

# VAPING & TOBACCO PREVENTION

### What Are E-Cigarettes?

Electronic cigarettes (e-cigarettes) are battery-powered vaping devices. E-cigarettes avoid the burning of "tobacco" ("tar") or "nicotine" to create an aerosol vapor that the user inhales. The aerosol vapor typically contains nicotine, propylene glycol, and other substances. Vaping devices are known by many names, including:

- E-cigs
- E-hookahs
- Vapors
- Vape Pens
- Tanks
- Mods
- Pod Mods
- Electronic Nicotine Delivery Systems (ENDS)

### What Are the Health Risks of E-Cigarettes?

E-cigarettes can also deliver marijuana and other drugs. Using vaping devices (commonly called "vape" or "juice" pens) to inhale marijuana is sometimes called "vaping" or "vaping" in casual settings.

**Nicotine Addiction**  
Nicotine is a highly addictive substance. The higher the nicotine concentration, the more likely you are to become addicted. Heavy use of nicotine can lead to dependence, which increases the risk of relapse after quitting.

**Lung Injury**  
Some e-cigarettes contain small particles that can irritate the lungs. In some cases, these particles can cause severe lung injury, including hospitalization and even death.

**Other Damages**  
Vaping, including the use of e-cigarettes, can cause damage to the eyes, throat, and mouth. It can also lead to respiratory infections and other health problems.

### E-CIGARETTES & VAPING:

#### What Do E-Cigarette, or Vaping, Products Look Like?

Most e-cigarettes include four main parts:

- Disposable e-Cigarettes**  
Disposable devices are designed to be discarded after the battery is depleted.
- Refillable and Rechargeable Devices**  
Designed to be reused over time using disposable or rechargeable batteries and can be refilled with e-liquid.
- Flavored Disposable**
- Cigs**

### A CLOSER LOOK

**Mods or Tanks**  
Designed for customisation, mods are used to hold and heat liquid nicotine. They can be refilled with e-liquid.

**Mod With Sub-Ohm Tank**

**Sub-Ohm Tank**  
Sub-Ohm tanks are designed to produce a large amount of vapor. They are used with high-wattage mods.

**Pod Mods**  
Pod mods are small, portable vaping devices that use pre-filled pods containing e-liquid.

### Toxic Haze: Vaping Poisons Display

If you think vaping is a safe alternative to smoking, think again! The hidden risks of e-cigarettes expose you to a host of harmful substances that may be found in cigarette tar.

**Can You Find...**

- ... A battery?
- ... A car?
- ... A laundry detergent?
- ... Nail polish remover?
- ... A pesticide?
- ... A gasoline pump?
- ... A cigarette?

**PROUD TO BE VAPE FREE**

**HAPPY & VAPE FREE**

### the truth about ELECTRONIC CIGARETTES

also referred to as e-cig, vape, and juul

**WARNING!**  
Electronic cigarettes (also known as "e-cigs") are small electronic devices typically used for the inhalation of nicotine in the form of vapor.

The devices come packaged with "cartridges" that are used to heat the substance.

This substance contains chemicals that are highly addictive, including heavy metals, propylene glycol, and other harmful particles that can cause lung disease and cancer.

# THE DANGERS OF VAPING

## PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

### The Vaping Epidemic

**What are "e-cigs" and vaping?**  
An electronic cigarette, or e-cig, is a handheld electronic device that simulates the experience of smoking a cigarette. It works by heating a liquid which generates an aerosol, or "vapor", that is inhaled by the user. Using e-cigarettes is commonly referred to as vaping.

**WHAT DOES AN E-CIG LOOK LIKE?**  
There are many types of electronic cigarettes. The most popular among youth is the JUUL. This device looks like a USB drive. Due to different designs e-cigs are sometimes hard to recognize, making them easier to be used by youth in plain sight!

**WHAT IS IN VAPOR?**  
**LEAD**  
Used in car batteries. Lead is highly toxic. It has been banned from many products. Lead poisoning starts growth, causes brain damage, and can even lead to death!

**BENZENE**  
Benzene is a widely used industrial chemical. Benzene is found in crude oil and is a major part of gasoline. Benzene can lower bone marrow, and affect blood cell levels.

**LIQUID NICOTINE**  
The most addictive part of a cigarette is the tar and "nicotine". Nicotine is a highly addictive substance that can cause heart disease, stroke, and breathing difficulties.

**FORMALDEHYDE**  
This is used to preserve dead bodies. It causes cancer and can lead to lung disease. Formaldehyde also leads to eye and digestive system damage.

**2ND HAND VAPING ISN'T HARMLESS!**  
2nd hand vape is dangerous to everyone around. The e-cig does not produce a vapor (gas), but rather a dense visible aerosol of liquid sub-micron droplets, consisting of glycols, nicotine, and other chemicals, some of which are carcinogenic. At least 10 chemicals are released in 2nd hand vapor that are toxic, or addictive.

**VAPOR DOESN'T MEAN SAFER**  
SIDE EFFECTS:  
**POPCORN LUNG**  
One chemical in some e-cig flavorings is a buttery-flavored one called diacetyl. It's been linked to a serious lung disease called bronchiolitis obliterans. It's also known as popcorn lung.

**Vaper's Tongue**  
Vaper's Tongue causes loss of taste, foods, drinks, even vapes will be flavorless. Vaper's tongue also causes gritty, numb, discolorization of the tongue.

**TEENS AND VAPING**  
JUUL E-CIG SALES INCREASED 641% IN JUST ONE YEAR. JUULING IS ONE OF THE MOST POPULAR E-CIGS AMONG TEENS.

31% of teen e-cig users started smoking cigarettes within 6 months.

**WHAT TEENS THINK IS IN THEIR E-CIGS:**

MARIJUANA	5.6%
NICOTINE	13.2%
JUST FLAVORING	66.9%
OTHER	1.3%
DON'T KNOW	13.7%

**MALES ARE 2X MORE LIKELY TO USE E-CIGS THAN FEMALES**

NIMCO INC. WWW.NIMCOINC.COM  
800-962-6662

Available in Tall or Table-Top sizes

### YOUTH AND DISPOSABLE VAPES

What everyone should know!

### WHAT ARE DISPOSABLE VAPES?

Disposable vapes are a type of vaporizer or e-cigarette, designed so discreetly that most people don't even recognize them as an e-cig. Popular brands are Puff Bar, Vuse, SMOK, and JUUL. These prefilled devices deliver nicotine, flavors, and harmful chemicals with each hit.

**Okay, but are they really that bad?**  
Many people use e-cigarettes, like Juuls, because they aren't made with tar and all the cancer-causing chemicals you'll find in a tobacco cigarette. A study published in the journal, Pediatrics, found that teenagers who smoked e-cigarettes had higher levels of cancer-causing chemicals in their bodies than non-smokers.

**DO YOU THINK VAPING IS COOL?**  
Many have noted that the discreet design and flavors appear to be targeted to young people. The trend of vaping has become so popular because of social media and the idea that it is a healthier smoking alternative although there is very little proof. Celebrities on social media are seen partaking in these activities and giving their opinions.

**CAN YOUTH GET THEM EASILY?**  
News outlets and social media sites report widespread use of vapes by students in schools, including classrooms and bathrooms.

**Rumor has it, vaping is safe, but that's FALSE!!!**  
SERIOUS & POTENTIALLY LONG-TERM EFFECTS OF VAPING:  
**SEIZURES**  
IT'S BEEN KNOWN THAT NICOTINE CAN PROVOKE SEIZURES IN SOME PEOPLE. AND THE "TIGHT SQUEEZE" AMONG VAPERS SIGNALS A POTENTIAL ENGINEERING SAFETY ISSUE.  
**SEVERE LUNG INJURY**  
VAPING COATS LUNGS WITH HARMFUL CHEMICALS. E-LIQUID CONCOCTIONS USUALLY INCLUDE SOME MIX OF FLAVORINGS, AROMATIC ADDITIVES AND NICOTINE, DISSOLVED IN AN OILY LIQUID BASE. SOME OF THE VAPORIZED ELEMENTS OF THE OIL ARE GETTING DEEP DOWN INTO THE LUNGS AND CAUSING AN INFLAMMATORY RESPONSE.  
**ADDICTION**  
YOUR ATTEMPTS AT STOPPING MAY CAUSE PHYSICAL AND MIND-RELATED SYMPTOMS, SUCH AS STOMACH CLASPING, ANXIETY, IRRITABILITY, RESTLESSNESS, DISTRACTED CONCENTRATION, DECREASED FOOD INTAKE, ANGER, INCREASED IRRITATION, INSOMNIA.

**More than 2 million U.S. youth currently use e-cigarettes**  
Among youth current e-cig users,  
Disposables are the more commonly used e-cigarette device type.  
Nearly 83% use flavored e-cigs.  
About 1 in 4 use e-cigs daily.

The sleekly designed device often resembles a small USB flash drive and creates very little smoke, so it is not easily detected by teachers and parents.

**IT'S OKAY TO SAY NO!**  
Just say no, Be firm, strong and clear but polite. No thanks, I don't vape! Give a reason or an excuse why you can't. "If my parents find out I'm grounded for a month." Ask them why they're smoking, while still staying polite and friendly. "Why do you want to vape?" "We know vaping is bad for us, so what's good about it?" If all else fails, WALK AWAY!

**It's not water vapor!**  
While using an e-cigarette is often called "vaping", the device produces an aerosol, not a vapor. Unlike vapor, which is simply a substance in gas form, the aerosol from an e-cigarette can contain tiny chemical particles from both the liquid solution and the device (e.g., metals from the heating coil).

# THE DANGERS OF VAPING

## PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

### Dangers of VAPING MARIJUANA

**Vapor is NOT SAFER!**  
Just because it's vapor doesn't make it safer. The harmful chemicals in marijuana are still released when vaped.

### SIDE EFFECTS

- Decline in IQ
- Impaired Thinking
- Addiction
- Relationship Problems
- Financial Difficulties
- Brain Health Decrease
- Weakened Immune System
- Impaired Coordination
- Memory Loss
- Anxiety
- Panic Attacks
- Hallucinations
- Increased Heart Rate
- Increased Risk of Heart Attack
- Increased Risk of Stroke

**If it's legal it's safe, right?**  
Many substances are legal but that does not mean they are safe. Marijuana has many negative side effects. Marijuana is not legal in all states.

**Legalization and Effects**  
States that have legalized the use of marijuana have seen a recent increase in accidents. Drugged driving deaths triple with the spread of legal marijuana.

### TEENS VAPING AND MARIJUANA

**WARNING SIGNS:**  
Dilated Pupils  
Bloodshot Eyes  
Lack of Motivation  
Constant Hunger

**Marijuana is a gateway drug.**  
The THC levels in vaped marijuana is almost 4 times higher than when smoked. Marijuana leads to addiction, hard drug use, and bad decision making.

**DAILY MARIJUANA USE:**

Grade	Percentage
8th graders	0.7%
10th graders	3.4%
12th graders	5.8%

**TEENS ARE MORE LIKELY TO SMOKE MARIJUANA THAN CIGARETTES.**

**EFFECTS OF MARIJUANA ON TEENS**  
Difficulty with critical thinking skills  
Impaired reaction time  
Decline in school performance  
Increased risk of mental health issues  
Higher chance of addiction.

**ONLY 29% of 12TH GRADERS view regular marijuana use as risky (half the rate of perceived harm 20 years ago)**

**1.7 MILLION TEENS have vaped marijuana**

### WHAT'S IT REALLY COST?

**CRIMINAL CHARGES**  
SOME STATES CARRY PRETTY HEFTY PUNISHMENTS. FOR EXAMPLE:

**Ohio:** Any amount of marijuana will earn you one year in jail, and the fine can change you with a felony or misdemeanor.  
**Tennessee:** Law makes a felony out of anyone carrying any amount over a half-ounce of marijuana, making it one of the most extreme states in the nation.

**Federal Law:** Cannabis is treated like every other controlled substance, such as cocaine and heroin. The federal government places every controlled substance in a schedule, in principle according to its relative potential for abuse. Under the CSA, cannabis is classified as a Schedule I drug, which means that the federal government views cannabis as highly addictive.

### INHALING POISON

**TOXIC METALS**  
The heavy metal, lead, is showing up in lab tests of recreational cannabis products. There's no safe level of exposure to lead. It's a neurotoxin that can lower IQ, lead to illness, and even death!

**THE POISONS**  
There are still risks that are involved when vaping marijuana. The same chemicals that are released when marijuana is heated are distributed when vaped.

### 2ND HAND MARIJUANA EXPOSURE

Secondhand smoke from combusted marijuana contains fine particulate matters that can be breathed deeply into the lungs which can cause lung irritation, asthma attacks, and makes respiratory infections more likely.

2nd hand marijuana vapor contains levels of THC. Particle concentrations from dabbing and vaporizing cannabis can create levels of indoor air pollution similar to those seen in extreme air pollution events like wildfires and severe industrial pollution. Exposure at these concentrations can cause cardiovascular and respiratory disease.

**HIGHER THC LEVELS**  
When vaping marijuana the THC level is significantly higher than when smoked. THC level in vapes can be as high as 87%, when smoking is only around 12%.

**EFFECTS OF THE PARANOID AND ANXIOUS DRY MOUTH DRY RED EYES SLEEPINESS AND LETHARGY IMPAIRED MEMORY HEADACHES**

**Some vape pens contain harmful additives.**

Propylene glycol (PG) and polyethylene glycol (PEG). Unfortunately, while these additives are generally recognized as safe by the U.S. Food and Drug Administration (FDA), they transform into more dangerous substances when heated to the point of combustion.

### MARIJUANA UNDETECTED

**VAPING MARIJUANA UNDETECTED**  
The odor of vaped marijuana is less strong than when smoked, making it easier to hide. Also due to the fact that many vaping devices can be used for vaping e-cigs or marijuana sometimes it's harder to detect what is being vaped.

**DISPOSABLE THC PENS**  
The disposable pens come pre-loaded with a THC mixture. Due to the fact that they look like nicotine vapor pens, they can go undetected.

**BOX MODS**  
Box mods allow the user to pick the level of THC. It also allows the user to have a lower vape cloud release making it hard to detect the use of marijuana.

**JUUL**  
Although the Juul is designed to vape nicotine-containing e-juice, some have discovered a way to adapt the device so that it can be used to vape weed. JUULING is popular among the younger generations.

Vaping Marijuana: A Dangerous Alternative	Pamphlets	ITEM # 11399
Electronic Cigarettes: An All-Too-Familiar Danger	Pamphlets	ITEM # 11400

### the truth about VAPING MARIJUANA

a dangerous alternative

**what is it?**  
As the popularity of vaping rises, so too does the popularity of vaping substances other than nicotine products, such as marijuana.

Marijuana vapes, or "THC carts" as they are commonly referred to, are vape cartridges filled with the compound THC, the part of the marijuana plant that produces the "high" feeling associated with its use.

However, oftentimes more than just THC makes its way into the cartridge, making this method of marijuana use a dangerous alternative.

**information**  
Many marijuana users, including both recreational and medical recipients, have switched to this method of use in recent years. Many make the switch out of convenience. However, there are certain risks associated with the vaping of marijuana that are not limited to those associated with regular vaping itself.

With marijuana legalization happening across the United States, individuals have begun to create their own "THC Carts" to sell, oftentimes including dangerous and even deadly compounds that present a wide range of health issues when inhaled.

One of these compounds, vitamin E, has been known to rapidly lead to a coma and even death.

### the truth about ELECTRONIC CIGARETTES

also referred to as e-cigs, vapes, and jools

**what is it?**  
Electronic cigarettes (also known as "e-cigs") are small, electronic devices typically used for the inhalation of vapor. These devices come in the form of vapor pens, e-cigarettes, or e-cigs.

The devices come equipped with "cartridges" that are used to heat the substance.

This substance contains chemicals that are carcinogenic, including heavy metals, volatile organic matter and ultrafine particles that can cause lung disease and cancer.

**information**  
Despite popular belief, vaping is not a safer alternative to smoking cigarettes. Both contain chemicals that are harmful to your health.

This includes: harm to your lungs, brain, and heart.

Some vape cartridges are illegally manufactured to sell online and through social media. These "carts" contain dangerous chemicals and have been known to cause severe health issues, including cancer.

The risk of vape addiction is just as high as cigarettes thanks to the substance nicotine. This leads to more frequent use of the product to achieve the same "buzz" or "high" that cigarettes commonly provide.

# THE DANGERS OF VAPING

## PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

**Hair Health**  
Nicotine content of e-cigarettes affects the body in the same way as ordinary cigarettes and chewing tobacco. That means less blood flow to the scalp, which can significantly undermine hair follicle health, leading to thinning or loss of hair.

**Brain Health**  
Nicotine exposure during adolescence, or a critical period for brain development, can cause addiction and can also lead to changes in the developing brain. E-cigs have been shown to contain a mixture of nicotine of cigarettes.

**Eye Health**  
Vaping contains several chemicals that are known to cause inflammation of the eyes, nose, and throat. It will brown smoking in any form can increase the risk of developing eye diseases such as macular degeneration, cataracts, and diabetic retinopathy. These risks are also present in e-cigarettes.

**Lung Health**  
The inhalation of harmful chemicals from e-cigarettes can cause irreversible lung damage and/or lung disease. Popcorn lung is also a risk factor from e-cigs. Popcorn lung is a medical condition that develops the bronchioles, the lung's smallest airways. Over time this will cause scarring that leads to breathing difficulties.

**Heart Health**  
Flavorings found in e-cig juice have been tested. When tested they showed the heart-healthy you, nitric oxide. Nitric oxide reduces inflammation, prevents depressed platelets from forming, and helps blood vessels open up to improve blood flow. Drugs in this gas can lead to heart attacks and strokes.

**Skin Health**  
Any form of smoking leads to premature signs of aging: deep wrinkles, bags under eyes and dull, dehydrated skin. This bad habit steers your life of oxygen and constricts blood flow, which affects circulation and breaks down collagen and elastin.

**Central Nervous System**  
Some studies have found vapors to contain lead, nickel, tin, silver, formaldehyde, manganese, selenium, and other chemicals linked to cancer and central nervous system problems.

**Addiction**  
Using nicotine, regardless of how it is delivered, increases the risk of addiction. Nicotine addiction is notoriously difficult to reverse, and the use of e-cigarettes frequently leads to use of other nicotine products, including smoked cigarettes, as well as alcohol and other drugs.

**E-cigarettes and other vaping devices are NOT risk-free.**

# VAPING: A BAD DECISION

## VAPING: A BAD DECISION BANNER

• This 3' x 5' banner is designed to educate viewers on the health risks associated with vaping • It features a teen at the center, with various sections of the body highlighted to emphasize the negative impacts of vaping on different organs and systems • The banner also emphasizes that e-cigarettes are addictive due to nicotine, and that vaping devices are not risk-free

ITEM # 11844 3' x 5' Banner \$37.50

# VAPING... A TOXIC MIX

## It's more than just WATER VAPOR

**BENZENE**  
Benzene is a widely used industrial chemical. Because it tends to build up and is a major part of gasoline, Benzene can lower bone marrow, and affect blood cell count.

**ACETONE**  
Commonly used in nail polish removers, Acetone can irritate the eyes, along with damaging the central nervous system.

**TOLUENE**  
Commonly used in paint thinners, Toluene is highly toxic. This chemical can cause headaches, nausea, and breathing difficulties.

**NICKEL**  
Commonly used in stainless steel, car production, magnets and batteries, Nickel can cause cancer, lung damage, and kidney organ failure.

**LEAD**  
Used in car batteries, Lead is highly toxic. It has been banned from many products. Lead poisoning causes growth, brain damage, and can even lead to death!

**CADMIUM**  
Used in batteries, cadmium causes damage to the liver, kidneys, and brain. This chemical takes years to leave the body.

**ACROLEIN**  
Used as a herbicide in corn, weeds and algae. It is a toxic irritant to skin, eyes, and nasal passages.

**FORMALDEHYDE**  
This is used to preserve dead bodies. It causes cancer and can lead to lung damage. Formaldehyde also leads to skin and digestive system damage.

**LIQUID NICOTINE**  
THE MOST DANGEROUS PART OF VAPING, NICOTINE ABSORBS AND TOXIC OVER 80% OF THE WEIGHT OF LIQUID NICOTINE. CAPTURED THROUGH SKIN OR INHALED CAN CAUSE SEIZURES, VOMITING AND EVEN DEATH IN CHILDREN.

Caution: as an addictive, "addict" comes in many flavors, high doses, and the potency is very variable in complex mix.

The products shown contain chemicals found in e-cig vapor. The products themselves are not added to e-cigs and are used for illustrative purposes only.

## VAPING... A TOXIC MIX (BANNER OR POSTER)

## TOXIC HAZE: VAPING POISONS™ DISPLAY

• Students can pick up this giant attention-grabbing 3-D display of an e-cigarette vape to see 8 models of products containing just a few of the same harmful chemicals found in e-cigarette aerosol vapor

- The 8 models included are:
- Cigarette (nicotine)
- Car (acrolein)
- Specimen jar (formaldehyde)
- Battery (cadmium and nickel)
- Gasoline can (benzene)
- Pesticide can (acetaldehyde)
- Nail polish remover (acetone)
- Laundry pod (propylene glycol)

• Also comes with a durable two-sided display stand that discusses other dangerous substances that have also been found in e-cigarettes, including diacetyl (which causes "popcorn lung"), vitamin E acetate (which is associated with severe lung injury), fentanyl (a synthetic opioid involved in many opioid deaths), and more

ITEM # 79309 Display \$459.00

### TOXIC HAZE: Vaping Poisons™ Display

If you think vaping is a safe alternative to smoking, think again! The models inside this e-cigarette (vape) represent just a few of the harmful substances that can be found in e-cigarette aerosol vapor.

Can You Find...

- ... A battery?
- ... A pesticide can?
- ... A gasoline can?
- ... A cigarette?
- ... A car?
- ... A laundry pod?
- ... A nail polish remover?

# THE DANGERS OF VAPING

PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

**THE FACTS ABOUT VAPING**

What is Vaping?

What is inhaled?

Is Vaping Safe?

Nicotine

Dependence

Gateway to Smoking

Risks

Vaping is the act of inhaling and exhaling the aerosol, often referred to as vapor, which is the product of an e-cigarette or similar device. The term is used because e-cigarettes do not produce tobacco smoke, but rather an aerosol, often mistaken for water vapor, that actually consists of fine particles.

**VAPING**

What is Vaping?

How do you "vape"?

Facts About Vaping

Is Vaping Safe?

Vaping & Teens

JUULing?

Vaping is highly addictive. E-cigarette pods contain nicotine, and in some e-cigarettes, like JUUL, the nicotine concentration is more than twice the amount than that of other e-cigarettes. The more you vape, the more your brain and body crave the nicotine. Also, vaping has been known to cause users to smoke regular cigarettes.

## VAPING: TRAPPED BY VAPE PAMPHLETS (SET OF 100)

• Once you realize how dangerous it is to vape, what should you do if you want to quit? • This pamphlet not only educates readers on how dangerous it is to vape, but also gives the readers tips and suggestions on quitting vaping

ITEM # 11075 \$45.00

**JUST THE FACTS**

**STARTING A CONVERSATION: KIDS AND VAPING**

If you're looking for a way to help kids and teens steer clear of vaping, one of the best things you can do is talk to them. Kids are much less likely to tune you out if they feel like they're part of the conversation. Resist the urge to lecture.

**WHAT CAN YOU DO?**

**Ask questions**

- Has anyone ever asked you to vape?
- Do your friends vape?
- Are you vaping?
- If someone asked you to vape, would you?

**Best Policy**

- Don't vape or if you've done so in the past, explain why you started.
- Talk about why you quit (or why you want to quit).
- Express how hard it is to quit.
- Mention any vaping-related health problems you've had.

If you've never vaped:

- Explain why you never wanted to start.
- Mention friends or relatives who have had vaping-related health problems.
- Discuss how you handled peer pressure.

**What if your teen already vapes?**

**Tips to help them quit:**

- **Choose a Day to quit.** Help them pick a date and prepare for that date.
- **Help them find their reason why.** Tell them to make a list of every reason why they are quitting. Write them down, keep the list in their phone and often glance at the list to remind them why they want to quit.
- **Picture the vape-free you.** Tell them to imagine themselves and their future after they quit vaping. Use this vision as motivation to keep pushing forward when things get hard.

## JUST THE FACTS: STARTING A CONVERSATION - RACK CARDS (SET OF 100)

• The use of Electronic Cigarettes are on the rise among kids and teens • Offers tips to parents, counselors, teachers, and anyone who works with kids & teens about the dangers of vaping

### Vaping MARIJUANA

### YOUR FUTURE UP IN SMOKE

**Side Effects:** Memory Loss, Anxiety, Panic, Hallucinations, Increased Heart Rate, Increased Risk of Heart Attack, Impaired Coordination, Decline in IQ, Impaired Thinking, Addiction, Relationship Problems, Financial Difficulties, Brain Health Deterioration, Weakened Immune System.

**Vapor is NOT SAFER!** Just because it's vapor doesn't make it safer. The harmful chemicals in marijuana are still released when vaped.

**If it's legal it's safe, right?** Many substances are legal but that does not mean they are safe. Marijuana has many negative side effects.

**Marijuana is a gateway drug.** The THC levels in vaped marijuana is almost 4 times higher than when smoked. Marijuana leads to addiction, hard drug use, and bad decision making.

**WARNING SIGNS:** Dilated Pupils, Bloodshot Eyes, Lack of Motivation, Constant Hunger.

### THERE IS NO "SAFE" AMOUNT.

EVEN A SINGLE PUFF CAN EXPOSE YOUR LUNGS TO HARMFUL CHEMICALS AND INCREASE YOUR RISK OF LONG-TERM ILLNESS OR DEATH.

**YOUR IMPRINT HERE**

Sku #BN9508-CU

**Hair Health:** The nicotine content of e-cigarettes affects the hair in the scalp, as well as the hair on the face, neck, and chest. This causes hair loss, and the hair that remains may be brittle, thinning, and fall out.

**Brain Health:** Nicotine causes brain damage, a critical period for brain development, and can cause and exacerbate mental health issues. It can also lead to a higher risk of addiction.

**Eye Health:** Vaping causes several chemicals that are known to cause eye irritation, including eye redness, itchy, and watery eyes. It can also lead to a higher risk of cataracts and glaucoma.

**Lung Health:** The inhalation of harmful chemicals from e-cigarettes can cause respiratory issues, including chronic bronchitis and emphysema. Vaping can also lead to a higher risk of pneumonia and other lung infections.

**Heart Health:** E-cigarettes lead to high blood pressure, which can lead to heart disease. Vaping can also lead to a higher risk of heart attacks and strokes.

**Skin Health:** Any form of smoking leads to premature aging of the skin, including wrinkles, dry skin, and discoloration. This is due to the harmful chemicals in the smoke, which can damage the skin's collagen and elastin.

**Central Nervous System:** Some studies have found that nicotine can lead to a higher risk of addiction, and that addiction can lead to a higher risk of mental health issues, including depression and anxiety.

**Addiction:** Using nicotine, regardless of how the risk of addiction, nicotine addiction is a highly addictive substance. Nicotine is also found in other tobacco products, including cigarettes and cigars, as well as in other nicotine products, such as nicotine replacement therapy (NRT) and nicotine pouches.

**E-cigarettes and other vaping devices are NOT risk-free.**

**VAPING: A BAD DECISION**

# Vaping Prevention & THC

## Fatal Vision® THC Simulation Starter Kit

• Incorporate the three (3) activities included in this kit to deliver an interactive experience that emphasizes the impact of the cognitive impairments associated with driving under recreational THC's influence

### • KIT INCLUDES:

- (1) Fatal Vision Marijuana/THC Goggles with cloth protective bag
- (1) Germicidal disposable wipes (50/pack)
- (12) Activity Balls with 3 fabric boxes
- (1) Executive function dry erase maze boards and markers kit
- (1) 4-In-A-Row Memory Challenge
- (1) User Guide

• The starter kit comes with introductory marijuana education and prevention instructional materials and videos to help you use the marijuana goggles with custom-designed activities. These activities shed light on the potentially severe consequences that can result from recreational marijuana/THC use

ITEM # 11003      THC Simulation Kit      \$925.00

## Marijuana/Cannabis: A Closer Look 3-D Display

• Helps parents and educators identify newer forms of marijuana while alerting young people to the potential risks of marijuana (also called cannabis) & shows how it is not a risk-free drug

• This educational display features realistic 3-D models of marijuana and related paraphernalia secured behind a durable Plexiglas cover

• Covers smoking marijuana, **vaping marijuana**, and oral delivery methods (edibles and tinctures)

• A stand-alone panel (12" x 17½") explains what marijuana/cannabis is, how it differs from "synthetic marijuana," such as K2 and Spice, and potential consequences of marijuana use, including addiction and mental health problems

• 29" x 20" opened

ITEM # 11633  
3-D DISPLAY      \$899.95

## Health Risks of Vaping Marijuana

• Vaping marijuana is touted as "safer" than smoking marijuana but, vaping marijuana comes with its own set of serious risks • Marijuana vapor releases harmful chemicals into your lungs that can negatively impact your respiratory system, your heart, your central nervous system, your immune system, and your mouth, throat and teeth • Explores the latest research and assesses the risks, focusing on teen health • Includes teacher's resource book, student handouts and pre/post tests in digital format • Contains Spanish subtitles • Grades 7-12 • 19 minutes

ITEM # 11491      DVD      \$149.95

## 10 Reasons You Should Never Try Vaping

• Designed to protect elementary and middle school students from the dangers of vaping by presenting age-appropriate facts and information with a strong no-use message • Four kids lead viewers through a list of 10 reasons why vaping is harmful, including nicotine addiction, damage to the brain, lungs, heart, teeth, and more • Strong graphics and humor reinforce the message that vaping is illegal for kids and dangerous for kids' health • Includes teacher's resource book, student handouts and pre/post tests in digital format • Grades 4-8 • 16 minutes

ITEM # 114921      DVD      \$149.95

# Tobacco Retractable Banners

## TOBACCO: A BAD DECISION

### Skin and Hair Health

Cigarette smoke contains carbon monoxide which displaces the oxygen in your skin, and nicotine, which reduces blood flow, leaving skin dry and discolored. Toxic chemicals in smoke can damage the DNA in hair follicles and generate cell-damaging free radicals as well.

### Brain Health

It's thought that a build-up of these toxic chemicals can damage the brain, leading to problems in learning. Long-term smoking has been linked with reductions in memory.

### Lung Health

Smoking can cause lung disease by damaging your airways and the small air sacs (alveoli) found in your lungs. Lung diseases caused by smoking include COPD, emphysema and chronic bronchitis. Smoking also causes most cases of lung cancer.

### Teeth and Mouth Health

The single greatest risk factor for oral cancer is tobacco. Smoking affects the immune system's ability to do its job, so if a smoker is being treated for gum disease, it might be because of a struggle to fight the problems associated with gum disease.

### Addiction

Using nicotine, regardless of how it is delivered, increases the risk of addiction. Nicotine addiction is notoriously difficult to reverse, and the use of tobacco frequently leads to the use of harmful substances, such as alcohol and illicit drugs.

### Heart Health

Coronary heart disease (CHD) occurs if plaque builds up in the coronary arteries. Over time, CHD can lead to chest pain, heart attack, heart failure, arrhythmias, or even death.

### Over All Health

Smoking affects the entire body, increasing the risk of many life-threatening diseases—including lung cancer, emphysema, and heart disease. Smoking also contributes to many cancer and diseases of the digestive system.

### DEATH

Cigarette smoking is responsible for more than 480,000 deaths per year, or 1,300 deaths every day in the United States, including more than 41,000 deaths from secondhand smoke exposure. On average, smokers die 10 years earlier than nonsmokers.

### Central Nervous System

Cigarettes act as a central nervous system stimulant, affecting the neurotransmitters serotonin, dopamine, norepinephrine, acetylcholine, GABA and others.

**Cigarette smoke contains more than 7,000 chemicals, 70 of which are known to cause cancer**

About 1.69 billion pounds of butts end up as toxic trash each year, making cigarettes the most littered item on Earth.

Every day, more than 3,200 children and teens under 18 years old smoke their first cigarette. (There are also 2,100 young adults who turn into smokers each day.)

### What chemicals are being burned from tobacco?

- Carbon Monoxide: Can be found in carbon monoxide fumes.
- Lead: Found in batteries.
- Acetone: Found in nail polish remover.
- Arsenic: Found in rat poison.
- Aspirin: Used for smoking roasts.
- Aspiric Acid: Found in hair dye.

Smoking is responsible for about 1 in 5 deaths annually in the United States.

**1 OUT OF 3 YOUTH WHO SMOKE**

Smoking and tobacco use causes more than 5 million deaths per year worldwide. Current trends show that this will increase to more than 8 million deaths annually by 2030.

**DID YOU KNOW?**  
NICOTINE CONTENT in one can of soft is the same as 80 CIGARETTES

Available in Tall or Table-Top sizes

## TOBACCO KILLS

### DANGERS OF TOBACCO

- On average, smokers die 10 years earlier than nonsmokers.
- Cigarette smoking is responsible for about one in five deaths annually, or 1,300 deaths every day in the United States.
- Second hand smoke is responsible for nearly 42,000 deaths per year in the United States.
- About 1 in every 13 Americans aged 17 years or younger who are alive today are expected to die prematurely from a smoking-related illness, assuming smoking continues at the current rate among U.S. youth.
- Nearly 9 out of 10 lung cancers are caused by smoking. Lung cancer is the leading cause of cancer death among adults in the United States.
- Smoking causes cancer, heart disease, stroke, lung disease, diabetes, and chronic obstructive pulmonary disease (COPD), which includes emphysema and chronic bronchitis.
- Nearly 8 out of 10 COPD (Chronic Obstructive Pulmonary Disease) deaths are a result of smoking.

Smokers are 30% to 40% more likely to develop type 2 diabetes than nonsmokers.

Smoking also increases risk for tuberculosis, certain eye diseases, and problems of the immune system, including rheumatoid arthritis.

Smoking is a known cause of erectile dysfunction in males.

Smoking makes the heart beat faster, raises blood pressure and increases the risk of hypertension and clogged arteries.

Smoking can damage blood vessel walls, making it difficult for the heart to pump blood to the extremities.

One cigarette can reduce your life by 7 to 11 minutes.

For every person who dies because of smoking, at least 30 people live with a serious smoking-related illness.

### DEADLY ADDICTION

Nicotine is the chemical in tobacco that is addictive. It is an addictive as heroin.

More than 4 in 10 (42.7%) adult cigarette smokers have made an attempt to quit in the past year.

Nearly 7 in 10 (68.5%) adult cigarette smokers want to stop smoking.

There are approximately 600 ingredients in cigarettes. When burned, they create more than 4,000 chemicals. At least 69 of these chemicals are known to cause cancer, and many are poisonous. Here are a few of the chemicals in tobacco smoke, and other places they are found:

**Asbestos:** Found in wall paper, vermiculite, talc, and asbestos.

**Barbiturates:** Used in medicine.

**Benzene:** Used in gasoline, rubber, and other products.

**Carbon monoxide:** Found in car exhaust, and other sources.

**Chromium VI:** Found in pigments, dyes, and other products.

**Formaldehyde:** Found in embalming fluid, and other products.

**Lead:** Found in batteries, and other products.

**Nicotine:** Found in tobacco, and other products.

**Polonium-210:** Found in tobacco, and other products.

**Radon:** Found in radon gas, and other products.

**Thorium:** Found in thorium, and other products.

**Uranium:** Found in uranium, and other products.

### SECONDHAND SMOKE

Nonsmokers who are exposed to secondhand smoke at home or work increase their lung cancer risk by 20-30%. A increase their heart disease risk by 25-30%.

More than 33,000 nonsmokers die every year in the United States from coronary heart disease caused by exposure to secondhand smoke.

Each year, primarily because of exposure to secondhand smoke, an estimated 3,000 nonsmoking Americans die of lung cancer. Children who breathe secondhand smoke are sick more often with bronchitis, pneumonia, and ear infections.

### SMOKELESS TOBACCO

Smokeless tobacco is tobacco that is not burned. It includes chewing tobacco, dip, snuff, and betel quid.

A 2-cans-week snuff dipper gets as much nicotine as a person who smokes 1 1/2 packs a day.

Causes tooth decay and gums to pull away from your teeth.

At least 28 chemicals in these products have been found to cause cancer, including esophageal cancer, mouth cancer and pancreatic cancer.

Also causes heart disease, gum disease, and oral lesions other than precancerous white patches in the mouth.

1 can of dip = 80 cigarettes

## EVERY 6 SECONDS

### ONE PERSON DIES FROM A TOBACCO RELATED DISEASE

### HEALTH BENEFITS OF QUITTING

- 20 minutes after quitting...Your heart rate and blood pressure drop.
- 12 hours after quitting...The carbon monoxide level in your blood drops to normal.
- 2 weeks to 3 months after quitting...Your circulation improves and your lung function increases.
- 1 to 9 months after quitting...Coughing and shortness of breath decrease.
- 1 year after quitting...The excess risk of coronary heart disease is half that of a continuing smoker.
- 5 years after quitting...Risk of cancer of the mouth, throat, esophagus, and bladder are cut in half. Cervical cancer risk falls to that of a non-smoker. Stroke risk can fall to that of a non-smoker after 2-5 years.
- 10 years after quitting...The risk of dying from lung cancer is about half that of a person who is still smoking.
- 15 years after quitting...The risk of coronary heart disease is that of a non-smoker's.

## If you haven't started, DON'T

Any type of tobacco use is unhealthy. Smoking stinks! Smoking gives you bad breath and makes your hair and clothes stink. Tobacco makes you look bad, prematurely aging your skin and turning your teeth yellow. Tobacco is a waste of your money, costing you \$100's a month once addicted.

**IF YOU DO HAVE A PROBLEM WITH TOBACCO AND NEED HELP QUITTING, CONSULT YOUR PERSONAL HEALTH CARE PROVIDER OR CONTACT THE CDC AT 1-800-QUIT-NOW**

### SMOKELESS TOBACCO CONSEQUENCES 3-D DISPLAY

- Perfect for class presentations and health fairs, this 3-D display (28" x 27" opened) highlights some the negative health consequences associated with smokeless tobacco use
- Featuring eight permanently affixed, painted models, the display highlights multiple forms of cancer, heart disease, stroke, and unpleasant oral conditions and diseases
- Easy-to-understand text explains how smokeless tobacco use causes each condition
- A great way to spread the message that spit tobacco is not a safe alternative to smoking
- Display comes in a convenient, self-contained carrying case

ITEM #11734 **ONLY \$825.00**

### TOBACCO INGREDIENTS

- This eye-catching clear plexiglas display resembles a cigarette and allows viewers to see what is really inside tobacco smoke
- The toxic chemicals found in tobacco smoke are common and grossly unappealing substances
- Includes: two-sided tent card
- For All Ages
- Measures 24.75" x 3.5"

ITEM #85-ND79260-D **ONLY \$329.95**

### LIFE OR DEATH LUNGS

- BIOLIKE 2™ lungs give viewers a shocking, graphic view of the damage smoking causes
- The healthy lung is pink and free of abnormalities
- In contrast, the diseased lung is black, has a large grayish-white cancerous mass, and is covered with spongy bubbles caused by emphysema
- Healthy lung is 5" x 8 1/2" x 4"
- Diseased lung is 5 1/2" x 8 1/2" x 5"

ITEM #79826 **ONLY \$399.95**

### SHORTNESS-OF-BREATH CIGARETTE

- When the user breathes in and out through this simple hollow, plastic "cigarette," slight air hunger is immediate, simulating the air restriction common in smokers
- Cigarettes are made of durable plastic
- 4" long • Sold in Sets of 20

ITEM #85-79709-D **ONLY \$79.95**

### DEATH OF A LUNG

- When a student or patient can see a realistic model of lung tissue affected by smoking, the impact is stronger than any words or picture
- Cast from real specimens, these three hand-painted models represent a normal lung, a lung with emphysema, and a lung with cancer
- Cast from real specimens
- Hand-painted • 9" x 12"

ITEM #85-79148-D **STARTING AT \$239.95**

## SMOKING AND YOUR BABY

**Smoking and Your Baby**

Smoking during and after pregnancy puts both you and your baby at risk for serious health problems. Many of these problems may be life threatening.

Regular prenatal visits at every 4-6 weeks (including early and late prenatal visits) are important. Your doctor will be able to see your unborn child through the placenta. Your doctor will monitor your baby's growth and weight.

**Effects During Pregnancy**

- Smoking during pregnancy increases your chance of developing some conditions, such as:
  - miscarriage
  - placental problems
  - preterm labor
  - low birth weight

**Effects After Birth**

Teenagers and young children who are exposed to tobacco smoke are also at the risk of developing health problems. These children have a greater risk for:
 

- asthma
- bronchitis
- premature death
- heart disease
- stroke
- middle ear infection

**No amount of smoking is safe during pregnancy.**

**Dangers of Low Birthweight**

Some women may incorrectly think the birthweight is something you can control. In fact, low birthweight is a factor in more than half of all infant deaths.

**The risk of dying from SIDS is higher for babies exposed to tobacco smoke.**

**The most effective way to reduce your child's risk of developing any of these problems is to stop smoking.** Contact your healthcare provider for more information about programs to help you quit.

**Some problems caused by tobacco to babies can be prevented or lessened by treatment. They may occur later in your child's life. These include:**

- delayed language development
- decreased IQ
- increased risk for behavioral and psychological problems
- increased likelihood of developing attention deficit disorder (ADD)

- Outlines the hazards of smoking during and after pregnancy
- Includes 25 minitexts • 43.5" x 22.5" • Case Sold Separately

**DISPLAY ITEM # 85-79022-D \$229.95**      **CASE ITEM # 85-79590-D \$89.95**

# DRUNK BUSTERS IMPAIRMENT GOGGLES

EXPERIENCE THE IMPACT OF IMPAIRMENT- SAFELY

## Drunk Busters Impairment Goggles

- Now available in five different BAC configurations, Drunk Buster impairment goggles are the most affordable on the market • These best-selling goggles let participants safely experience how impairment from alcohol or drugs can affect coordination, reaction time, balance, and judgment
- Designed for hands-on learning, the goggles simulate various levels of intoxication and distraction to demonstrate the dangers of impaired driving, decision-making, and physical movement
- Ideal for schools, safety programs, law enforcement demonstrations, and prevention education, each goggle is color-coded to represent a specific impairment level • Use them during walk-the-line tests, obstacle courses, or task-based activities for maximum engagement
- Each goggle includes a cloth carrying bag, an instructor guide, and a full 5-year manufacturer's warranty (excluding normal wear and tear)

### BAC Range Daytime

BAC .04-.06	ITEM # 243001
BAC .08-.15	ITEM # 243003
BAC .26-.35	ITEM # 243005

### BAC Range Nighttime

BAC .06-.08	ITEM # 243002
BAC .15-.25	ITEM # 243004

**ONLY \$115.00 EACH**

## HANDS-ON ACTIVITIES TO ENHANCE DRUNK BUSTERS GOGGLE DEMONSTRATIONS:

### Drunk Busters Challenge Activity Mat with Steering Wheel

- Make alcohol and drug prevention lessons interactive and impactful with the Drunk Busters Challenge Activity Mat
- Students follow a guided path with tasks like walking heel-to-toe or retrieving an object—all while wearing simulation goggles
- The activity promotes critical thinking, motor skills awareness, and real-world decision-making in a controlled, engaging setting

Includes:

- 6' x 12' vinyl Drunk Busters Challenge Activity Mat
- Drunk Busters Steering Wheel
- 1-Drunk Busters Goggle (.08-.15 BAC Level)
- Instructor's Guide

ITEM # 13465 Mat \$439.00

**ONLY \$439.00**

### Drunk Busters Field Sobriety Test Mat

- Bring real-world learning into your prevention programs with the Drunk Busters Field Sobriety Test Mat
- Designed for use with any Drunk Busters Impairment Goggles, this vinyl mat helps simulate field sobriety tests commonly used by law enforcement • Students or participants attempt a heel-to-toe walk along the printed line while wearing goggles that simulate alcohol or drug impairment • The activity highlights the dangerous effects of impaired coordination, balance, and perception—making it ideal for schools, driver's education, safety fairs, and law enforcement demonstrations

Includes:

- 4' x 12' vinyl Drunk Busters Sobriety Test Mat
- Drunk Busters Steering Wheel
- Instructor's Guide
- Goggles sold separately

ITEM # 23465 Mat \$319.00

**ONLY \$319.00**

### Boozed & Confused Nighttime Goggles Game Kit

- The Boozed & Confused Nighttime Goggles demonstrate how alcohol affects depth perception, reaction time, and coordination. (Although the goggles provide an intense experience, they do not represent a particular blood alcohol concentration)

- Complete Game Kit includes two sets of Boozed & Confused Nighttime Goggles, ten stress balls, six flash lights, two plastic bowling balls, a set of ten plastic bowling pins, a roll of tape, and a comprehensive guide with engaging activities
