The 8th Coin Conference: Shaping the Future of Circulating Coinage

The 8th Coin Conference takes centre stage, bringing together experts to tackle critical challenges facing coin production and circulation in the context of a rapidly-evolving payments eco-system. Join us 28–30 September 2026 to build a more sustainable and secure future for coins.

As the only event dedicated exclusively to circulating coins, the Coin Conference convenes over 200 international delegates – including central banks, treasury departments, mints, and industry leaders – to share insights, exchange best practices, and explore new perspectives on:

- Forecasting supply and managing demand
- Coin design, security, and cost efficiency
- The note–coin boundary and optimal circulation strategies
- Sustainability and recirculation in modern economies.

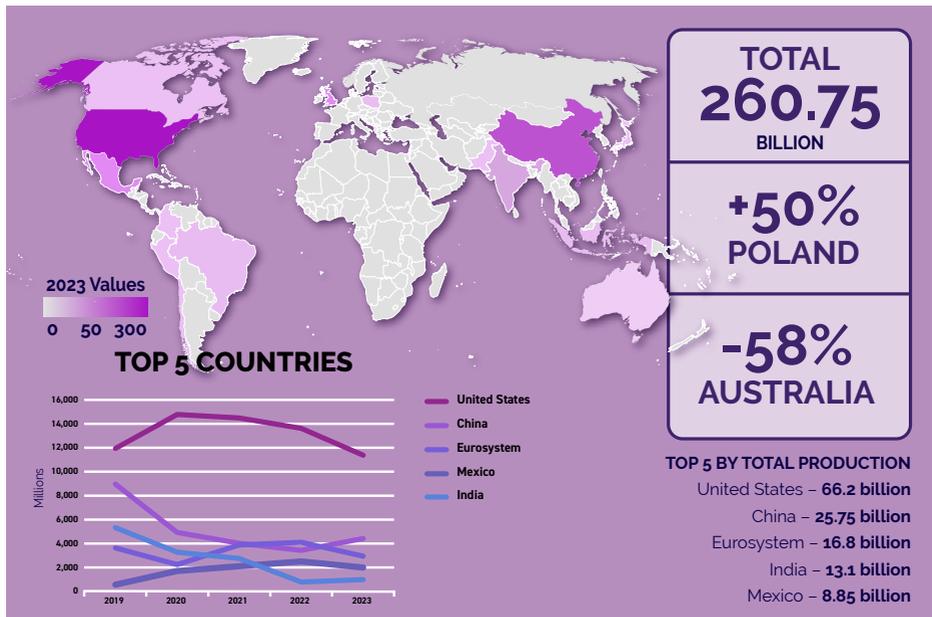

“Good information and opportunity to meet others in the industry.”

United States Mint

Who Attends

- Treasury departments, central banks and monetary authorities
- State and commercial mints
- Suppliers of coin production, handling and packaging equipment
- Manufacturers of components and blanks
- Cash handling and CITs
- Coin service providers

Programme Outline

MONDAY 28 SEPTEMBER

Run by leaders in their field, our optional pre-conference workshops provide best practice advice and case study examples to enhance your professional knowledge.

Details of the 2026 workshops will be published with the main programme as soon as details have been finalised.

TUESDAY 29 SEPTEMBER

This day is dedicated to a series of general sessions with presentations from various organisations – and visit our exhibition with specialist providers showing the latest innovations in circulating coins.

WEDNESDAY 30 SEPTEMBER

This day continues the series of general sessions with presentations from various organisations, along with panel discussions.

A post-conference tour of local production facilities will also take place – this is subject to availability and more details will be released closer to the conference date.

Topics Covered

- Forecasting demand
- Determining the optimum note/coin boundary
- Recycling and recirculation
- Minimising costs of production and circulation
- Building and maintaining public confidence
- Creating green, clean and secure coins
- New coin cycle policies and strategies
- A sustainable future for coins
- Threats and challenges to cash and coins
- Digital transformation and next generation technologies.
