ORGATEC 2022

We were super excited to attend Orgatec 2022 in October. A meeting point for all decision-makers in the world of offices and facilities, it is one of the leading international trade fairs for the modern working world.

The range of products on display included office furniture, flooring, acoustics, A/V technology and a whole host of products you'll need for your next workplace fit-out.

Christian and Natalie met with **Quinti** and **LD Seating**, two of our manufacturing partners to discuss product development, plan UK launch dates and research what's happening in the market, catch up with old friends and discover what's new!

ORGATEC 2022 ON TREND

As expected, with employees working here there and everywhere and still many questions about how much office space is needed, it wasn't a surprise that flexibility and multipurpose furniture would be one of the trends at this year's Orgatec Fair.

Wheels, castors and more wheels mainly on folding and flipper tables doubling up as whiteboards at every turn. In addition to all things mobile, meeting and phone booths were also highly visible and some of them were mobile too!

WHEELY GOOD SHOW
