Payment Methods

All orders are **C.O.D.** unless other arrangements are made at the time of the order. Some orders may require a 50% deposit at the time of order. Sign-Mart accepts Visa, MasterCard, Discover, Company check and cash.

Return Policy

If an item is to be returned call 800-533-9099 and ask for your sales person. You must have an RMA (return material authization) number before sending any items back to us. RMA numbers are good for 7 days from the date it is issued. Please furnish the invoice number and date.

Item returned that are not due to our error will be subject to a 25% restocking fee.

You must inform us about defects, shortages and exceptions within 5 days or orders will be considered complete. There are no returns after 15 days, unless approved by management. Any changes in the return policy must be approved by management

Technical Support

Our staff of factory trained technicians are ready to assist you please call, email Monday thru Friday 8am - 5pm or Saturday 9am - 12:30pm PST. We will respond as quickly as possible.

Customer Supplied Material

Sign-Mart welcomes work produced or cut on customer supplied materials and will discount our prices accordingly. However, **SIGN-MART WILL NOT ACCEPT RESPONSIBILITY FOR RE-PLACEMENT MATERIALS DUE TO ERRORS OR COMPUTER FAILURE BEYOND OUR CONTROL.** Excess material should always be supplied to ensure complete order.

Shipping

Standard shipping for most orders is **UPS** unless otherwise requested. Shipping and handling rates are based on order weight and UPS zones. We are not responsible for FedEx or other carrier errors. **IF CRATING OR SPECIAL PACKAGING IS REQUIRED FOR PROPER SHIPPING, CUSTOMERS WILL BE CHARED ACCORDINGLY. FedEx** will not accept cash for a COD order. Payments can be made with a company check or money order

SIGN MART

We aim to be your single, trusted source for sign supplies, fabrication, service, and expert advice.

To Our Valued Customers,

Over the last 48 years of service to the sign and graphics industries, Sign-Mart has grown and diversified into one of the most complete graphic / sign production facilities in the country, offering you a truly single source for all your graphics and sign requirements. Our new catalog is the most extensive accumulation of supplies, banner and fabrication information Sign-Mart has ever assembled. We hope our "Best Single Source" motto is reflected in our new catalog. Your comments are always welcomed and appreciated.

Today, as one of new owners and CEO, I'm honored to carry forward the legacy built by Gene Sobel and the incredible team that shaped Sign Mart's foundation. Our mission remains clear to empower sign professionals with the highest quality products, cutting-edge technology, and unmatched service. We continue to innovate, expand, and support our customers—because at Sign Mart, your success is our sign of excellence.

Yours Truly,
JD Savaliya, CEO

Fluorescent Films

With the longest outdoor durability rating in the industry (2 YEARS) this premium cast, high-gloss fluorescent film is ideal for graphics requiring special, high impact visibility. ORAFOL® 7510 is a cast film with excellent cutting, weeding, application and conformability characteristics. Especially effective in twilight and poor visibility conditions, it's ideal for short term vehicle and bus advertising, point-of-purchase displays, labels, decals, and other retail applications.

ORAFOL® Series 970RA

Wrapping Cast with Rapid Air NOT FOR PRINTING

4mil Cast Wrapping Film with Rapid Air Technology, Repositionable Solvent Adhesive and an 84lb Silicone coated liner. 970RA offers a fast and reliable way to fully wrap vehicles in standard matte & glossy, glossy matte metallic, and super matte (Black only). This durable film is ideal for long term fleet and motorsport marketing applications and provides a lightweight, economical alternative to paint. Multi-layered, high performance cast PVC film, engineered to the highest technological standards. Designed for car wrapping applications, without the need for top lamination. The RapidAir® technology enables easy and quick application, without air inclusion, especially in large scale applications. The special adhesive enables adhesion onto lacquered surfaces, as well as uneven and corrugated surfaces. For more curved surfaces, or corrugations and rivets, the product should be worked in, cut and applied with an overlap at the edge. The material is easy to remove with the appropriate removal equipment. Durability for Black and White 10 years. Available in 96 colors and 8 Metallic colors – we can Special Order

ORAFOL® Series 975

Carbon Fiber

Transparent solvent based, repositionable adhesive backed 90lb. PE coated silicone liner. 975 Carbon Fiber provides exceptional dimensional stability and conformability over uneven, arched or curved surfaces, as well as flat applications.

This 5mil Cast film offers an easy, fast and reliable way for professional restylers and sign shops to customize standard vehicles with high tech effects. This 975 series has a textured surface specially developed for exterior automotive accent restyling and interior applications for fine detailing. 975 is also recommended for many other Carbon Fiber applications within interior design, craft & hobby and surface effects markets.

*All other colors are available by special order.

ORAFOL® with Proslide® Adhesive

What does that mean? Proslide® adhesive is a very repositionable vehicle wrap cast material. The adhesive has low initial tack to the vehicle surface, allowing it to slide up and down, and side to side easily.

Orafol offers a wide range of professional films for complete and partial vehicle wraps, including Commandform films for the most demanding applications (including boat wraps) and new RapidAir films with advanced air channel technology for quick and easy installations. All Orafol wrapping films are splice free and feature a repositionable grey tinted adhesive, removability for up to 4 years with outstanding print quality.

GENERAL FORMULATIONS
223

Semi Rigid White Matte PVC

- 6mil thickness
- Removable Adhesive

Latex | Solvent | Eco-Solvent | UV Curable

General Formulations 223 is a 6mil premium white matte semi rigid calendared vinyl film coated with a removable acrylic pressure sensitive adhesive.

General Formulations 223 is a high performance removable decal film designed for ease of application of temporary interior or exterior signage, decals, nameplates, die-cut letters and point-of-purchase displays. General Formulations 223 is the ideal media for temporary store front applications requiring bond to windows. This media may also be used on smooth surfaces such as metals, painted metals and certain high energy plastics. Not designed for coated / sealed / treated stainless steel, brass or bronze surfaces.

Item #223 - 54   *Revised 5-2025*

GENERAL FORMULATIONS 207
Clear Static Cling Vinyl

General Formulations 207 is a 7.0 mil premium clear highly plasticized flexible calendered vinyl film laminated to a 90# Lay flat liner. This film is designed to accept a variety of solvent-based inkjet and UV curable inks common to wide format digital printing systems.

General Formulations may be used for temporary applications to exterior glass, up to 3 months. Temperature, wind and rain may also limit the bond of static cling vinyl to exterior windows. Clear static cling can yellow with prolonged exposure to UV radiation.

The surface must be clean, smooth and as close to room temperature as possible. Cold surfaces reduce the cling of the vinyl. Small decals may be applied dry. Large decals should be applied by wetting the substrate and the decal with glass cleaner. Use a roller to smooth the decal onto the substrate.

Revised 5-2025

GraphiTex 234

Fabric Wall Graphics

General Formulations 234 is designed for temporary application of decals and graphics to most types of painted interior walls. This includes most flat, semi gloss and gloss paint finishes. Decals may also be applied to sealed wall coverings. The surface must be smooth and clean prior to application.

Not designed for coated, sealed, treated stainless steel, brass or bronze surfaces

7mil premium white matte coated polyester fabric with an acrylic removable pressure sensitive adhesive backed by a 90# Lay flat liner. The combination of fabric and adhesive allows removability of this product from normal wall surfaces. The 90# Lay flat release liner provides excellent stability for processing using standard solvent, eco-solvent, UV curable and latex.

Photo Tex
Self Adhesive 6 mil Fabric

This Adhesive Fabric Media is compatible with pigment, water based, solvent, eco-solvent, latex and UV- inks. This fabric gives you vivid, sharp print results with brilliant colors! The Adhesive is Re-movable and Re-usable also Re-positional. Photo Tex patented characteristics separate itself from any other product on the market. Photo Tex will stick to virtually any surface and can be easily removed with 99% no residue. The material does not rip or wrinkle. Results will vary on stucco and eggshell painted surfaces.Not recommended for brick or non-painted cement surfaces or heavy painted spackled wall board. Make sure you allow 30-days on newly painted surfaces for out-gassing. Also, always check the heat setting on UV and UV curable printers as to not over heat the adhesive an alter its tack. Do not oversaturated UV inks and in certain cases you may need to leave up to a 1" boarder.

MAGHOLD

MAGNETIC RECEPTIVE SYSTEM FOR CHANGEABLE GRAPHICS

Our 10 mil magnetic graphic system is comprised of Magnetic Receptive Sheeting and Magnet material with an Adhesive backing. Use the Magnet with adhesive as the base layer and simply put the printed Receptive Sheeting on top; the receptive sheets can be layered up to 4 sheets on top of the Magnet. This provides a multitude of magnetic solutions for graphic displays of all sizes ranging from Menu Boards, Directional Signs, Museum Exhibits, Calendars, Trade Shows, P.O.P. Displays, full-wall mural graphics, signs where the basic information remains the same but dates, prices, specials need to be changed, all with easy installation and changeability. The Receptive Sheeting can be printed with **Solvent, Eco-Solvent, UV, and Latex Ink Systems.**

GENERAL FORMULATIONS

AVERY Gloss Clear Laminate
DOL 1060 Z

• 2.1mil High gloss finish
• Excellent dimensional stability
• Protects image from scratches
• Enhances color and depth of image
• Aids in application of printed graphics
• Superior conformability to irregular substrates
• Dimensionally stable liner for easy converting
• Outstanding durability & outdoor performance
• UV | temperature | humidity | salt spray resistance

Avery DOL 1060 gloss clear cast vinyl is a premium quality, flexible high gloss vinyl film designed as a protective overlaminate film for screen and digital printed decals. DOL 1060 offers an exceptional value for applications requiring glossy colors and durability. This product can also be used as an overlaminate for floor graphics.

54" x 150' | *$642.99* | Item #6469

AVERY Premium Clear Cast Laminate
DOL 1360

• High gloss finish (DOL 1360)
• Excellent dimensional stability
• Protects image from scratches
• Enhances color and depth of image
• Aids in application of printed graphics
• Superior conformability to irregular substrates
• Dimensionally stable liner for easy converting
• Outstanding durability & outdoor performance
• UV | temperature | humidity | salt spray resistance

Avery DOL 1360 clear cast vinyl is premium quality, ultra thin and ultra conformable cast vinyl film designed for use as a protective overlaminate film for solvent, UV, latex and screen print inks. DOL 1360 offers an exceptional value, while providing excellent conformability, with abrasion resistance and durability. The gloss film now features a synthetic liner that creates a super smooth finish which provides an overall paint like finish of printed graphics.

54" x 150' | *$563.99* | Item #41027

GENERAL FORMULATIONS **103**

Textured Over - Laminating Film

Textured over-laminating film is **designed to protect digital image prints and screen printed images** for exhibit and display graphics. Can be used in most instances where an overlay with non-glare properties is required. This film can be applied to flat, curved or rolled display graphics.

General Formulations 103 Textured Overlaminating Film is a pressure sensitive 5.0 mil velvet / very fine matte polycarbonate film with the optically clear RD-60A, permanent acrylic adhesive with a 1.5 mil polyester film liner. This polycarbonate film offers protection from abrasion, moisture and other environmental exposures. This laminate is applied cold, no heat required.

GENERAL FORMULATIONS **211**

Gloss Clear Permanent Adhesive

Summary: General Formulations 211 is a 6 mil clear flexible polished calendared vinyl film with a slight texture **designed for use as the protective overlay for Traffic Graffic™** decals. The permanent acrylic pressure sensitive adhesive formulated for exceptional clarity.

General Formulations 211 is intended for use as the over-laminating film to produce Traffic Graffic™ floor decals. The adhesive is formulated to adhere to most common printing inks. However, specific formulations must be tested before use. Some ink may contain excessive flow additives that could reduce adhesion of this product. Test before production.

General Formulations 211 will function as a Traffic Graphic™ over-laminate for six month under normal use. Completely evaporate inkjet solvents before application. Failure to do so may facilitate solvent penetration resulting in vinyl degradation.

GENERAL FORMULATIONS **110**

EraseMark Pro

Commercial Grade Dry Erase Laminate with Permanent Adhesive

2-mil clear polyester laminate with a high performance hard coated engineered surface. The scratch and abrasion resistant polyester film is coated with a permanent solvent acrylic pressure sensitive adhesive on a smooth paper liner. This film works well with quality dry erase markers and its anti-graffiti properties allows for easy removal of permanent markers and crayons. EraseMark Pro™ 110 has a 5 year interior durability with proper care and cleaning.

For best results, we suggest the following dry erase brand marking pens:
Expo Scents® (chisel point), Expo Bold color® (chisel Point), Expo regular® (chisel point) brand marking pens. It is recommended to use a microfiber cloth to clean the films surface.

DRYTAC®

Pro Tac Scribe

Dry Erase Film

• 2.5mil clear gloss
• Permanent adhesive
• Provides UV protection
• Use low odor dry erase pens
• No liquid for removal of markings
• Always test print sample piece first

54" x 164' | *$365.99* | Item #PSC51164
Revised 6-2025

PermaFlex

Textured Laminate

PermaFlex is a 5 mil. Clear PVC film with a luster textured finish to eliminate glare, and is suitable for indoor and outdoor applications. PermaFlex provides protection from abrasion and moisture and helps slow color fade from UV exposure. The durability of the printed image is dependent on the type of ink and media used.

PermaFlex can also be used as a Floor Graphic laminate. Exceeds industry standards for slip resistance, when tested according to BS7976-2.

The outdoor durability in vertical applications is 3 years and indoor vertical applications is 5 years. Indoor floors durability is 1–3 years depending on traffic.

FEATURED PRODUCT!

Nikkalite
ANTI-GRAFFITI F-CAL
Over Lamination

Technologically superior, wipe off permanent markers with just a soft cloth. Spray paint is easily removed with any liquid graffiti remover and a soft cloth. Extremely solvent resistant; paint stripper will not eat through the film.

F-Cal has a unique surface that allows most pressure sensitive materials such as stickers and decals to be easily peeled off.

F-Cal is approved by the Department of Transportation and holds the highest designation by Caltrans as a "Premium Protective" compared to a "standard protective".

BEFORE CLEANING   DURING CLEANING   AFTER CLEANING

IT'S TWO FILMS IN ONE!
A PREMIUM PROTECTIVE ANTI-GRAFFITI OVER-LAMINATE FILM WITH UV INHIBITORS.

VANDAL GUARD
Anti Graffiti Laminate / Dry Erase Laminate

- 1 mil
- High gloss finish
- Dry erasable surface
- Permanent acrylic adhesive
- Protects graphics from graffiti

NOT FOR USE ON CORRUGATED PLASTIC OR ACRYLIC

Vandal Guard™ Anti-Graffiti / Dry Erase Laminate is a specially formulated overlaminate designed to protect screen printed and digitally printed images and signs from a wide variety of stains and chemicals including paint and permanent marker. Graffiti can be easily removed using common economical cleaners without damaging or dulling the surface of the laminate

Graffiti - Resistant Surface: Spray paint and permanent marker easily wipes away with economical cleaners.

High Gloss Finish: Signs and graphics have a classy professional look with enhanced color and depth

Ultra Clear Permanent Adhesive : Long lasting bond to vinyl and / or substrate eliminating premature delamination and also allows for use with window perforated graphics on flat surfaces

Clear Poly Liner: Ultra smooth adhesive overlay eliminating "orange peel" often found on laminates with a paper liner

BANNER UPS CLEAR
POWERTAPE
HEM REINFORCING TAPE

Clear *PowerTape* – PTAPECLEAR
• New clear version of *PowerTape*
• Super strong single-sided tape
• Reinforces banner edges without folding a hem
• Great for double-sided printed banners
• Create a banner in only 3 minutes vs 15-20 minutes with old method of two sided tape & grommets

PTAPECLEAR   Packaging: 36 yards/roll: 5 rolls/case Size: 1.5" wide x 36 yard length

Size 1.5" W x 36 yards | *$28.99 each* | Item #PTAPECLEAR   *Revised 6-2025*

POWERTAPE – White PTAPE
HEM REINFORCING TAPE
• Single-sided superstrong tape
• No need to sew or fold a hem
• Create superstrong banners of any length in a few minutes
• Just apply over tabs along top and bottom edges, then punch hole
• *PowerTape* helps reduce edge curl

PTAPE   Packaging: 36 yards/roll; 5 rolls/case Roll Size: 1.5" wide x 36 yard length

Size 1.5" W x 36 yards | *$31.99 each* | Item #PTAPE   *Revised 6-2025*

MEGATAPE
HEM REINFORCING TAPE
• Double-sided version of *PowerTape*
• Use with tabs to create hurricane strength banners in minutes
• More than triple the strength of ordinary banner hem tapes
• Produces an attractive fold-finished banner edge
• See amazing 108mph wind test video at www.bannerups.com

MEGAT   Packaging: 30 yards/roll; 5 rolls/case Roll Size: 1.5" wide x 30 yard length

Size 1.5" W x 30 yards | *$34.99 each* | Item #MEGAT   *Revised 6-2025*

POWER PUNCH
• Heavy duty hole punch "right-sized" for Banner Ups center hole
• Cuts cleanly through tabs, tape and banner media
• Cuts 5/16" hole in tabs and heavy duty media with ease
• Wide jaw will easily punch clean hole in 4mm corrugated plastic
• Available discounted in convenient Starter Kit for "Banner Ups beginners"

$57.99 each | Item #BUPP | Replacement Die *$19.99 each* | Item #RDPP   *Revised 6-2025*

Stylon
banner stand

- Stylish design
- **Carrying case not included**
- Telescoping pole from 48" to 90" high

This stylish banner stand assembles in minutes without tools. A telescoping pole goes from 48" to 90" high. The 14" square metal base includes a spring bottom lock for solid structural support. This stand holds 1 banner that can be single or double sided. Grommets are required at the top of the sign at the 1" and 19" mark.

$35.99 each | Item #STYL-2   *Revised 6-2025*

Suggested banner size
20" wide x 48" to 90" tall
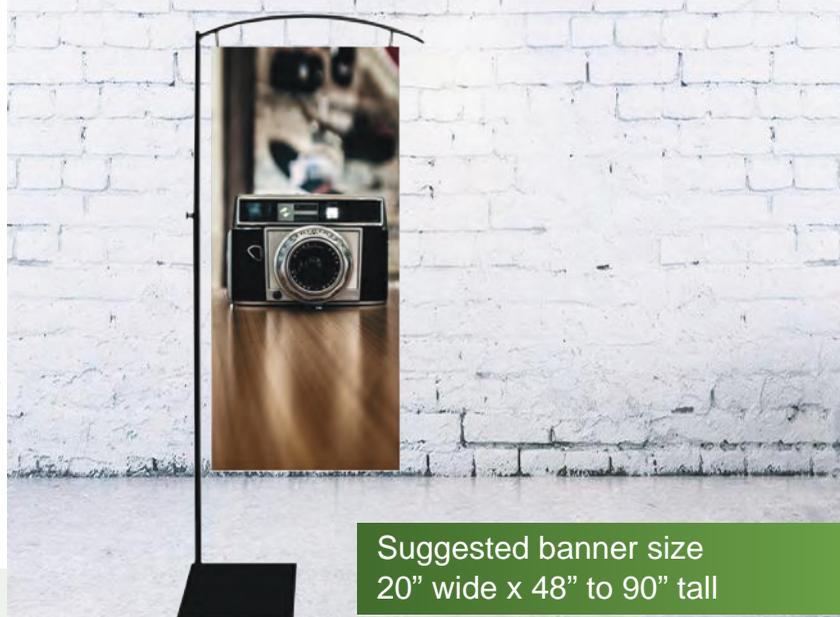

Presta
floor stand
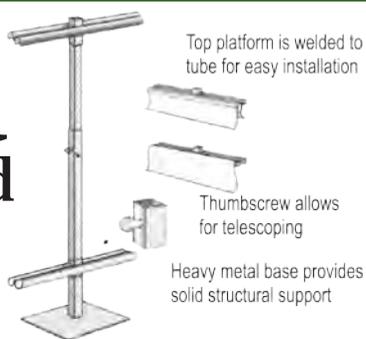

- Double sided
- Assembles in minutes
- 24" or 36" wide rod options
- Available in black and Chrome
- Adjustable height from 48" to 86"

Top platform is welded to tube for easy installation

Thumbscrew allows for telescoping

Heavy metal base provides solid structural support

$85.99 each   *Revised 6-2025*

Item #FS48   includes four 24" metal rods
Item #FS4836 includes four 36" metal rods

GAMMA
Outdoor Banner Display

The Gamma outdoor display banner stand is a heavy duty well contructed stand. Stability and strength are some of the great features. Each unit comes with a hollow base allowing water to be added for more stability. A single or double sided banner stand is available. An excellent option for outdoor use with banner materials, use #2 grommets in the corners.

Double Sided | **$105.99 each** | Item #SMODB2

SiGNMART

Banner Bracket System

The rust-free cast aluminum brackets in combination with the 3/4" solid fiberglass arms, allows the Bracket System to withstand most outdoor elements. This Hi-Tech Bracket is built with a 1º angle to keep the banner tight. The fiberglass arms will give in the wind, reducing the wind pressure on the banner. The arms are permanently **EPOXY GLUED** into the aluminum brackets. This prevents any wearing of the fiberglass rod.

Single pole consists of:
• 4 40" stainless steel bands
• 2 Single aluminum brackets
• 2 Fiberglass poles end caps

Very Important!
Subtract 3" from your pole size for max banner width.
For example: a 40" pole can be used for a 36" wide banner.

Double Pole consists of:
• 4 40" stainless steel bands
• 4 Fiberglass poles end caps
• 2 Double aluminum brackets

A 5% Discount with orders of 25 units or more. Please call for quotes on 100 units or more

SiGNMART

THE PATRIOT

36" Pole
usable pole length 33 1/2"

The Patriot Banner Bracket System consists of:
• 2 Large Pins
• 4 Strap Bands
• 2 Large Zip Ties
• 2 Black Fiberglass Poles
• 2 Cast Aluminum Brackets

The Patriot Banner Bracket is made from Cast Aluminum and the 3/4" Black poles are made from strong and light weight Fiberglass. The specially engineered springs allow the Patriot to adjust and withstand strong winds and the poles are designed to angle away from the banner keeping it nice and taut. This system is great for banners up to 25 square feet.

Important

To secure the banner to the pole, use zip ties through grommet holes then the gap between the pole and stainless steel band. Failure to secure banner may result in loss or damage. Do not allow banners to come into contact with high wires. It is important that brackets are mounted properly and are tight to insure the life of the banner. Check banners within 4 weeks of installation or first strong wind for needed adjustments.

$150.99 per set | Item #PBBS   *Revised 6-2025*

econo bracket system

All Rust Free Parts

LOOSE FIBERGLASS POLES WEAR DOWN AND CAN BREAK... BUT OUR 2 PART SYSTEM PREVENTS CHATTERING

Aluminum Bracket Construction | Mounting Straps are Stainless Steel Hardware for 2 part Bracket System is Stainless Steel Fiberglass Poles Unique two part bracket assembly totally prevents " Pole Chattering "

2 Part Aluminum Bracket System

Stainless Steel Nuts and Bolt

prevents chattering

Very Important!
Subtract 2" from your pole size for max banner width.

2 PART SYSTEM PREVENTS POLE CHATTERING

Each set contains:
• 2 Zip Ties
• 2 Cast Aluminum Brackets
• 4 Stainless Steel Band Straps
• 2 Stainless Steel Nuts and Bolts
• 2 Fiberglass 3/4" Poles with Tip Caps

Important!

To secure the banner to the pole, use zip ties (not included) through grommet holes then the gap between the pole and stainless steel band. Failure to secure banner may result in loss or damage. Do not allow banners to come into contact with high wires. It is important that brackets are mounted properly and are tight to insure the life of the banner. Check banners within 4 weeks of installation or first strong wind for needed adjustments.

The **Economy Bracket System** is not only a great price, it's also made with the same high quality materials than that of the more expensive banner systems. The Cast Aluminum bracket is 100% Rust Free! The 3/4" poles are made from strong and light weight Fiberglass. No need to be concerned about a loose connection or wear-n-tear on the pole, our two part system prevents "Pole Chatter".

2" OF POLE LENGTH IS USED FOR BRACKET ASSEMBLY

RAZZOR
liner cutting tool

• Cuts the liner and not the label
• Makes "cut and peel" liners on any brand
• Cuts only the top sheet of layers of newspaper, Kraft paper and butcher paper

The "RAZZOR" slitting tool is a precision, hand-held device utilizing a standard single edged razor blade. The blade depth adjustment is as simple as using a screw driver which can control the depth of cut to less than a thousandth of an inch. The blade can be mounted on either side of the unit, for either left hand or right hand operation.

$24.99 ea. | Item #TRLC

2+ $22.99 ea. *Revised 6-2025*

Expandable Pole
Slitter

• Cut by pushing or pulling
• Extends from 34" to 55" long

This extremely practical tool allows you to cut media across a table without having to lean or crawl.

Revised 6-2025

$49.99 ea. | Item # EXPS

Supreme-Pro
Liner Slitter

Made specifically to cut through just the liner side of any pressure sensitive vinyl films. No more risk of cutting through the film side of your vinyl while on its backing paper. Special Teflon coating allows the knife to slide across the adhesive side of the vinyl, gives you a clean and easy cut through the backing.

Ultimate Vehicle Wrap Knife

$19.99 ea. | Item # SLSK

Revised 6-2025

$14.99 ea. | Item #WRMG

3M Tape Primer 94

Use to improve vinyl adhesion where vinyl will be stretched and heated into concave areas. For best results, apply a thin layer of primer 94 over most of the concave area. For convex areas, apply a thin layer at the outer edge of the curve to prevent film edge lifting. Great for use on complex vehicle contours. Work with all brands of vinyl.

Finishing Styles

Street Banners - Style 08

Street or Boulevard banners have pole pockets top and bottom. **An optional two grommets are available to secure the banner to the aluminum bracket with nylon straps or wire. (straps not included)** Due to weather exposure, 16oz. or stronger banner material is highly recommended. Hemming the vertical side is optional but recommended when artwork allows.
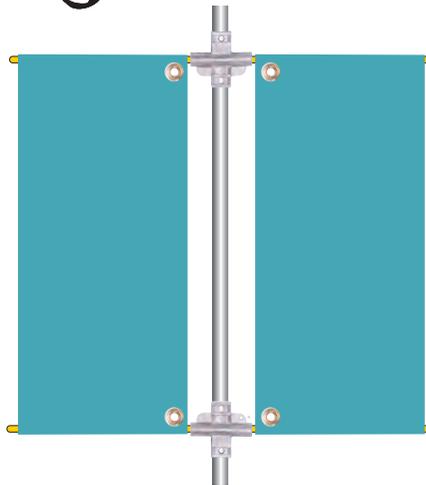

Sew extra 3/4" wide nylon webbing inside sleeve

Important
To secure the banner to the pole, use zip ties (not included) through grommet holes then the gap between the pole and stainless steel band. Failure to secure banner may result in loss or damage. Do not allow banners to come into contact with high wires. It is important that brackets are mounted properly and are tight to insure the life of the banner. Check banners within 4 weeks of installation or first strong wind for needed adjustments.

Reinforcing the sleeves with 3/4" nylon webbing is an option ($0.60 approximate cost per corner) and adds extra strength.
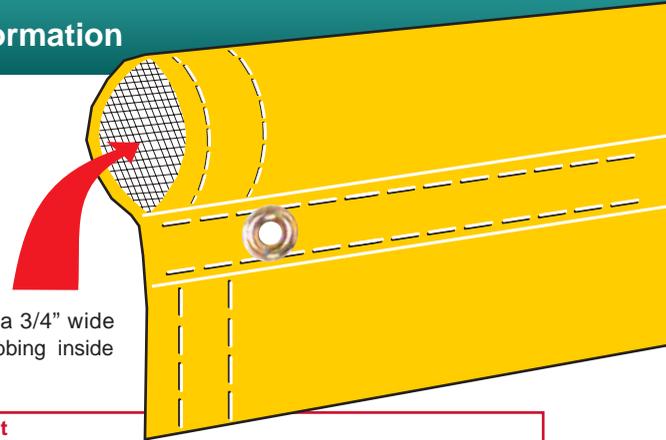

Snap Hooks-Style 09

The only professional method for hanging banners "Over the Street" or between any two unattached structures (poles, buildings, etc.). A steel wire cable must be installed between the structures and tightly secured.

Some city regulations require a cable for the top as well as the bottom of the banner. The metal Snap-Hooks **"SNAP"** over the cable and suspend the banner in the air. Usually 1/4" poly rope is tied to each of the top corners and extends to the side. This prevents the Banner from shifting left or right (see diagram below).
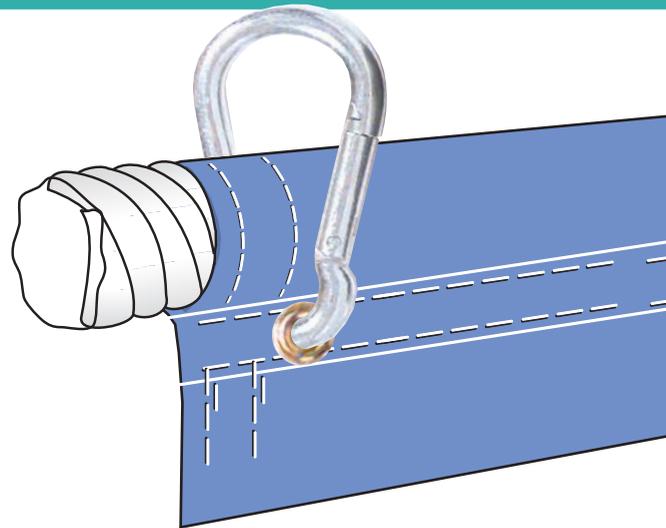

2 Methods for Attaching Snap-Hooks to Banners

1 Snap-Hooks attached through #2 or #3 grommets placed in the top hem of banner. 1/4" poly rope should be sewn into the top hem and the grommets are placed below the rope (see photo). This prevents the grommets from possibly ripping out.

Both variations can be repeated for the bottom of the banner, if required. If the bottom is not secured with a wire guide, we recommend sewing 1/4" poly rope through the bottom hem with extra rope to reach the supporting side structure (see diagram). Reinforcing both bottom corners is recommended.

2 Snap-Hooks sewn directly to the banner with Heavy-Duty webbing straps (see photo). With the method, webbing should also be sewn into the hem for extra added reinforcement.possibly ripping out.

Please Read

When determining banner prices: All linear measurments will be rounded up to the nearest foot. [A 3' x 6' 8" banner will be priced at 3' x 7'] When the banner includes **Sleeves**, the price is based upon the total length of the unfolded banner material. That measurement **Will be** rounded up to the nearest foot. All screen printed banner orders are sewn with chain stitch sewing machines.

All banners are fully hemmed (Standard hem 1")

Grommets every 2 1/2' approx. top and bottom (#1 & #2 grommets)

#3 & #4 grommets available at $.40 each

Min. charge based on 5 running feet

Sewn in 1/4" rope or 1" webbing-add $.30 per linear ft. 3/8" rope $.35 per linear ft.

Sewn in "D" rings add $2.50 for each ring

Sewn in clips add $2.50 for each clip

Pole pockets add $.20 for each running foot

Clear pockets add $1.00 per sq./ft. plus labor Please call for a quote

Reinforced corners $2.50 ea. corner

Quantity Discounts Must be same size and material.

Extra material from a banner order-hemmed only at $.75 per linear ft. & with hem and grommets $.75 per linear ft.

Be sure to **PRETEST** all materials for adhesion of graphics (Paint, Ink, or Vinyl before proceeding

Master Distributor For:

VALLEY FORGE

The Greatest Name In Flags

U.S. California

Perma-nyl

This Heavyweight DuPont Nylon is the most versatile and longest lasting nylon flag fabric available. Permanyl's combination of strength brilliant display, along with its quick drying ability, make it suitable for a wide range of applications. Great in rainy areas, its light weight and close weave enable it to fly in the slightest breeze, giving the fullest visual effect.

Koralex ll

Koralex ll represents new and improved flag fabric technology. Made of 100% spun polyester, its 2x2 ply construction combines durability, strength and flyability with a rich feel and look. These flags are ideal for extreme weather conditions without the excess weight for high wind areas.

Reel PRO

ReelPRO is an affordable, easy to install, easy to use take-up system which will allow you to take control of your workflow. At the heart of ReelPRO is a proprietary patent pending drive train developed by Supply 55 which provides superior performance and reliability.   ReelPRO will immediately start saving you money through improved efficiency when printing longer jobs: banners, vehicle wraps, wallpaper, signs, decals, etc.

- • Unattended printing
- • Avoid dust and dirt on printed images
- • Eliminate waste through improved workflow
- • Improve your profitability through improved efficiency
- • Stop kinking and scratching prints as they are moved from the printer to your work tables, or as they hit the floor
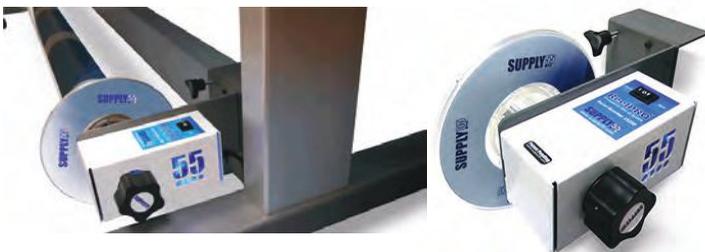

AVAILABLE THRU SPECIAL ORDER ONLY

Banner Pro

Are you tired of trying to fabricate your banners with cumbersome banner tape but are unwilling to spend $4,000 and up for the current heat based hemming systems? We are proud to offer the BannerPro banner welding system. The BannerPRO offers numerous capabilities including hemming for grommets, pole pockets and pocket sign fabrication, at a fraction of the cost of other hemming systems.   Take control of your jobs in-house with BannerPRO

[GRAND FORMAT]

LARGE AND GRAND FORMAT PRINTING

Our printing department has the latest technology in Flatbed printing. Our Vuteks print 50 - 4' x 8' sheets an hour, the color is beautiful and brilliant. With outstanding clarity, we are able to print as small as 4 point on any flat substrate up to 1.75 inches thick.

We have two EFI Vutek LX3 pro's with 8 colors plus white; our Flatbed printers also offer roll-to-roll printing up to 10 feet wide. With its powerful LED lights, your project is not only dried instantly, the LED's actually make it a "Green" process.
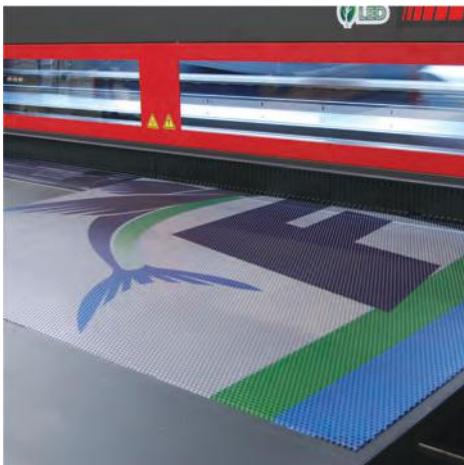

Direct to steel, customer provided 60" x 60" sheet.
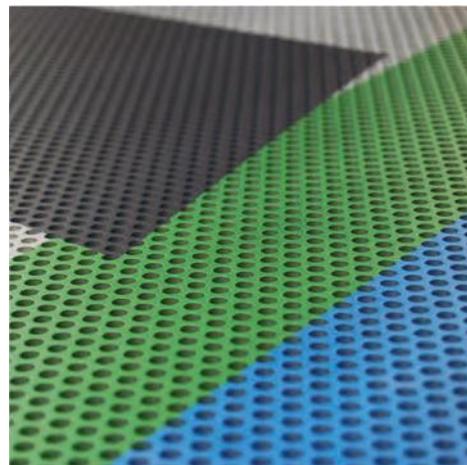

Direct to steel, customer provided 60" x 60" sheet.

48" x 96" sheets of Gator Foam with direct print.

ENGRAVING
ROTARY & LASER
ADA / BRAILLE
3D PRINTING

Our Engraving department has the experience to produce beautifully engraved signs and the expertise to handle any ADA project. Classic rotary engraving or the more advanced laser engraving is available. In addition to engraving we also do Tactile Raised Letters and Braille. We have a wide range of colors in our engraving material that we not only use on projects, but we also sell by the sheet.

Textur3D is a 3-dimensional printing process for a unique look and feel in addition to standard flat printing. With a printable area of 10"x24" it produces ADA compliant Braille and Signage on Wood, Metals, Ceramic, Acrylic and Glass.

ROUTING DEPARTMENT — AND — CUSTOM CUTTING

Projects that need dimension are exactly what we have our two Multi Cam CNC Routers and our new addition the 10' x 10' ZUND. One of our Multi Cams has a 5'x10' bed with an Icut, that enables the system to read exactly where it should make the cuts. The other Router has a 7'x12' bed for larger projects. When it comes to diversity no tool can compete. From Carved signs, Cut Out Letters, Decorative Shapes, Form Raised Signs and Intricate Inlays our expert technician is able to turn a flat substrate into a dimensional work of art.

Cut Letters on Ultra Foam with Brushed Aluminum Face. Letters are nested

SiBond first printed on our Flatbed then cut with our Multi Cam with Icut

LAMINATING AND MOUNTING DEPT.

In our Laminating & Mounting department your project will receive the perfect finishing touches. With our vast variety of substrates and many types of laminate available, you will have the best material to suit your project needs. Laminating and mounting are done by one of our two 60" Pneumatic (air driven) Laminators or by hand from our experienced and knowledgeable staff.

You can rest assured your project will be produced to a smooth, flat professional finish.

FABRICATION DEPT.

CUT TO SIZE SUBSTRATES

All Signage projects start with measurements. Fortunately for you this department has the knowledge and equipment to cut substrates to your exact specifications. We have the capacity to do Straight Cuts, Rounded Corners, Customs sizes and Drill Holes. Within the same area we have our Custom Acrylic Fabrication Dept. We can make Acrylic Display Boxes, Brochure Holders, Plaques and much more. And for the perfect finishing touch we can either Flame or Hand Polish the edges.
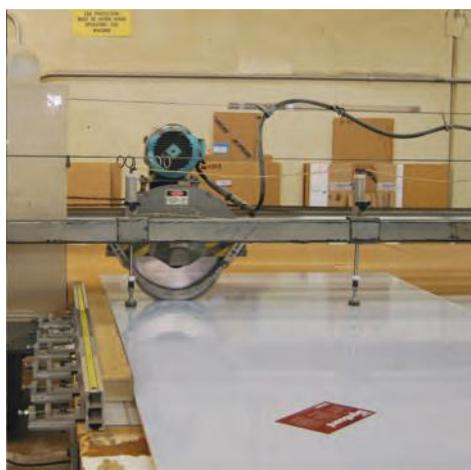

White Lexan cut with our Panel Saw and remeasured for accuracy

SiBond first printed on our Flatbed then cut to size with our 10' Metal Sheer

FINISHING DEPT.

The team in our Finishing Dept. is able to measure, cut and sew any size Banner, Flag or Fabric Display. Fabric Trade Show Displays come in many different shapes and sizes, and each display has a unique way of attaching to their frame.Tube frame display covers slip over the frame and are called Pillow Case Covers, they are closed with a Heavy Duty Zipper. Fabric Walls and Pop Up Displays can be attached with either Velcro or SEG. SEG stands for Silicone Edge fabric Graphics. We sew the SEG all around the edge, this makes the install and removal of the fabric very easy. It also gives a flat smooth face, perfect for Light Boxes.

13oz banner material edges sewn for strength with grommets added

Flag fabric sewn into a feather wind flag
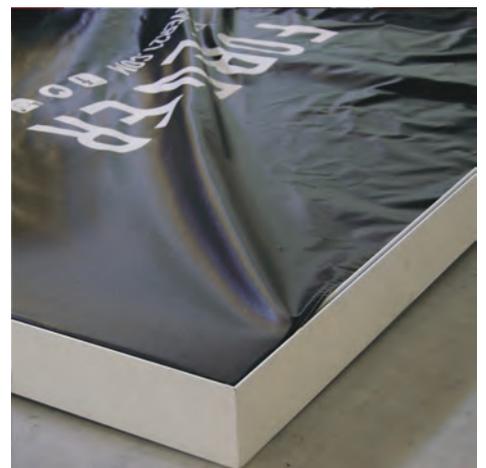

Martex printable fabric with SEG sewn in all around the edges
