---

Imagine coming home to this beautifully designed one-story residence at the end of a peaceful cul-de-sac in Copper Chase. As you pull into your 3-car garage and walk up to your covered front porch, you're welcomed by tall ceilings, custom moulding, and an open layout that instantly feels inviting. Your kitchen becomes the heart of the home—professional-grade appliances, granite countertops, and two spacious islands give you all the room you need for cooking, serving, and gathering. From here, you can enjoy views into your dining areas and your great room, where natural light pours through large windows and a fireplace adds warmth to every season. When it's time to work or unwind, your office with French doors gives you a quiet space to focus. At the end of the day, your private suite offers a true retreat with two walk-in closets and a spa-like bath featuring a garden tub, a custom shower, and abundant vanity space. Your main-level laundry room adds everyday convenience. Hosting guests is easy with your own mother-in-law suite, complete with its own kitchen—ideal for extended visits or additional flexibility. Downstairs, your finished basement becomes a destination of its own with a large family room for movie nights, a recreation room, a generous wet bar for entertaining, another bedroom, and a full bath. You'll also appreciate the storage area, workshop space, and convenient staircase leading right up to the garage. Step outside to your covered back patio, where you can relax while overlooking your expansive patio and spacious backyard. A custom garden shed and beautifully landscaped grounds make your outdoor space both functional and serene. This is a home designed for comfort, convenience, and the kind of everyday living that feels elevated yet relaxed.
