# iCobus Managed Services (iMS)

### Delivering ICT Infrastructure with Precision, Across the UK and Europe

## About Us

At iCobus Managed Services (iMS), we specialise in end-to-end Information and Communications Technology (ICT) project delivery. With decades of experience, we successfully execute installations across critical data centres, commercial offices, retail spaces, and residential developments throughout the UK and Europe.

## Who Are We?

iMS is part of the iCobus Group, with entities registered in the United Kingdom, Ireland, and South Africa. Our extensive footprint allows us to serve clients across a wide geographical area throughout EMEA with a consistent standard of excellence.

## What We Do

### Complete ICT Project Delivery

Through the complete cycle of services including initial site surveys, system design, professional installation, management and final delivery, iMS provides a full-service solution for your ICT infrastructure needs. We strive to oversee every detail, ensuring seamless execution, timely delivery, and optimal performance.

Our scope of services includes:

- Labour & Materials
- Remote Project Management
- End-to-End Coordination

We tailor our services to make sure your project is delivered on time, on budget, and to a high standard. We provide a Manufacturer Warranty of up to 25 years on specific aspects of product performance, quality, and workmanship from the date of installation.

## Our Services

### Data Cabling

Installation of structured cabling of systems including supporting internet, WiFi, CCTV, security, access control, Building Management System (BMS), and Project Management System (PMS) monitoring and other applications.

### Fibre Optics

Installation, splicing, and testing of fibre optic cables to deliver ultra-fast, high-capacity data transmission.

### WiFi Deployment

Experts in multi-site WiFi rollouts, managed remotely through our central Project Management Office (PMO) for efficient, large-scale execution.

### IT Services

Provision of skilled field engineers specialising in racking, stacking, patching switches and servers—ideal for network migration projects.

## Our Reach

We've worked all across the UK and in the major cities in Europe, including:

| | | | |
|---|---|---|---|
| Belgium | Brussels | Poland | Warsaw, Gdańsk |
| Czech Republic | Prague | Portugal | Lisbon |
