A 100% ECO rigid takeaway food packaging entered production in EU,
at **BFG Packaging Romania**

The use of ecological takeaway food packaging is becoming a pressing necessity due to the legislation and an issue given the pollution level reached in the world.

A **100%-ecological** rigid takeaway food packaging made in EU is available as of February 2022.

The new range of products is made entirely of **FSC-certified wood fiber** acquired from the EU market.

This wood fiber range of products is made by BFG Packaging at its factory in Romania, with highly automated technology, following the completion of a EUR 20 M investment.

This is a milestone for the European industry. The newest BFG's range of products presents the first alternative to imports from Asia for rigid takeaway food packaging that is 100% ecological, made in Europe.

BENEFITS

OPERATIONAL

No more production shortages

BFG Packaging honors all orders for its partners from existing stocks that are created permanently.

Short logistic chains

Producing inside the European space will allow access to the entire European market through much shorter logistics chains, compared to imports from other continents.

Short delivery time

Fulfilling orders exclusively from stocks and short supply chains will allow a cumulative impact that reduces delivery time to few days, or at most a couple of weeks.

No more long-term blocked funds

No currency risks

No more geopolitical/political risks posed by international commerce

REPUTATIONAL

Lower carbon footprint

Long supply chains are an important source of carbon emissions. Avoiding transcontinental shipping and replacing it with a short, intra-European supply chain will help reduce the overall carbon footprint.

Such a decision will have a positive impact on the solidity of its message, or claims about a sustainable and responsible business model towards the environment and communities.

Supporting EU economy

The purchase of products made in the EU, made in their turn entirely from raw materials originating also within the European single market, has a positive economic impact horizontally on other European businesses, supporting jobs creation and generating additional revenues for EU member states.

High quality

Due to the very strict quality standards implemented at the level of the community block, the products made in the EU have a reputable benefit of incorporating the latest technologies and having the highest quality available.

Sustainability

The purchase of ecological rigid takeaway food packaging made of FSC-certified wood, sends a strong message to promote a responsible attitude towards the environment, to support a sustainable approach to forests, for the ultimate benefit of present and future generations.

WOOD FIBER eco-friendly MINI-PACKING

BFG Packaging developed customized mini-packing for the wood fiber products.

Based on the requirement of the market of having single use packaging products in small packages, on the shelf, we developed a service of packaging the natural fiber products in **mini-packs of 2 to 25 products per set**.

Mini-packing can be loose or stretch from clear plastic foil, with the number of products set on request. They can have **personalized labels**, any color and shape.

Exterior cardboard box packaging for mini-packs can be standard box or **"shelf box"** type with removable cover. They can be colored or not and personalized with the requested information.

Even if this type of custom packaging requires a lot of details, the **delivery time is short**, after all the details have been established.

EUROPEAN **SUSTAINABLE** PRODUCER

BFG Packaging SRL is a Romania-based company founded in 2008, primarily focused on producing packaging solutions for the HoReCa industry.

The company specializes in both traditional plastic containers and innovative eco-friendly packaging made from renewable materials like wood fiber.

These sustainable products align with growing environmental regulations aimed at reducing plastic waste.

From the strong manufacturing base in East-Europe our partners in the whole of Europe are served on a daily basis.
