## CONFIGURATIONS

### CATEGORY

Modular sofa and unlimited configurations.

### MATERIALS

Wooden pine structure with beech applications, high density foam (from 30 to 60 kg/m<sup>3</sup>), compartmented silicone hollow fiber backing (anti-mite and anti-allergy), seat cushions with silicone fiber and suspension with metal frame of steel springs of 3,8 mm.

Natural varnished beech wood legs, oak, walnut or wenge. All pieces of collections are risen from the ground 10 cm in order to facilitate cleaning.

### COMPOSITION

The collection allows infinite configurations and many possibilities to adapt to any space and project. Sofa, one arm module or armless, chaise longue and corner unit.

### FINISHES

The entire collection can be made with fabrics and leathers from any manufacturer or fabric designer. If preferred, it can be manufactured with the client's own fabric for greater customization.

### PRODUCTION PROCESS

The entire collection is made in a traditional way. Details and finishes are pampered so that the result is a unique and exclusive piece, designed and adapted for a specific space, project and client.

### STOCK

All our products are designed and manufactured on demand, from the structure to the thread, so the estimated delivery time is 5 weeks.

### MODULE (MBD)

measures 143 164 183 203 223 243

### MODULE (MBI)

measures 143 164 183 203 223 243

### CHAISE (CBD)

measures 160 180 200 220

### CHAISE (CBI)

measures 160 180 200 220

### CORNER (RD)

measure 95 x 186

### CORNER (RI)

measure 95 x 186

The different objects in the Boho Chic Collection allow a custom design configuration, offering to create different designs in order to adapt to the needs of the space.

# Warranty

GEMS certifies a warranty in the structure and finishes of all its products.

*Manufacturing by GEMS*

## **WARRANTY**

### **WOOD STRUCTURES**

Warranty of 10 or more years. Solid wood from sustainable forests is used, so the sofa can be reupholstered over and over again, and the structure will be unalterable over time.

### **SUSPENSION**

10-year or lifetime warranty. The 3.8mm zigzag steel spring frame reinforces the structure and guarantees the unalterable suspension over time.

### **SEAT CUSHIONS**

5-year warranty. High-density foam has high durability.

### **BACK CUSHIONS**

5-year warranty. The hollow fiber used in the manufacture has an exceptional and constant recovery coefficient over time, so, with minimal maintenance, the cushion will always be in perfect condition.

### **FABRIC**

Depending on the manufacturer, the warranty ranges from 2 to 5 years and covers manufacturing defects.

# Manufacturing

The materials used for the manufacture are of high quality and respectful with the environment

*Manufacturing by GEMS*

## MANUFACTURING

All the materials used in the manufacture of GEMS products are local and regional and meet all quality and guarantee specifications at the national and European level.

All structures in GEMS products are made of Flanders pine wood with beech inserts at certain points to reinforce the structure. All the wood used comes from sustainable forests where the trees consumed are replaced and are PEFC and FSC certified.

The suspension is made of a 3.8 mm thick zigzag steel spring frame, which gives the structure greater rigidity and makes it unalterable over time.

The entire structure is covered with high-density foam, variable from 30 to 60kg/m<sup>3</sup>. The adhesive product used in the production is water-based, without petroleum-based solvents.

The seat cushions are made of high-density foam and the level of hardness can be chosen from soft, medium or firm (medium is used as standard). The client can also opt for a memory foam or a feather cushion.

The back cushions are made up of a compartmentalized protective cover in anti-mite and anti-allergenic fabric, filled with silicone hollow fiber (acrylic, anti-allergenic and recyclable).

The legs are made of solid beech wood, and can be varnished in natural, oak, walnut or wenge color.
