Trapeze Ladder

The trapeze ladder is a special fitness device for performing hanging. The hang is a basic free-weight exercise, which in fact strengthens the entire musculature of the body. The trapeze ladder, unlike the horizontal ladder, also has ascending sections, which, when suspended, provide users with a greater level of difficulty, making the workout more enjoyable.

Material specification

The element is made of high quality S235 steel, which has been cleaned via sandblasting. A corrosion resistant powder coating finish is then applied. Also available with galvanized surface for even greater protection and longevity!

The clamp system allows for easy assembly and extreme stability.

connecting ments are fastened with stainless vandal-proof screws and nuts.

The ends of the bars and posts are sealed with injection-moulded plastic caps.
