BIKE**

1984

CIRCUIT EQUIPMENT was founded in 1984 by the dynamism of the tracks as a rider led him to learn and study the needs of the market. From there, in just a few years, his company became a reference. Due to its development, the company consolidated its presence and now has a presence in more than 50 countries worldwide. Today, the Circuit brand is present in all continents and is part of the most important world championships in Motocross, Supercross and Enduro. A wide range of products for motorcycles and bicycles.

amic owner Renato Breda. His involvement in motocross
ds in a constantly evolving environment.
a market leader in South America.
ts operations in Italy, the U.S., and the Middle East,
ith exclusive distributors.
and has a strong presence with riders and teams in the
supermoto, and Enduro, in addition to offering a wide

CF MOTO GRIPS

BUGGY

The Circuit Buggy Grips offer better grip, reducing the risk of slipping during riding on rough terrains, as well as providing greater comfort during the ride.

Compatibility:

Developed especially for CF Moto ATVs. However, it is adaptable to other models.

PART NUMBERS

MA097-001

OUTRIDER

The Circuit Outrider Grips offer better grip, reducing the risk of slipping during riding on rough terrains, as well as providing greater comfort during the ride.

Compatibility:

Developed especially for CF Moto ATVs. However, it is adaptable to other models.

PART NUMBERS

MA098-001

CIRCUIT 2025 GEAR SETS

JERSEY

Multifilament polyester mesh fabric with a Dry finish, designed to manage moisture by pulling sweat away from the skin to the surface of the fabric, allowing for faster evaporation and quicker drying of the fabric.

PANTS

Mesh fabric construction, providing a smooth and durable surface, with a resin finish, making it more resistant. The cutouts on the back rise are made of ripstop fabric, produced with polyester thread and high-tenacity finish. The cutouts in ribbed nylon mesh with elastane are used in strategic areas to offer flexibility and freedom of movement.

Internal knee cutouts in genuine leather, offering greater resistance and durability.

Internal lining fabric made of polyester mesh with Dry finish, providing moisture management.

2025 GLOVES

Developed especially to meet the demands of the best motorcycle riders. Seamless internally and padded in the palm area, preventing hand blisters and providing the best grip.

It features silicone applications on the index and middle fingers to improve performance when using the brake lever. It also has rubber protection on the top of the ring and middle fingers to ensure greater safety for the rider's hand and prevent injury when the brake lever is pulled with greater force. The index finger area is made with a special fabric to make it easier, if necessary, to clean the goggles when they get dirty.

KIRA LOCK-ON

Kira Lock-On

The Kira Lock-On Grips are designed for quick and secure installation, without the need of wire or glue. They feature an integrated mounting kit, making them compatible and adaptable to various off-road motorcycle models. Their "diamond" design with hexagons combines comfort and durability, using a soft and comfortable material in the hand contact area, while the ends are made from a rigid material to withstand impacts.

Compatibility:

Developed for off-road motorcycles, with superior performance that ensures better grip compared to the EVERYDAY line, but also adaptable to various on/off road, supermoto, and big trail bike models.

MA016-2B1 BK/DGY

MA016-23A GY/TT

CIRCUIT V

The Circuit V Racing grips are designed to enhance performance and experience in activities that require precise control, such as motorsports and high-performance activities.

Compatibility:

Developed for competition motorcycles (off-road), offering superior performance that ensures a better grip compared to the EVERYDAY line.

They are also adaptable to various on/off-road, supermoto, and big trail motorcycle models.
