SCREEN COLLECTION

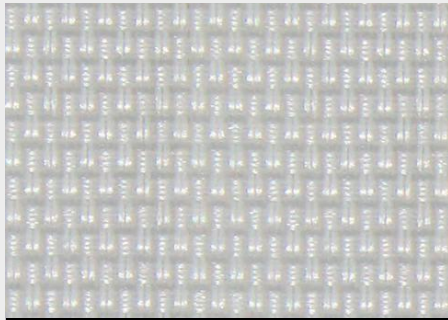

Eficiência tecnológica, isso é o básico que as telas solar inteligentes Uniflex oferecem. Todas as nossas coleções de tecidos Screen, tem obrigatoriamente que desempenhar o seu papel com eficácia. São variados os fatores de abertura das tramas e composições de fabricação que renderam importantes certificações nacionais e internacionais que garante essa eficiência.

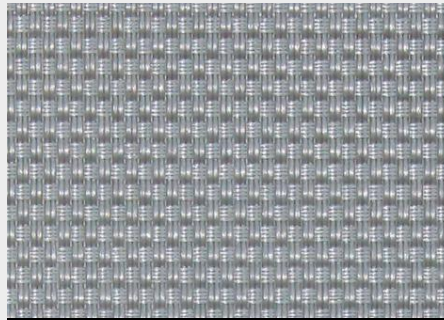

The image features a close-up, high-resolution view of a metallic woven fabric. The fabric has a complex, repeating geometric pattern that creates a shimmering, textured effect. A large, semi-transparent circular graphic is overlaid on the left side of the image, partially obscuring the fabric's texture. The overall color palette is a range of metallic grays, from light silvers to darker, more muted tones.
