OUR STORY

Global Flags Unlimited LLC, is in Acworth, Georgia. Locally owned and operated since 1989. We pride ourselves on excellent customer service and product standards. One of the oldest e-commerce sites on the Internet, We continuously make improvements to our websites to make shopping with us simple and easy. One thing has not changed since our beginning: we have always provided the best quality products at reasonable prices. Our first project was to create a custom flag for a real estate agent to attract attention to a listing. From those humble beginnings, our business grew immensely.

FLAGPOLE BEACON

The Flagpole Beacon is the most environmentally correct way to illuminate flags during the night hours. For the first time, Flags can be properly lit during nighttime hours without lighting adjoining the property and the night sky.

- Minimize Light Pollution
- Rotates with The Flag, Focusing All Light on the Flag as the Wind Blows it around the flagpole.
- Energy Efficient LED Bulbs Provide Years of Maintenance-Free Use.
- Available for Flagpole Heights of 20' to 100'
- Residential Options Available
- Solar Packages Available
- US Patent 7,275,495 manufactured in Acworth, GA.

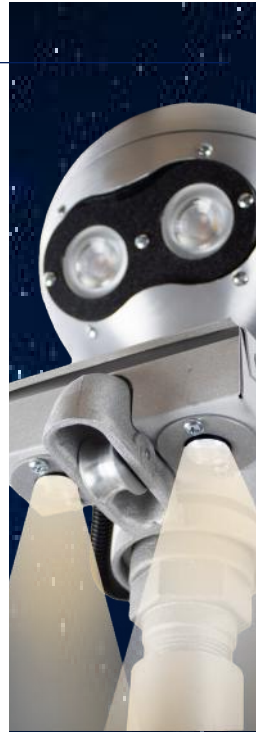

Designed purposely to comply with many city and county governments' new regulations on lighting, the External Flagpole Beacon is the best flagpole LED lighting fixture on the market, not only for its bright illumination but also because this light magnificently illuminates only the flag, as it blows in the wind or around the pole.

- External Halyard 359° Revolving Truck
- 12V System with Driver Contained Inside the truck
- Warm White 3000K LED Lights
- Choice of 12V DC or 110 AC Powered (Shipped ready to install)
- Standard, 1-1/4" NPT Spindle

BEACON PLUS

Illuminates the flag while at rest with two vertical facing 3W bulbs.

The Internal Halyard Flagpole Beacon provides lighting options for both winch and cam cleat flagpole systems in heights from 20' - 100'. These options provide the most environmentally correct way for flagpole illumination, properly lighting the flag during the nighttime hours without lighting adjoining properties and the night sky.

- Internal Halyard 359° Revolving Truck
- 12V System with Driver Contained Inside the truck
- Warm White 3000K LED Lights
- Choice of 12V DC or 110 AC Powered

ILLUMINATOR SERIES PACKAGES

- Platinum Series Halyard Flagpole
- Premium Series Halyard Flagpole
- Standard V2 Series Halyard

In each package, your customer receives a high-quality commercial flagpole that can be used to fly any flag of their choosing. In addition, the package includes our patented flagpole lighting system called the Flagpole Beacon™. This ensures that their flag is always visible and during the night and they get a wonderful aesthetic to celebrate the values and ideals of what they're flying.

Combine these two and they have, at their fingertips, a flagpole package that can be relied on. We have a range of different options to choose from so you can find the right combination that works for your client's needs. It's the simplest way to get started and you'll know that your customer will have a world-class setup right out of the box. Rather than worrying about how to pick the right components you can leverage our years of experience and know that you're getting equipment that is carefully curated for long-term usage. We're incredibly proud of this offering and we know that if you pick one of the Illuminator Series packages, your customers won't be disappointed.
