horror Egg, Magic Egg, Marine Egg, Reptile Egg, Sky Egg, Flora Egg, and two newly added eggs which are Space Egg and Elemental Egg. There will be different evolutionary lines as players breed their DG. Pals. DG. Pals owners will need to nurture them and watch their evolution day by day in D.G. Pals New World.

Crypto Updates cont'd

The gameplay is presented as an idle game, this allows players to enjoy the game without spending too much time in front of the screen. Players can farm as long as they have at least five D.G. Pals in their inventory, each with their own unique rarity, life, and quirks, to participate in PvP mode in D.G.P Legends.

In this game, players can get rewards by playing the game and completing the daily and weekly quests to get Panterra Opal. Panterra Opal is D.G. Pals in-game token and can also be used as a way to upgrade and level up your D.G. Pals to be able to compete between players to rank up to the highest level. At the end of each season, players will get DG Coins and more Panterra Opal based on their rank.

Currently, Avocado DAO has a new scholarship opportunity for D.G. Pals. We encourage players to join and explore the D.G Verse with the Avocado DAO's vessel, completing various missions, and competing with players from other parties.

PLEASE NOTE: The views & opinions expressed in the Avocadian's articles are those of the authors & do not necessarily reflect the views of Avocado DAO.

MonkeyLeague Partners with Top Football Club AC Milan

Our partner game, MonkeyLeague, recently released some epic news! They are partnering with one of Europe's top football clubs, AC Milan, to release an exclusive set of NFT gaming assets. *"The Italian football (soccer) club has been an iconic club throughout the history of football with legendary players and epic seasons,"* said MonekyLeague in their announcement, having won a plethora of trophies and 19 league titles over time.

The first collection contains 16 of the most Exclusive LE Retro AC Milan monkey NFTs which were sold in a live auction in early October on Magic Eden's marketplace.

The NFT collection is based on the club's 1993/94 and 1995/96 teams. During these periods, the team brought home a number of wins including the Serie A, the Supercoppa Italiana, and the UEFA Champions League as well as other achievements.

These exclusive NFTs will have enhanced skills and high Alpha scores with extra perks for the player. With the first of many such partnerships, this will make the game super fun as users can play with their favorite characters and level up with their celebrity monkeys!

This collaboration between web3 game and real-life organizations and their communities is a leap forward for the web3 space and the connection between the virtual and the real world, immortalizing much-loved iconic characters and giving their value on the blockchain.

PLEASE NOTE: The views & opinions expressed in the Avocadian's articles are those of the authors & do not necessarily reflect the views of Avocado DAO.

TRIVIA - THE BLOCK BUILDERS

Proof of Work and Proof of Stake- What are they?

Since the great Ethereum merge, we hear lots of terms thrown around, as well as lots of opinions on proof of work and proof of stake, but what is the difference and why does it matter...and why is the merge such a big thing? Let's dive into the two different methods of validation.

What is proof of work (PoW)?

Used as a model for Bitcoin, the first-ever cryptocurrency, this method allows the network to validate transactions to prove that they are genuine. Every transaction needs to be validated and created by a new block on the chain. This is done by someone with large computational processing power capability hence why it is known as proof of work. People compete to be the first to solve each transaction, and the person (a miner) who does so, wins the mining rewards for the transaction. One important factor to bear in mind in a decentralized world is that miners with the most powerful equipment will always have the ability to be the first to solve the problem, making the system unfair. Other arguments against this model are that it is slow and uses massive amounts of energy to process transactions.

What is proof of stake (PoS)?

Developed in 2012, and first used by Peercoin, this model allows a fairer and faster way to validate transactions, making it more scalable for the future of blockchain transactions. PoS employs a different process to validate transactions. People who mine- or forgers- as they are called in this model, are rewarded by earning transactional fees. To be able to forge, they are required to stake and therefore freeze some of their own tokens in a specific wallet, ensuring they have a vested interest in the token itself. Forgers are chosen on a random basis to solve mathematical problems in validating transactions and building the blocks on chain. This is seen by many as a fairer, more distributed system in which the forger has a vested interest in ensuring the process is carried out correctly, hence why it has been named proof of stake.

Why does it matter?

The Ethereum merge, moving from PoW to PoS has highlighted some of the pros and cons of each mechanism and shines light on the debate between the two methods. There is much debate on which model provides the most secure and decentralized option. The topic will continue to bring maximalist from both camps into discussion on the development of future methods to validate transactions to encompass all the issues that surround the process, from transition speed to environmental considerations to that of security and neutrality of validators, for now, the conversation continues.

Get the hottest tips and tricks for DGP.Legends

D.G. Pals is an ambitious GameFi project built by a team of veteran game developers, serial entrepreneurs, and games industry professionals (5 years vesting), and backed by Crypto.com, Capital, and Spartan Group. Here, we explore their first game release DGP. Legends.

PLEASE NOTE: The views and opinions expressed in the Avocadian's articles are those of the authors and do not necessarily reflect the views of Avocado DAO.

As of now, the only playable game mode that scholars can play is D.G.P: Legends, it is an idle battle system game where you let your D.G.Pals compete with other D.G.Pals in "Quick game" mode and "Ranked game" mode. You can play this game both on mobile (through the Metamask app) and PC (browser).

Avocadians, alongside their D.G. Pals, embark on a fun-filled journey with captivating battles to become the very best! We warmly welcome you to join us and embark on a journey together in D.G. Pals where you can.

Tips for newcomers:

Train and level up your D.G.P to become strong!

Battle with other D.G.P trainers and achieve victory!

Earn consistently and scholars receive more D.G. Pals and rewards!

Join our Avocado DAO discord server and fill out the following application form:
<https://form.jotform.com/222441017894859>

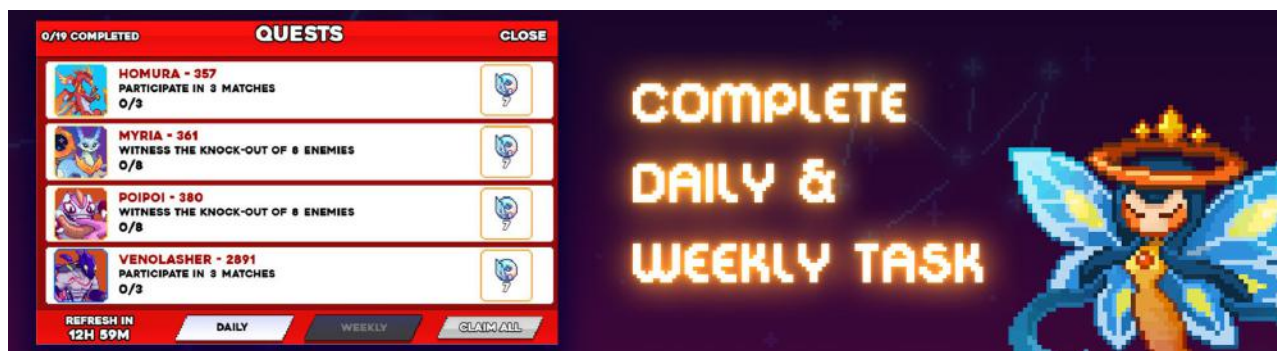

Avocado DAO Goals:

- 1: Complete daily and weekly quests throughout the month and help reach scholars in the top leaderboards.
- 2: Give helpful tips for our growth.
- 3: To enjoy the game as a community while facing off against fellow scholars and D.G.P trainers.

GAMING INSIGHTS (continued)

In-Game Tips & Tricks:

1: Make sure to check and complete the daily and weekly task.

2: Suffering losses in “Quick Game” mode is okay as you are bound to face off trainers that have higher level D.G.P and its part of the game however losing in “Ranked Game” will deduct your win trophies. In ranked you start off as Bronze and work all the way up to Legends. Be wary as losing too much will eventually put you in a lower rank if you have a previously higher rank than Bronze, you will therefore earn less through weekly claims and lower season end rewards, the lower the rank you have.

3: Be sure to pick your fights wisely, don't rush into battle, make sure to pick fights that you think you and your D.G.Pals will have the highest probability of winning. You can do that by analyzing what D.G.Pals they have, their level, and their total attack power shown beneath their names.

8	VETERAN 3	LV. 20	LV. 20	LV. 20	LV. 20	LV. 20	1100
21	THEVOID • GRIFO	LV. 18	LV. 18	LV. 18	LV. 18	LV. 18	853
22	WEIVEZ	LV. 14	LV. 14	LV. 14	LV. 14	LV. 14	843
28	YYAN	LV. 13	LV. 13	LV. 13	LV. 13	LV. 13	738
29	PATH_MIYOOL	LV. 9	LV. 10	LV. 14	LV. 9	LV. 9	730

4: Team positioning matters, as well-prepared teams in their correct positions, will receive boosts and bonuses that can enhance their stats. They will have advantages that can lead to better results in team fights.

PLEASE NOTE: The views and opinions expressed in the Avocadian's articles are those of the authors and do not necessarily reflect the views of Avocado DAO.
