Introduction

Give your footages the perfect cinematic look with Famous Hollywood Movie Loots Bundle. The LUTS are based on the most famous movies and will make your videos really stand out.

What Are LUTs?
LUT stands for "look-up table." A LUT is a tool that lets filmmakers, editors, and colorists save particular color grades as a template. Think of a LUT as a color preset that a filmmaker can readily turn to when working on a project.

Why Use LUTs?
Filmmakers, colorists, and editors use LUTs because they are convenient. Rather than creating an entire color space from scratch every time you work on a video editing project, you can facilitate the color grading process by applying a LUT that comes with preset color profiles.

Color grading can be a time-consuming part of the post-production process, which is why many directors and colorists rely on a look-up table, or LUT, to save a particular color as a template for later use.

Our LUTs are designed to instantly, with one click, tie your entire edited film sequence of shots together, resulting in beautiful, cohesive cinematic grades. They integrate advanced color into your project, delivering precise color palette across your film. All of this without having any color grading experience needed.

FEATURES

- 125 Hollywood Movie Titles
- 855 Hollywood Movie LUTS
- Top movies like: 1917, Avatar, Birdman, Black Widow, Capone, Creed, Fast and Furious, Gemini Man, Iron Man, John Wick, Joker, Logan, No Time to Die, Papillon, Parasite, Star Wars, Terminator, The Revenant, Train to Busan etc…
- Compatible with Adobe Premiere Pro/After Effects/Elements, Final Cut Pro X, DaVinci Resolve (All Versions) on Mac and Windows
- Handcrafted for professionals and beginners
- Simple installation (Adobe Premiere Pro all LUT-s one click Instalation)

The main thing to note is that these LUTs were designed for Log footage. That means they were designed to be applied to footage with a significantly flat look. So, if you're shooting on a more standard color curve, these LUTs could be too intense when applied to your footage. Just keep that in mind!

But, there's a great simple solution even for this. At Lumetri Color Panel, click on Creative and you'll see an INTENSITY slider, just play with in toward positive or negative values in order to make the effects lighter or stronger. The whole procedure and much more you will find in Video Help file when purchasing our LUT bundle. The tutorial includes also specific area color adjustment in order of getting the best possible result using your footages.

See our catalog with all the examples and results of using each LUT individually.

Refinement / Filtering

There's always a step further in enhancing your videos. Whether you want to add extra emotion, light leaks etc .. you can achieve them easily using our **Ultimate Video FX .Mogrt**

So, what is it?
The UltimateVideoFX consists 5 packages with over 150 effects you'll need to give your video that enhanced pro look.

Effects included but not limited in our package are: Color refinement with EMOTIONS package, over 65 unique Light Leaks and transitions, Optical Flares and under DECORATIVE pack you can choose cinematic widescreen, vignette, viewfinder, scanline and more. Adding text in your composition has never been easier as with our TEXT pack.

EMOTIONS

Your video color grading tool where you can apply everything from gradient, tones, masks, grains. You can even combine effects with each other making them softer using opacity this way creating new unique looks.

FEATURES

Over 52 amazing Gradients
Give your video that special look with over 52 gradients. Use a mask tool to blend effects with original colors of your video leaving partially new look with your existing colors.

20 Ambience effects
Overlaying a single tone to your video can make huge difference, thus we carefully choose a range of darken, lighten cold and warm tonalities.

20 Ambience Graadients / Ramps
Sometimes all your video need is just a touch of effect on the top and the final result will be huge. We call this "Small touch - Big Impact"

4 Grain overlays for video editors

If you want to see all effects in action you can do it by visiting www.ultimatevideofx.net and click on Ultimate Video FX .Mogrt
