

FINIXA METAL BONDING

Choose efficiency, reliability, and precision in your projects with our Metal Bonding solution. Finixa Metal Bonding (PLI 50) is a two-component structural epoxy adhesive system intended for use in metal and composite panel bonding. Bond line thickness is controlled by 0.25mm glass beads comprised in the adhesive. The 2:1 adhesive system is available in 220ml side by side. The universal cartridge can be used with PLI 60, the Finixa applicator gun.

Features and benefits

- Room temperature curing, heat acceleration possible
- Long open time of 60 min, handling within 4 hours @ 23°C, full cure in 24 hours
- Bond line thickness is controlled by 0.25mm glass beads
- Withstands automotive e-coat, powder prime, and paint oven temperatures up to 230°C
- Spot-weldable (uncured!)
- Excellent corrosion protection
- High energy absorption and very good crash performance

Metal Bonding

An epoxy-based glue meticulously developed to seamlessly bond panels of equal or different materials. This innovation provides a welding alternative, offering a versatile solution for various applications, such as roof panel replacements, attaching aluminium fenders, or affixing aluminium door panels to steel door frames.

Seal Kits are available on request

Spon Tape

SPT13 Round shaped foam strip for masking joints between two panels. One side of the strip has been treated with heat resistant adhesive. Simply stick the tape on the inside of one of the panels and close the other panel. Protects the joint perfectly, absorbs the paint and avoids edge building.

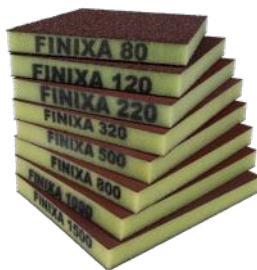

SPT25 Oval shaped spon tape to protect joints during paint work. Unlike the traditional spon tapes, SPT 25 is put on the moving part of the joint. The paint never comes in contact with the glue layer. The tape can still be repositioned for a perfect finishing after closing the door. Perfect to use with fade-out spraying, without edge forming.

\$40.50

SPT13 / SPT25

Sharp Foam Pad

The Finixa Sharp Foam Pads are coated with an extra ceramic-coated aluminium oxide grit, which makes them stronger and more durable. An additional advantage is that the ceramic coating also counteracts clogging, which also leads to a more uniform sanding result.

Grits available: P80-P1500

Powerpeel Booth Coating

- Easy peelable coating for the protection of spray booth walls against overspray
- Available in white or transparent
- Water-based product
- Easy to remove with water when it's liquid
- When dried, powerpeel can't be removed with water. This makes it possible to apply a coating from our CBP (active for 10-12 weeks). When the CBP has dried up, peel both layers off at once
- Effortlessly protect your spray cabin walls with our peelable coating.

AVAILABLE NOW

"We were thrilled to host Melomotive Australia recently for two exclusive one-day training events at Buddy's Garage in Hamilton & UCOL Training Centre in Palmerston North. Thank you to both venues for assisting here.

This workshop focused on Spline techniques to deliver high-quality bodywork efficiently with less labour.

The workshop brought together a great group of professionals and enthusiasts, all eager to sharpen their skills. Paint Smart are proud to have partnered with Melomotive to deliver this opportunity.

Thanks to everyone who joined us, and to Peter from Melomotive for sharing his expertise."
