## Contracts for Infrastructure Projects

An International Guide to Application

**Philip Loots** and **Donald Charrett**

*Series: Practical Legal Guides for Construction and Technology Projects*

*Contracts for Infrastructure Projects: An International Guide* provides a guide to the law relating to construction contracts for infrastructure projects; it is intended for the use of engineers and other professionals who are involved in the negotiation and administration of construction contracts, to enable them to understand the risks involved, and how to minimise them. To the extent possible, the emphasis is on general principles of contract law that are widely accepted in many jurisdictions. Examples are drawn from case law in a number of common law jurisdictions, as well as from civil codes.
