Recognised by Maldives Qualifications Authority (MQA)

# How we

# Differentiate!

UNISTEM stands as a shining example of innovation, a brainchild born from the visionary mind of Gihan Talgodapitiya, our CEO and Founder.

With roots grounded in the National University of Singapore (NUS) and nurtured by over three decades of diverse global experiences in Corporate Training, Gihan is driven by a passionate commitment to revolutionize the educational landscape in Sri Lanka, offering our students a truly unparalleled learning journey.

**Gihan  
Talgodapitiya**  
Director / CEO

Professor Emeritus  
**Indral de Silva**  
Vice Chancellor

Our Academics are headed by Vice Chancellor Professor Emeritus Indralal De Silva, Former Dean, Faculty of Arts, University of Colombo; Research Fellow, National University of Singapore (NUS); Senior Fulbright Fellow, Harvard School of Public Health, Harvard University; Post Doctoral Fellow, Australian National University (ANU). Prof. De Silva is highly respected for his innovative ideologies in education and reengineering traditional approaches to teaching and learning. He is renowned for pushing the boundaries of knowledge through unconventional thinking, creative problem-solving, and interdisciplinary collaboration.

We provide a transformative learning adventure for our students. This experience will not only shape their perspectives but also elevate their professional standing. Our holistic approach to learning empowers individuals to shine brightly in society and excel in the workplace, setting them apart as true leaders of tomorrow.

# Innovative Teaching

Our students belong to the dynamic Gen Z and Millennials, whose hunger for knowledge transcends traditional teaching. Our approach extends far beyond the confines of standard textbooks and theories, offering a journey that ignites curiosity and fosters genuine growth. This innovative and truly unique learning experience and campus life, differentiates UNISTEM from any other higher education institution.

We extensively use Activity Based Learning (ABL) as our teaching methodology. It is all about learning through active participation in tasks, real-life situations, and various activities. In this method, students take the center stage, while teachers assume the role of facilitators. ABL empowers students to learn autonomously, progressing at their own pace, while engaging in supervised activities that promote interactivity and deeper understanding.

Classroom learning is supplemented with regular industry visits. Students are privileged to learn from corporate leaders about strategies and success stories.
