FOR COZY SPACE

The dormitory is a completely new experience. It's really fun, but you need to enjoy your own space, and in order to that – it's worth taking care of what provides comfort!

We share tips on how to ensure comfort without much effort and expense:

Soft, warm blanket. This is probably one of the most used items at home!

Take care of the lighting! When outside it is gloomy and grey, our mood changes, but everything can be improved with the help of light.

The object that provides home cosiness and warmth is a rug. Create the mood of the room with the help of colours and texture.

A plant. Even photos become more beautiful when we see plants in the background. Did you know that living plants are not only a great element of decor, but also an oxygen filter?

Curtains provide privacy as well as night lighting that you may need during the day to relax after a party or a sleepless night at the library.

One of the most popular student items only after moving to the Student House – storage boxes!
