QuickInstall Grab Rails

QuickInstall Grab Rails provide a tailored solution for improving safety, mobility, and comfort in a variety of environments. These grab rails ensure reliable support to help individuals maintain their independence and quality of life.

- **Various Uses:** Ideal for use in bathrooms, showers, entryways, steps, or outdoor areas, providing secure handholds wherever support is needed.
- **Indoor and Outdoor Use:** Designed to perform in both indoor and outdoor environments, offering dependable support in any setting.
- **Easy Installation:** Ergonomically designed for effortless use, with simple installation methods that allow for quick setup by professionals or caregivers.
- **Low Maintenance:** Easy-to-clean surfaces that resist wear, ensuring hygiene and long-lasting performance in all weather conditions.

Note: In areas where studs are not ideally located, our StudSecure Modular Grab Rails can be installed to extend and catch further available studs.

Enhance daily living with **QuickInstall Grab Rails** that deliver safety, comfort, and independence across a range of environments.

Adjustable Sliding Bracket for 32mm Rails

- To suit 32mm grab rail
- ADA compliant design
- Suitable for use with hand showers

Size	SKU
138 x 1000mm	SP-SBADA

Compliance

These products should be installed as specified by AS1428.1. They are designed to safely support people requiring assistance in bathrooms and toilets up to a minimum force of 1100 N, as per this standard.

Tools Required

- Stud finder
- Level
- Permanent marker
- Cordless drill driver
- Drill hardware
- Appropriate PPE

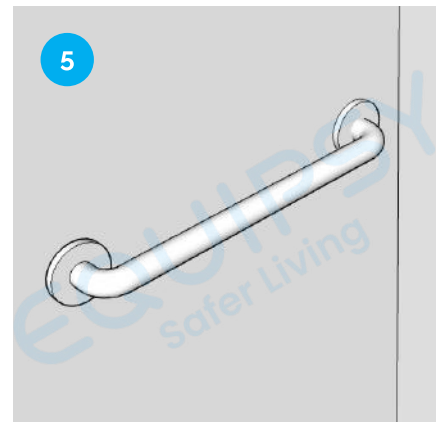

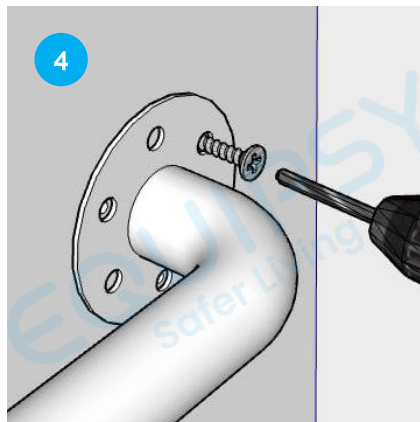

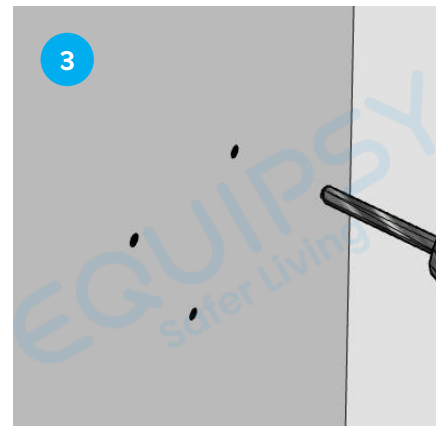

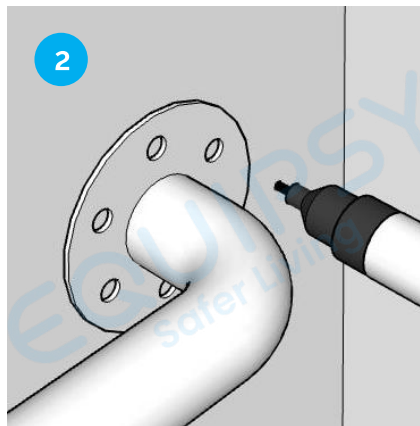

Step 1 Determine the location of your rail and the surface it is being attached to.

Step 2 Mark out your fixing holes with your permanent marker, using your level for horizontal/vertical alignment.

Step 3 Use appropriate drill to drill the marked holes on the surface.

Step 4 Position the grab rail, aligning the flange holes with the drilled holes on the surface. Drill the screws into the holes to secure the grab rail into place.

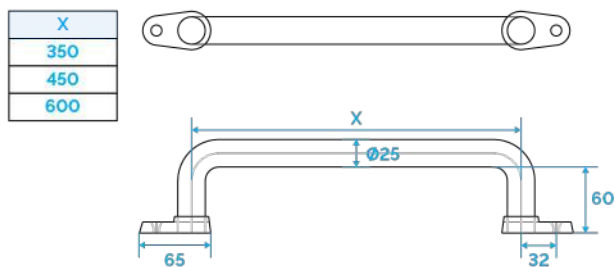

Step 5 Slide the cover plates over the flanges. Twist and lock into place.

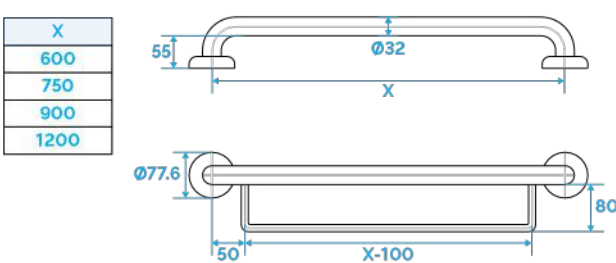

The information provided in this document is general in nature and should not be used as a substitute for expert advice in specific applications. All Equipsy products must be installed by qualified tradespeople. Equipsy is not responsible for any damage to products, walls, or fixtures resulting from improper installation or maintenance.
