of November 2024.

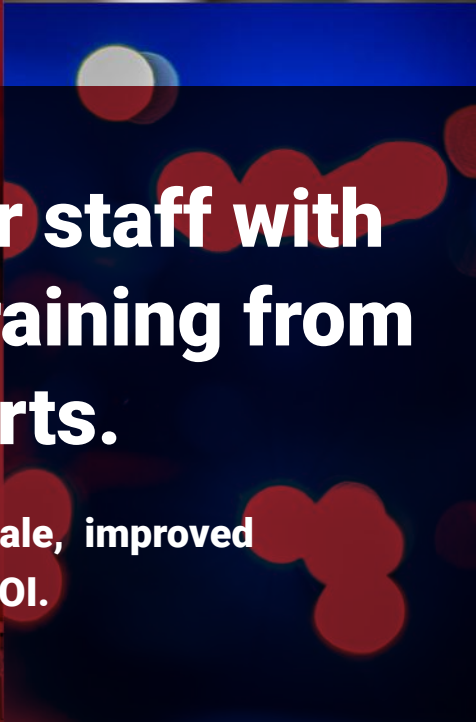

Version 3.1

*"It's not who you are that holds you back.
It's who you think you're not."*

Empower your staff with exceptional training from industry experts.

Better retention, better morale, improved productivity, and tangible ROI.

Foremost, it's about people.

NR Medical Training was founded by individuals with 40 years of collective experience in emergency and healthcare services, aiming to share their expertise, passion, and mentoring experiences with others.

Our mission is to empower learners with the knowledge and confidence to apply their skills in the real world. Our vision is to transform training services and become the preferred provider for businesses in the East of England and beyond. At NR Medical Training, our values guide us in everything we do. We believe in doing things with passion, which leads to greater motivation, improved performance, and positive impact on others. We also believe in thinking big and dreaming bigger, which pushes us to achieve our most ambitious goals. Integrity is non-negotiable for us, as it builds trust and maintains relationships. Quality always comes before quantity, as we strive for excellence in everything we do. And finally, we believe in "serve to lead," which means putting others' needs first and using our influence to make a positive impact.

"We've built a reputation for excellence and reliability. We can only sustain this by listening to our customers and forging strong business relationships" - **Rachel Holden - Director NR Medical Training**

Rachel Holden

Director | Paramedic

Rachel is a highly experienced healthcare professional and educator, currently serving as the co-director of NR Medical Training. With over 20 years of experience in health and social care, Rachel is a registered Paramedic with the Health and Care Professions Council (HCPC) and has extensive knowledge in forensic and emergency medicine. Throughout her career, Rachel has held various roles including safeguarding lead in a custodial healthcare setting. Rachel is passionate about sharing her expertise and has provided training and mentoring to countless professionals. With her wealth of experience, Rachel is committed to pushing the boundaries of how training is delivered and is determined to provide exceptional training and education.

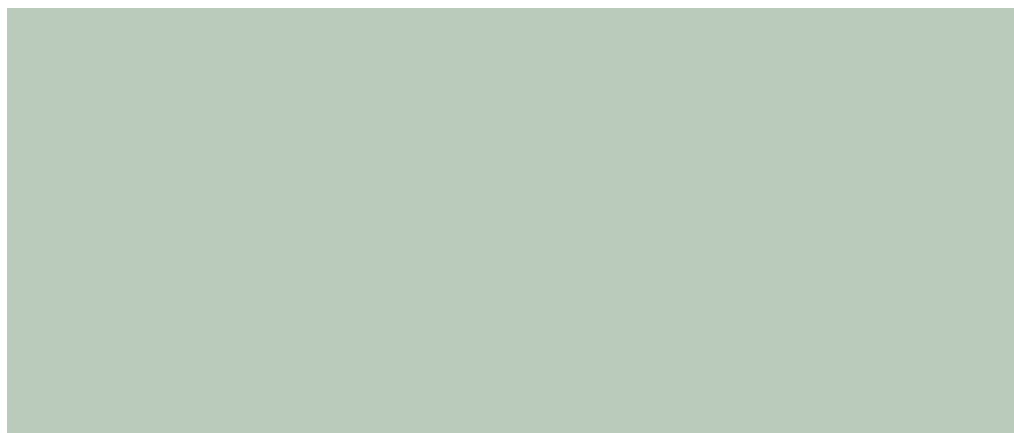

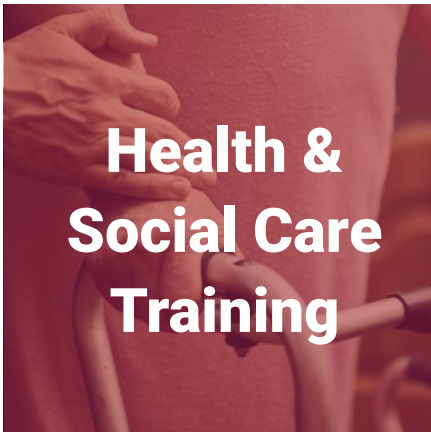

Neil Fossett

Director | EMT | Fire & Rescue Commander

Neil is a highly experienced emergency services professional with over 20 years of experience in both operational and training roles. As co-director at NR Medical Training, Neil brings his wealth of experience to the forefront of education. His career began in the Police Service before moving onto the Fire and Rescue Service, where he was promoted to commander and led incident command and recruit training. Neil also led a fire service training team in Afghanistan, providing both operational fire cover and training Afghan firefighters as part of Operation Resolute Support. He later joined the Ambulance service, where he upskilled clinically and became an Associate Ambulance Practitioner. Neil's diverse skill set, and range of experiences make him an invaluable asset to training, education and mentorship.

All training, no matter the speciality is always delivered by subject matter experts.

Everything we teach we've seen.

Prehospital & Trauma Training

For those employed in high-risk sectors like construction, oil and gas, security, or mining, possessing a FREC 3 or FREC 4 qualification is highly advantageous. These fields are more prone to workplace accidents, and having a trained first responder on hand can significantly enhance the management and outcome of any emergency scenarios.

At NR Medical Training, we use life-like simulations to create an engaging and immersive learning experience. By replicating real-life situations, learners are provided with a solid understanding of the skills being taught. This type of simulative training engages learners and allows them to apply their knowledge in a safe and supportive environment, preparing them for the challenges they may face in the real world.

QA Level 3
First Response
Emergency Care

FREC 3

Throughout the course, you will acquire the competencies outlined in the PHEM skills framework at descriptor level D. Additionally, you will gain practical experience in administering emergency oxygen, managing trauma patients, identifying major illnesses, and other vital competencies.

The Quallsafe First Response Emergency Care (FREC 3) (Level 3 RQF) is a 5 day nationally recognised and regulated qualification perfect for those who want to work or volunteer as a first responder. It's great for police officers, firefighters, and medical personnel who work at events and festivals like Emergency/Community First Responders, Door Supervisors, Close Protection Operatives, and Security Guards. It's also suitable for people who work in high-risk environments such as the military, power stations, agriculture, and manufacturing.

QA Level 4
First Response
Emergency Care

FREC 4

Throughout the FREC 4 course, you will develop advanced skills as outlined in the PHEM skills framework at descriptor level E. This course will enhance your abilities in managing complex trauma patients, advanced airway management, administering emergency medications, and dealing with major illnesses.

The Quallsafe First Response Emergency Care (FREC 4) (Level 4 RQF) is a comprehensive, nationally recognised and regulated qualification, ideal for those aspiring to further their first responder capabilities. It is particularly suitable for police officers, firefighters, and medical personnel involved in events and festivals, as well as aspiring Emergency Care Assistants (ECAs) Door Supervisors, Close Protection Operatives, and Security Guards. Additionally, it's highly relevant for individuals working in high-risk settings such as the military, power stations, agriculture, and manufacturing, where advanced first aid skills are crucial.

First Aid Training

From nurseries, schools and care homes to shops, offices and construction companies, we offer quality, accredited and flexible first aid courses across the UK tailored to you. Our trainers are experienced healthcare professionals who have seen firsthand the importance of effective first aid training. They are passionate about sharing their knowledge and expertise with our learners to help them save lives.

First Aid Training Delivered By Paramedics & Associated Healthcare Professionals.

97%

Of our first aid course delegates felt that having training delivered face to face by an experienced healthcare professional enhanced their learning experience and made the training more engaging and memorable.

First Aid Needs Assessment

All businesses are required to carry out a first aid needs assessment. We have a free online tool on our website that can help you to determine what level of training you require.

Fire Safety Training

Ensuring workplace safety involves providing employees with essential fire safety training. This proactive measure safeguards both personnel and business interests. Fire safety training demonstrates a commitment to employee well-being, instilling confidence and boosting morale. Expert delivery by firefighters and industry professionals provides real-world experience, imparting invaluable knowledge and hands-on experience to effectively prepare employees for unforeseen emergencies.

Level 1 Award in Fire Safety Awareness (RQF)

This half-day qualification provides a thorough understanding of fire safety principles, including causes of workplace fires, safety responsibilities, risk control methods, and fire-fighting equipment use. Invest in your workplace safety with this essential training course.

Level 2 Award in Fire Safety (RQF)

This 1-day course equips designated personnel with essential fire safety knowledge and skills. Topics covered include crucial fire safety issues. Investing in this training gives your business peace of mind that employees can handle fire safety incidents and protect your workplace.

Manual Handling Training

Manual handling training is essential for any business that involves the lifting, carrying, or moving of heavy objects, as it reduces the risk of injury to employees. A manual handling injury can have a significant impact on both the individual and the business, resulting in time off work, loss of productivity, and potential legal action. Therefore, it's crucial to ensure that employees receive proper training to prevent these injuries from occurring. Having an industry expert deliver this training brings a unique level of expertise and real-world experience to the table.

Health & Safety Training

Ensuring the health and safety of employees should be a top priority for any business. Providing comprehensive health and safety training not only protects employees from potential harm, but also reduces the risk of accidents and incidents in the workplace. Industry experts with hands-on experience and knowledge of current regulations and best practices are essential in delivering this training.
