What People are Saying Reviews

"Love colour coding. I was always stumped in how to connect the evidence to EYLF outcome even though it was all on the page - when I saw an example of someone who had used the Highlighter to colour code - it was a no brainer - bought it - love it - will always use it now."

"Helping improve our knowledge. We love this book, it has ideas on activities as well as teaching notes to enhance our Educators culturally inclusive practices."

"This is great. This will be a great addition to our rest and relaxation time for our 3-5 room."

"Helpful bookmarks! I ordered the bookmarks to trial with my team. As the Educational Leader, I am always looking for new ways to inspire and assist other educators in their programming. One thing that is a common struggle amongst my team is sometimes coming up with new creative descriptive words for our observations. These bookmarks really helped changed the way we write! They are small and convenient to keep with you in a dairy or just laying around the office. Definitely recommend purchasing these!"

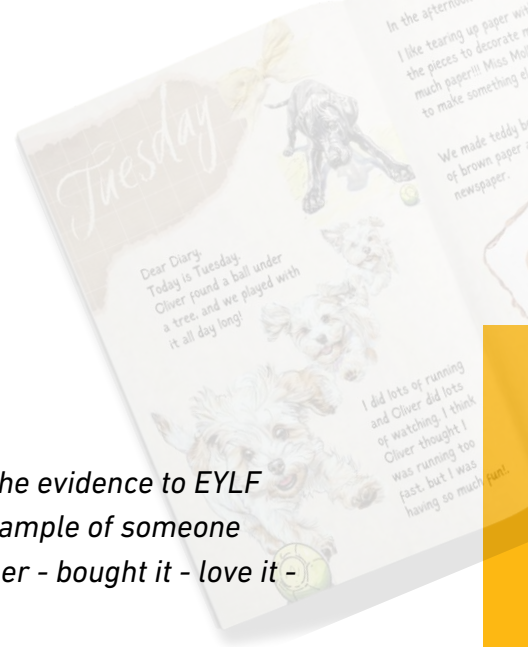

"Great way to Communicate. These 'Yarning' Cards are a fantastic way of getting to know our first nations culture and each other. They have the children completely engaged and actually listening to what each child is sharing. It has become very popular amongst our school aged children and it is their go to every time. We all love them!!"

"Great resource. I love having the symbol cards on the table or wall near our art/craft area. Why? Because the children are spending time writing comic strips, stories or drawing pictures in their individual scrap books. They often use what is in their environment as inspiration and we have incorporated these cards and more images we have for them. We love their artwork when it depicts something, and it holds the story in Indigenous symbol story."

"Butler Bookmark. Great Resource. Helps eliminate overuse of words which can make records sound cliched. All staff enjoying the variety of professional prompts the bookmarks provide."
